Living in the Environment, Enhanced Homework Edition Brooks Cole

Miller's LIVING IN THE ENVIRONMENT, 14th Edition is the most comprehensive and up-to-date environmental science text on the market. It has the most balanced approach to environmental science instruction, with bias-free comparative diagrams throughout and a focus on prevention of and solutions to environmental problems. Tyler Miller is the most successful author in academic writing on environmental science because of his attention to currency, trend setting presentation of content, ability to predict student and instructor needs for new and different supplements, and his ability to retain the hallmarks on which instructors have come to depend. The content in the 14th edition of LIVING IN THE ENVIRONMENT is everything you have come to expect and more. In this edition, the author has added the "How Would You Vote?" feature, which is an application of environmental science-related topics in the news. Students apply their environmental science knowledge from the book to a Web activity, which helps them investigate environmental science issues in a structured manner. They then cast their votes on the Web. Results are then tallied. Also found at the Miller website is the much used "Updates on Line." Updated twice a year with articles from InfoTrac College Edition service, CNN. Today Video Clips, and Web links, instructors can seamlessly incorporate the

most current news articles and research findings to support text presentations. This is a time saver for instructors and part-time teachers who can quickly determine what ancillary materials they want to utilize in just minutes. As with the last edition, this text is packaged with a free Student CD-ROM entitled "Interactive Concepts in Environmental Science." Organized by chapter, the CD gives students links to relevant resources, narrated animations, interactive figures, and prompts to review material and test themselves.

Living in the Environment Cram101

In this 6th edition of SUSTAINING THE EARTH Miller has added an on-line Web-based resource, called the Resource Integration Guide. Updated quarterly with CNN Today video clips, animations, and articles from InfoTrac College Edition instructors will be able to seamlessly incorporate the most current news articles and up-to-the-minute research findings to support classroom instruction and text presentations. The content in the 6th edition of SUSTAINING THE EARTH by Tyler Miller is everything you have come to expect and more. Two new chapters on basic ecology (Chapters 3 and 4) have been added to this edition to enhance this science-based book. This text differs from Miller's comprehensive text, LIVING IN THE ENVIRONMENT, 13th Edition, because there is much less detail and more integration of topics, with a different chapter order. For example, the following topics have been integrated into single chapters: human population dynamics and urban problems are in Chapter 5, nonrenewable and renewable energy resources are in Chapter 6, terrestrial and aquatic biodiversity are in Chapter 7, water resources and water pollution are in Chapter 12, solid and hazardous waste are in Chapter 13, and environmental economics, politics, and worldviews are in Chapter 14. For the first time ever in a Miller textbook, students will receive a CD-ROM, entitled Interactive Concepts in Environmental Science. This groundbreaking addition integrates nearly 100 engaging animations and interactions with chapter summaries, flashcards, and Web-based quizzes. Organized by chapter, students will find links to relevant resources, narrated animations, interactive figures, and prompts to review material and test themselves. Miller has remained true to his hallmark features, such as high quality end-of-chapter questions, an orientation toward prevention rather than clean-up, an integration of Web resources and video, and a balanced

presentation of controversial environmental issues.
