O livro descreve a análise
do sistema de avaliação
da Coordenação de
Aperfeiçoamento de

Pessoal de Nível Superior
- Capes - que exerce forte
in- uência sobre os
programas de pós-
graduação stricto sensu.
No Brasil, os programas
de pós-graduação stricto-
sensu são regulados pela
Coordenação de
Aperfeiçoamento de
Pessoal de Nível Superior
- Capes -, órgão

vinculado ao Ministério da
Educação - MEC -, que
possui o poder de
recomendá-los ou
descredenciá-los. Neste
contexto verifica-se que,
ao longo dos anos, os
programas articulam suas
estratégias e ações para
atender aos quesitos do
sistema de avaliação.
Neste estudo, os autores

analisaram a evolução dos programas da área de Administração, Ciências Contábeis e Turismo referente às notas obtidas em três triênios de avaliação (2001 a 2009) e verificaram quais foram as estratégias adotadas pelos programas que alcançaram as notas de excelência nacional (conceito 5) e os conceitos de excelência internacional (6 e 7) no sistema de avaliação da Capes.

There are many different types and causes of trauma and stress in the workplace that can impact employee behavior and performance.

Corporations have a social responsibility to assist in the overall wellbeing of their employees by ensuring that their leaders are emotionally intelligent and that their organization is compliant with moral business standards. Occupational Stress: Breakthroughs in Research and Practice examines the

psychological, physical, and physiological effects of a negative work environment. It also explores how to cope with work-related stress. Highlighting a range of topics such as job satisfaction, work overload, and work-life balance, this publication is an ideal reference source for managers, professionals, researchers, academicians, and graduate-level students in a variety of fields. Proceedings of the ISCONTOUR The aim of the International Student Conference in Tourism Research (ISCONTOUR) is thus to offer students a unique platform to present their research and

to establish a mutual knowledge transfer forum for attendees from academia, industry, government and other organisations. The annual conference, which is jointly organised by the IMC University of Applied Sciences Krems and the Salzburg University of Applied Sciences, will take place alternatively at the locations Salzburg and Krems. The conference research chairs are Prof. (FH) Dr. Roman Egger (Salzburg University of Applied Sciences) and Prof. (FH) Mag. Christian

Maurer (University of Applied Sciences Krems). The target audience include international students (also PhDs), graduates, teachers and lecturers from the field of tourism and leisure management as well as companies and anyone interested in the conference topic areas. Issues to be covered at the conference include the following areas within a tourism context: Marketing & Management Tourism Product Development & Sustainability Information

and Communication Technologies
Management Editora FGV
 Bis dato liegt kein Design for Six Sigma-Zyklus vor, der jeweils zu kundenoptimalen Produkten respektive Prozessen führt. Swen Günther analysiert diesen Sachverhalt erstmals wissenschaftlich und zeigt neue, innovative Lösungsansätze auf. Die abgeleiteten Vorgehensmodelle werden an zwei Praxisbeispielen explorativ überprüft.
Systems Analysis and

Design Methods Springer
 This book presents a broad spectrum of problems related to statistics, mathematics, teaching, social science, and economics as well as a range of tools and techniques that can be used to solve these problems. It is the result of a scientific collaboration between experts in the field of economic and social systems from the University of Defence in Brno (Czech Republic), G. d'Annunzio University of Chieti-Pescara (Italy),

Pablo de Olavid eUniversity of Sevilla (Spain), and Ovidius University in Constanța, (Romania). The studies included were selected using a peer-review process and reflect heterogeneity and complexity of economic and social phenomena. They and present interesting empirical research from around the globe and from several research fields, such as statistics, decision making, mathematics, complexity, psychology, sociology and economics.

The volume is divided into two parts. The first part, "Recent trends in mathematical and statistical models for economic and social sciences", collects papers on quantitative matters, which propose mathematical and statistical models for social sciences, economics, finance, and business administration. The second part, "Recent trends in qualitative theories for economic and social sciences", includes papers on qualitative matters, which discuss

social, economic, and teaching issues. It is an ideal reference work for all those researchers interested in recent quantitative and qualitative tools. Covering a wide range of topics, it appeals in equal measure to mathematicians, statisticians, sociologists, philosophers, and specialists in the fields of communication, social and political sciences. Governança corporativa Pearson
Modern management for the fulfilment of sustainable development

goals requires support provided by controlling, especially 'green controlling', whose core focus is on environmental and social issues. This book presents controlling within the concept of sustainable development as an element contributing to the increase of enterprise value. The authors of this monograph have explored topics in connection with environmental and social determinants, at the same time presenting their financial consequences for company business. As

a result, the publication demonstrates, in the theoretical dimension, that activities undertaken in an organized and coordinated fashion with a view of sustainable development goals may and should be regarded in connection with finance.

ISCONTOUR 2015 - Tourism Research Perspectives Springer-Verlag

The fifth edition of this text takes management into the 1990s and makes students aware of today's global environment changes, showing them

how effective managers can and do adapt. Management and diversity boxes show how culturally diverse groups are being integrated into effective organizations and discuss how management styles differ throughout the world. There is increased emphasis on international management and each chapter concludes with a video case showing how an actual company has dealt with an issue covered in both the chapter and a corresponding news video

clip.

Innovation and Entrepreneurial Opportunities in Community Tourism
 Springer

Los capítulos del libro tienen al menos dos posturas en común. Por un lado, se pueden ubicar cercanos a los estudios críticos de la gestión mejor conocidos como los Critical Management

Studies, como los de Foucault y Habermas (por ello no perteneciente a los Business School), pero más cercanos a los escritos de la Escuela de Cambridge con Sheldon Wolin Quentin Skinner o Hanna Arendt-que Velasco (1999) caracteriza bien-.Por ello, los puedo identificar como normativos, críticos, reflexivos y argumentativos.
Emprendimiento: modelos, tipología y comunicación eficaz del proyecto Chandresh Agrawal

SGN.The Ebook UPCL-Uttarakhand AO-Accounts Officer Exam Covers All Sections Of The Exam. *Competitiveness and Economic Development in Europe* LIT Verlag Münster In order to yield the expected benefits, sustainability initiatives need to be undertaken by means of a close cooperation between universities on the one hand, and societal partners on the others. The principle of co-creation and co-execution of sustainability initiatives increases the value for all

by mutual learning, and the sharing of expertise and resources. But pursuing sustainability initiatives with a community and societal involvement is not simple. There is a perceived need for a better understanding of how universities can interact with society, in order to support the implementation of the UN Sustainable Development Goals. This book is an attempt to address this need, by a novel approach which focuses on current potentials and challenges, across a wide range of

fields and expertise. The book focuses on how the theory and practice of sustainable development interact and shows the need for a continuation of the dialogue among sustainability academics and practitioners, so as to address the issues, matters and problems at hand. The spectrum of themes addressed on this book also entails how environmental values and ethics are applied and the relationship between social, biological and cultural diversity. It also includes a broad

disciplinary approach to sustainability, including education, research and case studies, and the links with human-environment relations in a sustainable development context.

Business Ethics and Organizational Values

Peter Lang

The shifting influence of growing organizational cultures and individual standards has caused significant changes to modern organizations. By creating a better understanding of these influences, the quality of organizations can be

improved. Exploring the Influence of Personal Values and Cultures in the Workplace is a pivotal reference source for the latest research on how culture and personal values shape and influence employees' actions, behaviors, and leadership styles. Featuring extensive coverage on relevant areas such as psychological health, career management, and job satisfaction, this publication is an ideal resource for practitioners, professionals, managers,

and researchers seeking innovative perspectives on the impact of personal values and cultures in the workplace.

Mathematical-Statistical Models and Qualitative Theories for Economic and Social Sciences IGI Global

During the last 60 years the discipline of human factors (HF) has evolved alongside progress in engineering, technology, and business.

Contemporary HF is clearly shifting towards addressing the human-centered design paradigm for much larger and

complex societal systems, the effectiveness of which is affected by recent advances in engineering, science, and education.

Human Factors of a Global Society: A System of Systems Perspective explores the future challenges and potential contributions of the human factors discipline in the Conceptual Age of human creativity and social responsibility.

Written by a team of experts and pioneers, this book examines the human aspects related to contemporary societal

developments in science, engineering, and higher education in the context of unprecedented progress in those areas. It also discusses new paradigms for higher education, including education delivery, and administration from a systems of systems perspective. It then examines the future challenges and potential contributions of the human factors discipline. While there are other books that focus on systems engineering or on a specific area of human

factors, this book unifies these different perspectives into a holistic point of view. It gives you an understanding of human factors as it relates to the global enterprise system and its newly emerging characteristics such as quality, system complexity, evolving management system and its role in social and behavioral changes. By exploring the human aspects related to actual societal developments in science, the book opens a new horizon for the HF

community.
European Organised Crime Scenarios for 2015
 Springer
 Due to automation, nearly half of the jobs will vanish over the next two decades in the US. However, the problem is not confined to any particular country. Management educators in higher education are faced with two fundamental questions: (a) how we prepare our students for new required technology competencies when conducting international business and

(b) how we work with new technologies to prepare our students. While the next generation of employees requires competencies in working with artificial intelligence relying on data analytics, the emergence of artificial intelligence and new technologies in augmenting teaching is changing the nature of higher education across the globe. Management Education and Automation explores international management education in light of exponential development of artificial

intelligence, big data, demographic shifts, expansion of robotic utilization in many economic sectors, aging populations and negative population growth in developed economies, multipolar international political systems, migration patterns, and fundamental shifts in individual and social interactions via digital media. It shows the latest state of knowledge on the topic and will be of interest to researchers, academics, policymakers, and students in the fields

of international business and management, globalization, management education, and management of technology and innovation.

Human Factors of a Global Society Routledge

This book is prepared to answer the demands for the practical guidance of systems analysis and design methods. The author hopes that after reading this book, the reader can understand the concepts and techniques to analyze and design the systems. In

general, there are 2 (two) main methods that most often used in system development: structured and object-oriented methods. The book explains a significant paradigm difference between the two methods of analyzing and designing the systems. The author expects the readers can distinguish that paradigm as well as analyze and design using both methods. The book structure starts from the concept to technical. The author uses the Unified Modeling Language

(UML), which is widely used, for documenting object-oriented modeling. The UML has proven its ability to document and model the systems on a large, medium, and small scale.

Handbook of Research on Pedagogies and Early Intervention Strategies for Combatting Socio-Pathological Behaviors

Paco Editorial

The Kayan culture is one that is rich with cultural diversity, and it's important to appreciate and preserve it for future generations. The Kayan

people are categorized as part of the Dayak communities of Borneo, and this book focuses on the Sarawak tribe with special reference to the Kayan Uma Pu clan. In addition to learning about the Kayans through an assortment of beautiful pictures, you'll learn about tribal customs, beliefs, and more. Get insights on how: * Kayans expanded their living area over time; * communication occurs even without an alphabet; * villagers resolve household and community

disputes; * beliefs and omens play a critical role in their society. The Kayans have survived so long because they cooperate and stick together, even though they're scattered over a large area. While they've often been displaced, they'll enjoy a much brighter future if the world seeks to understand their culture, heritage, and accomplishments. Administración Partridge Publishing Singapore This book presents the skills required in business and management careers.

The management tools provided within this text can be very useful for beginners in the study of management area, as well as to those pursuing a managerial career in different types of organization. It serves as a refreshment in the management sciences foundations. Subjects such as accounting, marketing, human resources, operations, finance are treated in detail, giving the reader the background that can be applied to a variety of real world business

situations. The book also covers the latest developments in management research activity, promoting discussion and the exchange of information on principles, strategies, models, techniques, methodologies and applications in the management and business area.

Exploring the Influence of Personal Values and Cultures in the Workplace
Pearson Educación
Dass Coaching zum probaten Instrument der Personalentwicklung

gehört, ist unbestritten. Zumindest wird diese These in der Coaching-Literatur nahezu unisono wiederholt. Eine umfassende empirische Überprüfung ist jedoch Forschungsdesiderat. Diese Lücke möchte dieses Buch schließen. Auf Basis einer quantitativen Erhebung (vorbereitet durch qualitative Interviews) wird ein Überblick über die Verwendung, Verbreitung und Einführung von Coaching in Großunternehmen gegeben. Die Nachfrage-

und Angebotsstrukturen, die in der Nutzung von Coaching im Praxisfeld wirksam sind, werden empirisch untersucht und zudem Formen und Erfahrungen bei der Einführung sowie unterschiedliche Strukturmerkmale des Verlaufs des Implementierungsprozess es erfasst. Die Ergebnisse ermöglichen Gestaltungshinweise im Sinne von Best Practice. The Kayans Management O livro aborda os principais conceitos do processo de comunicação

e negociação nas empresas, pautando-se na ética e no respeito. Discute as etapas do planejamento de comunicação, as principais barreiras encontradas e os papéis dos profissionais da área. Explica como desenvolver uma comunicação empresarial eficaz, que fortaleça os vínculos entre os profissionais, além das formas de comunicação verbal e não verbal, com destaque às expressões corporais. Inclui técnicas de apresentação e aborda diferentes perfis de

negociadores e tipos de negociação (ganha-ganha, perde-ganha, perde-perde, ganha-perde). Por fim, enfatiza a importância de pesquisas de satisfação, registros de reclamações e ouvidoria, com destaque para o Código de Defesa do Consumidor. O conteúdo pode ser aplicado para os cursos técnicos em Agenciamento de Viagem, Agente Comunitário de Saúde, Eventos, Gerência em Saúde, Guia de Turismo, Hospedagem, Lazer, Marketing, Orientação Comunitária,

Vigilância em Saúde, entre outros. Possui material de apoio.
