*Truth, Theology, and Perspective* Wm. B. Eerdmans Publishing

Sarah Coakley is one of the most exciting and creative figures in contemporary theology. Her far-reaching systematic vision of the Christian faith has integrated insights from systematic theology, gender studies, sociology, patristics, analytic philosophy of religion, and evolutionary biology. This integrated vision coheres around the mystical and contemplative core of Christian experience. In her challenging revisionary work on themes such as gender, sacrifice, desire, and the doctrine of the Trinity, Coakley reconnects theological reflection with its contemplative roots and pushes toward a new approach to systematic theological reflection. In *Sarah Coakley and the Future of Systematic Theology*, scholars explore Coakley's multifaceted contribution to contemporary theology and consider the ways through which her work sets a new standard for systematic reflection on the Christian faith. This volume brings together, around Coakley's work, a gathering

of established and emerging scholars and asks critical questions of Coakley's work as we await three further volumes of her systematic theology.

An exploration of the Trinitarian theology of the Dutch Neo-Calvinist theologian Herman Bavinck (1854-1921) via a new reading of his ever-present organic motif.

The first of a two-volume project delving into the doctrine of justification. Michael Horton seeks not simply to recover a clear message of its role in modern Reformed theology, but also to bring a fresh discovery of the gospel in a time when contemporary debates around justification have reignited. The doctrine of justification stands at the center of our systematic reflection on the meaning of salvation and grace as well as our piety, mission, and life together. And yet, within mainline Protestant and evangelical theology, it's often taken for granted or left to gather dust in favor of modern concerns and self-renewal. Volume 1 is an exercise in historical theology, exploring the doctrine of justification from the patristic era to the Reformation. This book: Provides a map for contemporary discussions of justification, identifying and engaging principal sources:

Origen, Chrysostom, Augustine, Thomas Aquinas, John Duns Scotus, William of Ockham, Gabriel Biel, and the magisterial reformers. Studies the transformations of the doctrine through Aquinas, Scotus and the nominalists leading up to the era of the Reformation and the Council of Trent. Concludes by examining the hermeneutical and theological significance of the Reformers' understanding of the law and the gospel and the resultant covenantal scheme that became formative in Reformed theology. Engaging and thorough, *Justification* will not only reenergize the reader—whether Protestant or Catholic—with a passion for understanding this essential and long-running doctrinal conversation, but also challenge anyone to engage critically with the history of the Church and the heart of the gospel.

In this concise, one-volume systematic theology, celebrated scholar Anthony Thiselton comprehensively covers the spectrum of Christian doctrine with an eye to practical application for Christian discipleship. Written with students and busy ministers in mind, this book is readable and accessible, comprising fifteen chapters of relatively equal length, with each chapter containing five evenly balanced subsections for teaching and learning convenience. Rather than setting out an

abstract system, Thiselton explores theology as a living, organic whole. The book thus includes biblical foundations, historical thought, contemporary writers, and practical implications. Expertly incorporating biblical exegesis, philosophy, conceptual grammar, and hermeneutics, this work is the most succinct multidisciplinary systematic theology available.

*Reformational Theology* A&C Black

Guarino argues in this book that the doctrinal form of the Christian faith, in its essential characteristics, calls for certain theoretical exigencies. This is to say that the proportion and beauty of the form is not served or illuminated by simply any presuppositions. Rather, a determinate understanding of first philosophy, of the nature of truth, of hermeneutical theory, of the predication of language and mutual correlation is required if Christian faith and doctrine are to maintain a recognizable and suitably mediative form. Failing to adduce specific principles will lead either to a simple assertion of Christian truth, in which case the form of Christianity becomes less intelligible and attractive-or one will substitute a radically changed form, which is itself inappropriate for displaying the fundamental revelatory narrative of faith. The house of Christian faith possesses a certain proportion of structure; the form will sag badly if one removes an undergirding item, or if one beam is replaced with another of variable shape or size. The form's beauty will either be obscured, no longer clearly visible, or the form will become something quite different, no longer architectonically related to what was originally the case. The intention of this book is to discuss those doctrinal characteristics considered fundamental to the Christian faith, as protective of its revelatory form and, concomitantly, to examine the theoretical principles required if such form is to remain both intelligible and beautiful.

*The Oxford Handbook of Systematic Theology* Crossway

This systematic theology begins from the treatise De Deo Uno and develops the dogma of the Trinity as an expression of divine unicity, on which will depend creation, Christology, and ecclesiology. The Invisible God must be seen and known in the visible. In this way, God and God's relation to creation are distinguished—but not separated—from Christology, the doctrine of perfections from redemption. In the end, the transcendent beauty who is God can be known only in worship and praise.

*The Hermeneutics of Doctrine* Baker Academic

This book introduces a new "multilateral" methodology for the contemporary study of theology. It bases this methodology on the idea that there are too many materials contributing as sources for theologizing to sustain the "one method fits all" approach found in many systematic theologies within Christianity. What is needed instead is something that reflects the various and varied natures, purposes, and tasks of theologians' theologizing for their respective contexts. Engaging materials from a range of Christian traditions, including Evangelicalism, the Catholic Magisterium, and a limited range of pan-Orthodox resources, the book analyzes and assesses major factors that have shaped different streams of theology. Addressing doctrinal development, scripture and revelation, historical tradition and creeds, philosophy and truth, sciences and interdisciplinarity, experience, religious pluralism, and culture, it demonstrates how these various streams can form a multilateral whole. The book concludes by examining the centers and peripherals of methodologies in theologization for a spectrum of theological traditions/streams, both across and beyond Christianity. By offering an approach that keeps in step with the increasingly interconnected and pluralistic world in which we live, this book provides a vital resource for any scholar of Christian theology, constructive theology, contextual theologies, and systematic theology, as well as religious studies.

Charles Hodge (1797-1878) was the chief theologian of Old Princeton, and is still revered today as one of greatest American theologies in the Presbyterian tradition. His Systematic Theology remains a standard work in the Reformed tradition.

Herman Bavinck's four-volume Reformed Dogmatics is one of the most important theological works of the twentieth century. The recently completed English translation has received wide acclaim. Now John Bolt, one of the world's leading experts on Bavinck and editor of Bavinck's four-volume set, has abridged the work in one volume, offering students, pastors, and lay readers an accessible summary of Bavinck's masterwork. This volume presents the core of Bavinck's thought and offers explanatory materials, making available to a wider audience some of the finest Dutch Reformed theology ever written. Praise for Reformed Dogmatics "Bavinck's magisterial Reformed Dogmatics remains after a century the supreme achievement of its kind."--J. I. Packer, Regent College

*Systematic Theology, Second Edition* Oxford Handbooks

This book constructively explores the question: What effects should an interest in theology produce in the reading of Scripture? Since the onset of historical consciousness in biblical studies over two centuries ago, the work of biblical exegetes and systematic theologians have largely followed two paths. In this book, nine prominent scholars work to bridge the longstanding gap between biblical studies and theology by concentrating on the nature of a biblical hermeneutics approach to doing theology. The range of concerns presented by these scholars seeks to reintegrate biblical exegesis with contemporary theology in the service of the church.

"Systematic Theology" in 3 volumes is one of the best-known works by the American Baptist minister and theologian Augustus Hopkins Strong. Excerpt: "Under the influence of Ritschl and his Kantian relativism, many of our teachers and preachers have swung off into a practical denial of Christ's deity and of his atonement. We seem upon the verge of a second Unitarian defection that will break up churches and compel secessions, in a worse manner than did that of Channing and Ware a century ago. American Christianity recovered from that disaster only by vigorously asserting the authority of Christ and the inspiration of the Scriptures. We need a new vision of the Savior like that which Paul saw on the way to Damascus and John saw on the isle of Patmos, to convince us that Jesus is lifted above space and time, that his existence antedated creation, that he conducted the march of Hebrew history, that he was born of a virgin, suffered on the cross, rose from the dead, and now lives forevermore, the Lord of the universe, the only God with whom we have to do, our Savior here and our Judge hereafter. Without a revival of this faith our churches will become secularized, mission enterprise will die out, and the candlestick will be removed out of its place as it was with the seven churches of Asia, and as it has been with the apostate churches of New England." "A new theological approach to a subject central for both Christian belief and human life."--

**Between Two Horizons** Defender

The second volume of the eminent Christian philosopher's magnum opus, in which he explores humanity's quest for Christ. Paul Tillich's Systemic Philosophy is the most comprehensive and

definitive presentation of his groundbreaking theological message: his "method of correlation", which finds the answers to humanity's most urgent existential dilemmas in the principles of Christian revelation. In volume two of this three-volume work, Tillich comes to grips with the central idea of his system—the doctrine of the Christ. Here, Tillich describes the human predicament as the state of "estrangement" from ourselves, from our world, and from the divine Ground of Being. This situation drives us to the quest for a new state of things, in which reconciliation and reunion conquer estrangement. This is the quest for the Christ.

This book formulates a new theological approach to the study of religion in gaming. Video games have become one of the most important cultural artefacts of modern society, both as mediators of cultural, social, and religious values and in terms of commercial success. This has led to a significant increase in the critical analysis of this relatively new medium, but theology as an academic discipline is noticeably behind the other humanities on this subject. The book first covers the fundamentals of cultural theology and video games. It then moves on to set out a Christian systematic theology of gaming, focussing on creational theology, Christology, anthropology, evil, moral theology, and thanatology. Each chapter introduces case studies from video games connected to the specific theme. In contrast to many studies which focus on online multiplayer games, the examples considered are largely single player games with distinct narratives and 'end of game' moments. The book concludes by synthesising these themes into a new theology of video games. This study addresses a significant aspect of contemporary society that has yet to be discussed in any depth by theologians. It is, therefore, a fantastic resource for any scholar engaging with the religious aspects of digital and popular culture.

The T&T Clark Handbook of Colin Gunton is a theological companion to the study of Gunton's theology, and a resource for thinking about Gunton's importance in modern theology. Each of the essays brings Gunton's depth to a broad range of contemporary theological concerns. The volume unveils cutting-edge Gunton scholarship for a new generation and at the same time enables readers to see the timely significance of Gunton today. Each of the essays not only introduces readers to key themes in the Gunton corpus, but also provides readers with fresh interpretations that are fully conversant with the contemporary theological problems facing the church. Designed as both a guide for students and a reference point for scholars, the companion seeks both to outline the frameworks of key Gunton debates while at all times pushing forward fresh interpretative strategies concerning his thought.

Study Systematic Theology through the Lens of Truth There are many themes that flow through and unite the entirety of Scripture, and in his latest ebook, scholar Vern S. Poythress explores the relationship between God and truth. In Truth, Theology, and Perspective, Poythress explains how truth informs and confirms what the Bible teaches. In addition to a theology of objective truth, he explains how it is interwoven through each of the major topics in systematic theology, such as revelation, the Bible, man, Christ, salvation, and eschatology. This perspective highlights how the interconnectedness and harmony of Scripture is an extension of God's own truthfulness and how this attribute is manifested in all of creation, prompting us to greater worship and gratitude to God. For Those Interested in Systematic Theology: Particularly college students, seminarians, and pastors Written by Vern S. Poythress: Author of many works on biblical interpretation, science, and history including In the Beginning Was the Word; Redeeming Science; and Inerrancy and Worldview New Perspective: Major topics in systematic theology studied through the lens of truth

"A systematic theology of the Christian faith, brief in extent but nonetheless profound and broad in compass. Professor Tanner's bold vision centres on the idea of God as gift-giver. Ecumenical in orientation, and informed by an extraordinary knowledge of the broad history of Christian thought, the book treats a range of topics of current interest from human agency and freedom, and conflict and process in human affairs, to failure and mortality. An exciting and challenging work, written to be accessible to students as well as to scholars. Introduction \*Jesus \*The Theological Structure of Things \*The Shape of Human Life \*The End Praise for Jesus, Humanity and the Trinity: "[Tanner's]

conception of God's transcendence ... informs a ... robust view of incarnation, one that amplifies the gift-centered nature of salvation, and one that, in addition, preserves both the divinity and humanity of Jesus in a non-truncated way ... [takes] seriously the positive content of Christian

doctrine and its implications for understanding the whole of life." Research News & Opportunities in Science and Theology."--Bloomsbury Publishing.
