Springer  
The stunning elegance

and luxurious interiors  
of today's vast fleet of  
cruise liners remains  
unrecorded in all but  
holiday brochures. This  
book gives a complete

overview of the cream of these ships, today's queens of the sea. Each liner is illustrated and described with color illustrations of external and interior views. Details of the design, building and service history of each vessel are provided with vital statistics of the ship and its facilities. Among the ships included are Cunard's Queen Victoria and Queen Mary 2, the big new Princess Line liners - Ruby, Grand Sea and Celebrity Eclipse, the two Ocean Village ships and the largest of the P&O liners Ventura, Oceana, Arcadia, Aurora and Artemis. This is a book of reference for maritime enthusiasts, would-be holiday cruisers and those who have been passengers.

Ships and Offshore Structures XIX Berlitz Publishing  
For over fifty years anyone needing information on British and Irish libraries has turned to Libraries and Information Services in the UK and the Republic of Ireland for the answer. This newly updated directory lists over 2000 libraries and other services in the United Kingdom, the Channel Islands, the Isle of Man and the Republic of Ireland, with contact names, addresses, telephone and fax numbers, e-mail addresses, and URLs. The listing is broken down into the following main categories, all fully indexed alphabetically: public library authorities, with entries for headquarters libraries

plus the main administrative, divisional, area and regional libraries; universities and institutes of higher education and other degree-awarding institutions, with entries for major departmental and site/campus libraries; and, selected government, national and special libraries, together with schools and departments of information and library studies.

ISO 9000 series standards have changed the whole concept of quality management methods. ISO 9001:2008 QMS standard has been implemented and ISO 9000 series standards have been adopted as

national standards or endorsed for use in 178 countries and economies. ISO 9001:2008 Quality Management System (QMS) is based on eight quality management principles and there are various internal and external benefits of implementing this standard, whether or not an organization goes for certification. This book provides the readers with an accessible and up-to-date introduction to the essentials of a quality management system, discusses what is in the ISO 9001:2008 QMS and shows how the organizations can implement this system. With the authors' extensive experience in QMS audit, training and advisory services, the book incorporates

basic information on understanding and implementing ISO 9001:2008 QMS and highlights its importance towards making quality the fundamental business principle. The text contains plenty of practical tips and guidance on how to implement ISO 9001:2008 QMS in the real world. It discusses sample QMS procedures, emphasizes the importance of maintaining a value added internal audit system and highlights the necessity of developing the QMS documentation procedures. Apart from the regular BBA, MBA, and diploma courses in Total Quality Management, this book is also suitable for Management

Development Programmes in Quality Management and ISO 9001 offered to professionals by many of the B-schools.

### **Merchant Vessels of the United States**

PHI Learning Pvt. Ltd. Business Responsibility and Sustainability in India Springer  
*Annual List of Merchant Vessels of the United States* Business Responsibility and Sustainability in India This edited volume recognizes that resilience, and the most effective means of harnessing it, differ across individuals, contexts and time. Presenting chapters written by a range of scholars and clinicians, the book highlights effective evidence-based approaches to nurturing resilience, before, during and

after a traumatic experience or event. By identifying distinct therapeutic tools which can be used effectively to meet the particular needs and limitations associated with different age groups, clients and types of experience, the volume addresses specific challenges and benefits of nurturing resilience and informs best practice as well as self-care. Approaches explored in the volume include the use of group activities to teach resilience to children, the role of sense-making for victims of sex trafficking, and the ways in which identity and spirituality can be used to help young and older adults in the face of pain and bereavement. Chapters also draw on the lived

experiences of those who have engaged in a personal or guided journey towards finding new meaning and achieving posttraumatic growth following experiences of trauma. The rich variety of approaches offered here will be of interest to clinicians, counsellors, scholars and researchers involved in the practice and study of building resilience, as well as trauma studies, psychology and mental health more broadly. The personal and practice-based real-life stories in this volume will also resonate with individuals, family and community members facing adversity. Marine Technology and SNAME News CRC Press  
This is the first book to offer a comprehensive

overview of modern seaports from a legal perspective. Further, it provides a basic toolkit for establishing a legal doctrine of seaports, the instruments of said toolkit being the very few legal norms specifically targeting seaports, which are examined as such rather than through the lens of other, more established disciplines, such as the law of the sea or transportation law. It is a first, necessary step toward giving seaports the status they rightfully deserve in legal studies. Despite centuries of international law studies and decades of EU law evolution, seaports have remained stuck in limbo. From a law of the sea perspective, seaports belong to the

land, an approach that is often clearly reflected in national maritime legislation. The other branches of international law do not focus on seaports, since they are considered to belong to the sea. The port communities, for their part, have availed themselves of the “port specificity” concept. In recent decades, containerization has transformed ports into key hubs of the globalized economy, but also into vital checkpoints of the War on Terror, due to the security risks posed by the millions of sealed containers circulating worldwide. Moreover, tragic maritime incidents have shown that seaports are the only reliable sentinels of the seas, being the only places where the

systematic inspection of ships is feasible. This has led to the adoption of specific international and EU rules. Those rules, however, remain fragmented, highly specialized and technical; as such, they are unsuitable for creating an organic legal seaport regime: this objective can only be achieved with a significant contribution from legal doctrine.

The Directory of Chartered Psychologists and the Directory of Expert Witnesses Springer Nature

The four-volume set LNCS 11244, 11245, 11246, and 11247 constitutes the refereed proceedings of the 8th International Symposium on Leveraging Applications of Formal

Methods, Verification and Validation, ISoLA 2018, held in Limassol, Cyprus, in October/November 2018. The papers presented were carefully reviewed and selected for inclusion in the proceedings. Each volume focusses on an individual topic with topical section headings within the volume: Part I, Modeling: Towards a unified view of modeling and programming; X-by-construction, STRESS 2018. Part II, Verification: A broader view on verification: from static to runtime and back; evaluating tools for software verification; statistical model checking; RERS 2018; doctoral symposium. Part III, Distributed Systems: rigorous engineering of

collective adaptive systems; verification and validation of distributed systems; and cyber-physical systems engineering. Part IV, Industrial Practice: runtime verification from the theory to the industry practice; formal methods in industrial practice - bridging the gap; reliable smart contracts: state-of-the-art, applications, challenges and future directions; and industrial day.

Wolters kluwer india Pvt Ltd

This three-volume work presents the proceedings from the 19th International Ship and Offshore Structures Congress held in Cascais, Portugal on 7th to 10th September 2015. The International Ship and Offshore Structures Congress (ISSC) is a forum for the exchange of information by experts undertaking and applying marine structural research. The aim of

Bench aids for the diagnosis of intestinal parasites Routledge

This is volume 1 of a 2-volume set. Marine Design XIII collects the

contributions to the 13th International Marine Design Conference (IMDC 2018, Espoo, Finland, 10-14 June 2018). The aim of this IMDC series of conferences is to promote all aspects of marine design as an engineering discipline. The focus is on key design challenges and opportunities in the area of current maritime technologies and markets, with special emphasis on:

- Challenges in merging ship design and marine applications of experience-based industrial design
- Digitalisation as technological enabler for stronger link between efficient design, operations and maintenance in future
- Emerging technologies and their impact on future

designs • Cruise ship and icebreaker designs including fleet compositions to meet new market demands

To reflect on the conference focus, Marine Design XIII covers the following research topic series:

- State of art ship design principles - education, design methodology, structural design, hydrodynamic design;
- Cutting edge ship designs and operations - ship concept design, risk and safety, arctic design, autonomous ships;
- Energy efficiency and propulsions - energy efficiency, hull form design, propulsion equipment design;
- Wider marine designs and practices - navy ships, offshore and wind farms and production. Marine

Design XIII contains 2 state-of-the-art reports on design methodologies and cruise ships design, and 4 keynote papers on new directions for vessel design practices and tools, digital maritime traffic, naval ship designs, and new tanker design for arctic. Marine Design XIII will be of interest to academics and professionals in maritime technologies and marine design.

Trafficking in human beings (THB) has been described as modern slavery. It is a serious criminal activity that has significant ramifications for the human rights of the

victims. It poses major challenges to the state, society and individual victims. THB is not a static given but a constantly changing concept depending on societal changes and opinions, economic situations and legal developments. THB occurs both transnationally and within countries. The complexity of THB is such that it requires a wide range of expertise fully to address the phenomenon. Edited by a team of leading international academics, the Routledge Handbook of Human Trafficking will provide an interdisciplinary introduction to THB. It is aimed at academics, students, research universities and non-governmental organisations, as well

as policy makers. It will review THB through the lens of law, anthropology, social and political science and will address statistical, data protection issues and showcase the most effective research methods, analyse the various actors and stakeholders and the different types of exploitation of trafficked persons. It will critically highlight and analyse the most pressing current challenges posed by THB.

Marine Design XIII, Volume 1 Springer

The third edition aims to fulfil the long-standing need of the medical students for a concise textbook of community medicine, which makes it an easy and interesting reading, in lucid and

simple English.

Contributed by 14 eminent teachers, It comprehensively covers all the required topics, explaining the concepts at length and stimulates analytical thinking. The book seeks to encourage students to approach the subject with scientific logic and apply the learned concepts appropriately in the future during his/her professional career.

A much-needed look at innovative and effective methods for creating virtual learning environments for human services  
Web-Based Education in the Human Services

reflects the vitality and diversity of Web-based courses currently delivered within human services. Unlike previous texts that have combined technologies such as Interactive Television (ITV) and two-way audio where Web involvement was minimal, this unique book focuses on Web-based models, tools, and techniques used in courses where the majority of the content is delivered online. The book's contributors emphasize the social aspects of learning, examining topical areas not usually associated with Web-based education as they remind us of the need to move beyond the similarities between WBE and face-to-face (FTF) approaches. Web-

Based Education in the Human Services documents a course delivery method coming of age in its desire to create virtual learning environments that incorporate a variety of techniques and strategies. These environments use concepts and tools beyond what packages such as WebCT currently offer, highlighting the power of designing a complete Web-based curriculum, rather than viewing each course separately. Many of the most successful approaches presented in this invaluable book don't involve sophisticated tools or programming, but the creative design of interactive scenarios, emotional content, and feedback mechanisms that reinforce the

instructor's role as the crucial ingredient for success. Web-Based Education in the Human Services examines: adult learning theories teaching practice skills through Web-based technology how to bridge the gap between theory and practice faculty perceptions of the effectiveness of Web-based instruction compared to face-to-face instruction the accessibility of Web-based education the significance of emotion in learning Web-based delivery of a graduate professional training program the creation, delivery, and evaluation of a pilot course using Blackboard 6™ the development of a Web-based undergraduate child welfare course

the use of Web-based video clips for counselor skills training the design, development, pilot, and revision of a Web-based social work practice course an online format for agency-based field instruction the design of a Web-based graduate program in counseling psychology and much more! Web-Based Education in the Human Services is an invaluable resource for social work and human services educators, including education, nursing, and psychology, Web-course developers, and college and university administrators.

**Naval Engineers Journal** Routledge

The oceans are a key resource for transportation, energy and material

extraction, and food production, representing one of the most important environments on the planet. Technological developments enabling us to exploit marine resources in a sustainable way are therefore of the greatest importance. This book presents the proceedings of the NAV 2022 conference, held in Genoa and La Spezia, Italy, from 15 to 17 June 2022. The conference is held every 3 years, attracting specialists in marine technology from all over the world. NAV 2022 was the 20th edition of the conference, and covered a full spectrum of maritime technology themes, all related to the exploitation of sea resources. The book contains 87 scientific

papers, covering subjects ranging from comfort on board; to conceptual and practical ship design; deep sea mining and marine robotics; protection of the environment; renewable marine energy; design and engineering of offshore vessels; digitalization and cyber security; unmanned vehicles; yacht and pleasure craft design, and inland-waterway vessels. Providing a comprehensive coverage of the latest scientific and technical maritime issues, the book will be of interest to all those involved in this vital global industry. [Ocean Cruising and Cruise Ships 2003](#) Springer Marine Design XIII collects the

*Marine Design XIII*  
Antonio Giangrande  
This second edition of Bench aids for the diagnosis of intestinal parasites is intended both as a practical tool for the diagnosis of intestinal parasitic infections for laboratory and field workers and as a teaching aid for students and trainees.

The plates are arranged on two sides: the recto with microphotographs for the identification of eggs larvae trophozoites cysts and oocysts occurring in faeces and the verso dedicated to the different copromicroscopical methods (procedures) and main staining techniques used in parasitology. Special attention has been devoted to all graphical and pictorial contents. The decision to include the outline of an *Ascaris lumbricoides* egg in its relative size next to each parasitic structure fulfils the intention of visualizing the actual dimensions that the eye needs to be looking for when examining the specimens with a microscope. For each

image the size of the parasite and a short description are provided to assist in the microscopical identification. Two summary plates one for helminths and the other for protozoa are also included to provide a visual overview of the

different presentations of parasitic elements. The bench aids have been produced in a weatherproof plastic-sealed format that is robust and easy to use at the bench. They are recommended for use by all health workers engaged in the routine diagnosis of intestinal parasitic infections.
