Learning SAP  
BusinessObjects  
Dashboards Packt  
Publishing Ltd

"This book is a splendid  
and valuable addition to  
this subject. The whole  
book is well written and I

have no hesitation to  
recommend that this can  
be adapted as a textbook  
for graduate courses in  
Business Intelligence and  
Data Mining." Dr. Edi  
Shivaji, Des Moines, Iowa  
"As a complete novice to  
this area just starting out  
on a MBA course I found  
the book incredibly useful  
and very easy to follow

and understand. The  
concepts are clearly  
explained and make it an  
easy task to gain an  
understanding of the  
subject matter." -- Mr.  
Craig Domoney, South  
Africa. Business  
Intelligence and Data  
Mining is a conversational  
and informative book in  
the exploding area of

Business Analytics. Using this book, one can easily gain the intuition about the area, along with a solid toolset of major data mining techniques and platforms. This book can thus be gainfully used as a textbook for a college course. It is also short and accessible enough for a busy executive to become a quasi-expert in this area in a couple of hours. Every chapter begins with a case-let from the real world, and ends with a case study that runs across the chapters. Plunkett Research, Ltd.

Enterprise Information Systems (EIS) integrate and support business processes across functional boundaries in a supply chain environment, and have become increasingly popular over the last 15 years. In recent years, more and more enterprises world-wide have adopted EIS such as Enterprise Resource Planning (ERP) for running their

businesses. Previously, information systems such as CAD, CAM, MRPII and CRM were widely used for partial functional integration within a business organization. With global operation, global supply chain, and fierce competition in place, there is a need for suitable EIS such as ERP, E-Business or E-Commerce systems to integrate extended enterprises in a supply chain environment with the objective of achieving efficiency, competency, and competitiveness. As a

result, there is a growing demand for researching EIS to provide insights into challenges, issues, and solutions related to the design, implementation and management of EIS. The papers in *Advances in Enterprise Information Systems* were selected from two premier international conferences: the International Forum of Information Systems Frontiers—Xian International Symposium (IFISF), June 29-30, 2006, Xian, China and the IFIP TC 8.9 International

Conference on Research and Practical Issues of Enterprise Information Systems (Confenis 2007), October 14-16, Beijing, China. Both events provided an excellent opportunity for EIS academicians and practitioners in the world to gather and exchange ideas, and present original research in their fields. *Advances in Enterprise Information Systems* will be invaluable to scientists, researchers and professionals in EIS. **Plunkett's Engineering & Research Industry**
