Foreword by Chris Packham This beautiful book accompanies the photographic competition celebrating some of the best bird photography of the year. The Bird Photographer of the Year competition celebrates the artistry of bird photography, and this large-format book is lavishly illustrated to reflect this. A celebration of avian beauty and diversity, it is a tribute to both the dedication and passion of the photographers as well as a reflection of the quality of today's modern digital imaging systems. The book includes the winning and short-listed images from the competition, now in its second year, showcasing some of the finest bird photography, with a

foreword by BTO President and head judge, Chris Packham. A proportion of the profits from the book goes directly to the BTO to support their conservation work. The advent of digital technology has revolutionised photography in recent years, and the book brings to life some of the most stunning bird photography currently on offer. It features a vast variety of photographs by hardened pros, keen amateurs and hobbyists alike, reflecting the huge diversity of bird enthusiasts and nature lovers which is so important in ensuring their conservation and survival.

Fans of bird watching will rejoice with *Backyard Bird Photography*, a guide for learning how to set up your backyard in order to take the best photographs of your local birds. In addition to guiding you through the first steps of setting up your plantings and bird feeders, this book describes the types of photographic equipment you will need to get just the right image; how to maneuver yourself into just the right position to create a quality bird photograph; how to compose your shots for the greatest visual effect; and how to use more advanced techniques such as macro lenses and external flash techniques. Author and bird photographer Mathew Tekulsky breaks down the

challenges of photographing these beautiful creatures and explains how utilizing your own natural surroundings can create stunning shots that rival those shot in the wild. Tekulsky explains that when your garden is set up as a tiny oasis for these feathered friends—with the right foliage, water sources, and feeders—then your backyard will be frequented by a variety of species on any given day. With tips for gaining the bird's trust and composition, every photograph will come out a stunner.

Birds of prey spend most of their time in flight and, when viewed from the ground, they are notoriously hard to identify. Australian Birds of Prey in Flight is a photographic guide to the eagles, hawks, kites and falcons flying high above you. Individual species profiles describe distinguishing features and the text is supported by detailed images showing the birds at six different angles and poses, using photographs from many of Australia's leading bird photographers. Annotated multi-species comparison plates highlight key features that can help differentiate birds of prey in flight. This book will be of value to anyone who wants to learn more about Australia's birds of prey, and will provide a useful reference for identifying soaring birds in the field, and also while trying to identify images from your own camera.

An elegant collection of the best artwork and photography from the National Geographic archives depicting the magnificence of birds. Bird, nature, and art lovers alike will treasure this sumptuous visual celebration of the colors, forms, and behaviors of the winged wonders who share our world as they have been explored, displayed, and revealed throughout the years by National Geographic. The book moves chronologically so readers witness the tremendous growth in our knowledge of birds over the last 130 years, as well as the new frontiers in technology and observation--from luminous vintage paintings and classic black and white photographs to state-of-the-art high-speed and telephoto camera shots that reveal moments rarely seen and sights invisible to the human eye. The wide diversity of pictures captures beloved songbirds outside the kitchen window, theatrical courtship dance of birds of paradise, tender moments inside a tern's nest, or the vivid flash of a hummingbird's flight. Readers will delight in seeing iconic species from around the world through the eyes of acclaimed National Geographic wildlife photographers such as Chris Johns,

Frans Lanting, Joel Sartore, and Tim Laman and reading excerpted passages from Arthur A. Allen, Roger Tory Peterson, Douglas Chadwick, Jane Goodall, and other great explorers. Exquisitely produced and expertly curated, this visual treasury displays as never before the irresistible beauty, grace, and intelligence of our feathered friends.

Photography: Birds explains how to photograph birds--whether in your backyard or at a birding destination--detailing unique issues that confront photographers of all levels and providing the best guidance for capturing the beauty and splendor of our feathered friends. Gerrit Vyn, an award-winning bird photographer, videographer, and sound recorder, has become renowned for his ability to capture birds, especially for the prestigious Cornell Lab of Ornithology. In this new guide, he reveals his methods and shares how to photograph birds based on location, behavior, identification, and storytelling. Vyn details the range of technical considerations, giving clear instruction and advice, as well as the creative decisions a photographer must make on lighting, framing, timing, and motion. He also discusses situations unique to bird photographers: dealing with habituated or tame birds, approaching feeders, utilizing blinds, and more. Once captured, digital images can be digitally refined, so Vyn delves into the procedures that elevate an image

from mundane to striking, using Adobe Lightroom. Throughout, Vyn emphasizes an ethical approach to observing and interacting with the birds around us.

Winner of the 2011 Ka Palapala Po'okela Award of Excellence in Natural Science, Hawai'i Book Publishers Association Hawai'i is home to some of the most beautiful and sought after birds in the

world. From the offshore waters, where graceful seabirds glide on the cool, refreshing trade winds, to the lush ancient forests of the mountains, where colorful endemic honeycreepers reside, Hawai'i's birds are wonderfully diverse. Introduced species and long-distance migrants contribute to the splendid assortment. Some island bird species are extremely abundant and instantly familiar since we encounter them daily in our outdoor activities. Others are so rare they are glimpsed only once in a lifetime. In these magnificent islands there is something for birders of every sort. Superbly illustrated in color by the author and Jack Jeffrey, two of Hawai'i's best nature photographers, this guide includes nearly every species of bird on land and at sea in the main Hawaiian Islands. In total, 170 species or subspecies are described and illustrated. This comprehensive work is an essential resource for those who are interested in identifying, locating, and learning more about the avifauna of Hawai'i.
