Yo quisiera poder escribirles, Un poema tan largo como mi vida, Sin que la inspiración me faltara, La que proviene de más arriba... Mas estos poemas que he escrito, Con mi vida tienen poca relación, Y de alguna manera un cúmulo son, De las inquietudes de mi corazón. Yo no soy ni escritor, ni poeta, A pesar de que escribo poemas, Que no son de la norma a seguir, Ni ajustados a literatura concreta. Mas es éste, mi terco corazón, Que no se cansa de soñar y de cantar... ¿Y cómo esos sueños habría de perder, Si ellos son los que me invitan a vivir? Seguro mil errores aquí ha de haber, Y muchas reglas de escritura sin seguir, Y ni siquiera las medidas se tomaron, Por eso los poemas se descuadraron. Y como digo: aclaro que mis poemas, Son una antología de mi corazón, Y que sin haber nacido yo poeta, Me arriesgué a irrumpir en la vocación.

This handbook provides an exhaustive, one-stop reference and a state-of-the-art description of geographic information and its use. This new, substantially updated edition presents a complete and rigorous overview of the fundamentals, methods and applications of the multidisciplinary field of geographic information systems. Designed to be a useful and readable desk reference book, but also prepared in various electronic formats, this title allows fast yet comprehensive review and easy retrieval of essential reliable key information. The Springer Handbook of Geographic Information is divided into three parts. Part A, Basics and Computer Science, provides an overview on the fundamentals, including descriptions of databases and encoding of geographic information. It also covers the underlying mathematical and statistics methods and modeling. A new chapter exemplifies the emerging use and analysis of big data in a geographic context. Part B offers rigorous descriptions of gathering, processing and coding of geographic information in a standardized way to allow interoperable use in a variety of systems; from traditional methods such as geodesy and surveying to state-of-the-art remote sensing and photogrammetry; from cartography to geospatial web services. Discussions on geosemantic interoperability and security of open distributed geospatial information systems complete the comprehensive coverage. The final part describes a wide array of applications in science, industry and society at large, such as agriculture, defense, transportation, energy and utilities, health and human services. The part is enhanced by new chapters on smart cities and building information modeling, as well as a complete overview of the currently available open-source geographic information systems. Using standardized international terminology, in accordance with ISO/TC 211 and INSPIRE, this handbook facilitates collaboration between different disciplines and is a must have for practitioners and new comers in industry and academia.

A Comprehensive Review of Developing Environmentally Friendly Lubricants A push from environmentally savvy consumers along with recent changes in governmental regulations have paved the way for a marketplace of products with high levels of environmental performance. Fueled by the growing demand for biobased lubricants, *Environmentally Friendly and Biobased Lubricants* highlights the development of environmentally friendly additives that are compatible with environmental regulations and describes the approaches being used in this emerging area. Derived from research topics shared over the years at various technical sessions of the Society of Tribologists and Lubrication Engineers (STLE) Annual Meetings, the book includes a critical assessment of gaps and weaknesses in the field of environmentally friendly fluids and biobased lubricants. Each chapter is written by authors selected from the environmentally friendly fluids and biobased lubricants sessions of STLE and also incorporates input from prominent researchers invited to take part in the book. Expert contributors discuss the control, production, usage, and disposal of lubricants; factor in related policies, laws, and regulations around the world; and include case studies demonstrating the uses and values of commercially viable biobased lubricants. The book is divided into five sections that cover advanced environmentally friendly base oils and feedstocks, biobased hydraulic lubricants and biodegradability, chemically/enzymatically modified environmentally friendly base oils, vegetable oil-based environmentally friendly fluids, and additives for environmentally friendly fluids.

Web Design in a Nutshell Mohr Siebeck

This book examines whether international agreements between non-state actors can be identified as a source of international law using objective criteria. It asks whether, beyond Article 38 of the Statute of the International Court of Justice, there is a system of rules, processes, beliefs or semantics by which these agreements can be objectively identified as a source of international law. Departing from the more usual state-centric analysis, it adopts postmodern legal positivism as its analytical tool. This allows for the reality that international law-making takes place in subjective

social landscapes. To test the effectiveness of this approach, it is applied to agreements between petroleum agencies and corporations which allow two or more states to exploit disputed resources across boundaries looking in particular at arrangements involving China, Vietnam and the Philippines. By so doing it illustrates an alternative way that states can manage disputes, without having to resort to conflict. It will appeal to both scholars and practitioners of public international law, as well as civil servants.

The fast exchange of information and knowledge are the essential conditions for successful and effective research and practical applications in cartography. For successful research development, it is necessary to follow trends not only in this domain, but also try to adapt new trends and technologies from other areas. Trends in cartography are also quite often topics of many conferences which have the main aim to link research, education and application experts in cartography and GIS&T into one large platform. Such the right place for exchange and sharing of knowledge and skills was also the CARTOCON2014 conference, which took place in Olomouc, Czech Republic, in February 2014 and this book is a compilation of the best and most interesting contributions. The book content consists of four parts. The first part New approaches in map and atlas making collects studies about innovative ways in map production and atlases compilation. Following part of the book Progress in web cartography brings examples and tools for web map presentation. The third part Advanced methods in map use includes achievement of eye-tracking research and users' issues. The final part Cartography in practice and research is a clear evidence that cartography and maps played the significant role in many geosciences and in many branches of the society. Each individual paper is original and has its place in cartography.

Interim measures by courts as well as tribunals are often critical to succeed in arbitration proceedings and to effectively safeguard the rights of parties pending the final adjudication of their dispute. This important book comprises a comprehensive review of interim measures in international commercial arbitration granted by courts and tribunals across jurisdictions that have adopted the UNCITRAL Model Law to critically assess the practical fault lines in the Indian arbitration regime. The book provides an in-depth analysis of the following: all reported judgments of the Indian Supreme Court and the High Courts from 1993 to 2022 on issues concerning interim measures; practical

application of the UNCITRAL Model Law (and the revisions in 2006) by national arbitration statutes of over 80 jurisdictions with respect to interim measures; comparative practice and jurisprudence on interim measures in international commercial arbitration; rules of major arbitral institutions on the power and scope of interim measures granted by tribunals; detailed analysis of different types of interim measures, including anti-suit, anti-arbitration injunctions, security for costs, and interim measures in aid of foreign-seated arbitrations, the standards to be applied, and the burden of proof to be demonstrated for each type of measure; and issues of enforcement of interim measures in domestic, international, and foreign seated arbitrations. The current position of law in India and the problems plaguing the country's Arbitration and Conciliation Act 1996 (IAA), as amended in 2015 with respect to interim measures, are brought into direct comparison with other Model Law jurisdictions, offering an analysis of case laws, practical insights and cogent suggestions based on best practices that can be adopted by parties and tribunals. The Appendices provide a detailed list of statutory provisions of countries that have adopted the Model Law along with rules of major arbitral institutions on interim measures. The author not only describes the current position of law in India and other Model Law jurisdictions on interim measures but also reveals a comprehensive understanding of the requests for interim measures, and their enforcement in domestic, international, and foreign seated arbitrations. This book engages in a comprehensive and clear discussion on the fine line between court assistance and court intervention, especially in the case of interim measures and suggests draft provisions that India and other jurisdictions can adopt in order to align with the 2006 revisions to the Model Law to foster certainty, predictability, and efficiency in case of interim measures in international commercial arbitration.

Die Aktiengesellschaft soll private Ersparnisse in dauerhaft gebundenes, unternehmerisches Anlagekapital transformieren. Zugleich erlaubt die Börsennotierung eine beliebig kurzfristige Anlage in unternehmenstragende Gesellschaften. Vor diesem Hintergrund bestehen in Rechtswissenschaft, Ökonomie und Politik seit langem große Sorgen, dass die moderne kapitalmarktorientierte Aktiengesellschaft unter ein schädliches Diktat kurzfristiger Einflüsse gerät. Eckart Bueren leuchtet diese wechselhafte Kontroverse um kurzfristige Orientierung und damit um den Schutz der Funktionsfähigkeit der Aktiengesellschaft erstmals gesamthaft rechts- und ideengeschichtlich, rechtsvergleichend und rechtsökonomisch aus. Er erzählt damit die Rezeptionsgeschichte eines international wirkmächtigen Regelungstopos im Gesellschafts- und Kapitalmarktrecht. Welche Entwicklung hat er durchlaufen, für welche Rechtsfragen, Regelungsanliegen und Interessen wurde er zu verschiedenen Zeiten dienstbar gemacht und wie bedeutsam ist er heute? Die Arbeit wurde mit dem Förderpreis der Stiftung Kapitalmarktforschung für den Finanzstandort Deutschland ausgezeichnet.

At last a history that explains how indigenous dispossession and survival underlay and shaped the birth of Australian democracy. The legacy of seizing a continent and alternately destroying and governing its original people shaped how white Australians came to see themselves as independent citizens. It also shows how shifting wider imperial and colonial politics influenced the treatment of indigenous Australians, and how indigenous people began to engage in their own ways with these new political institutions. It is, essentially, a bringing together of two histories that have hitherto been told separately: one concerns the arrival of early democracy in the Australian colonies, as white settlers moved from the shame and restrictions of the penal era to a new and freer society with their own institutions of government; the other is the tragedy of indigenous dispossession and displacement, with its frontier violence, poverty, disease and enforced regimes of mission life.

Banning Black Gods is a global examination of the legal challenges faced by adherents of the most widely practiced African-derived religions in the twenty-first century, including Santeria/Lucumi, Haitian Vodou, Candomblé, Palo Mayombe, Umbanda, Islam, Rastafari, Obeah, and Voodoo.

Examining court cases, laws, human rights reports, and related materials, Danielle N. Boaz argues that restrictions on African diaspora religious freedom constitute a unique and pervasive form of anti-Black discrimination. Emphasizing that these twenty-first-century cases and controversies are not a new phenomenon but rather a reemergence of colonial-era ideologies and patterns of racially motivated persecution, Boaz focuses each chapter on a particular challenge to Black religious freedom. She examines issues such as violence against devotees, restrictions on the ritual slaughter of animals, limitations on the custodial rights of parents, and judicial refusals to recognize these faiths as protected religions. Boaz introduces new issues that have never been considered as a question of religious freedom before—such as the right of Palo Mayombe devotees to possess remains of the dead—and she brings together controversies that have not been previously regarded as analogous, such as the right to wear headscarves and the right to wear dreadlocks in schools. Framing these issues in comparative perspective and focusing on transnational and transregional issues, Boaz advances our understanding of the larger human rights disputes that country-specific studies can overlook. Original and compelling, this important new book will be welcomed by students and scholars of African diaspora religions and discerning readers interested in learning more about the history of racial discrimination

By adopting a multi-disciplinary approach, this book provides a comprehensive analysis of the legality of the use of autonomous weapons systems under international law. It examines different arguments presented by States, roboticists and scholars to demonstrate the challenges such systems will create for the laws of war. This study examines how technology of warfare seeks to increase the dissociation of risk and communication between weapons and their human operators. Furthermore, it explains how algorithms might give rise to 'errors' on the battlefield that cannot be directly attributed to human operators. Against this backdrop, Dr Seixas-Nunes examines three distinct legal frameworks: the distinction between the legality of weapons and the laws of targeting; different mechanisms of individual accountability and the importance of recovering the category of 'dolus eventualis' for programmers and technicians and, finally, State responsibility for violations of the laws of war caused by weapons' software errors.
