|Owners edition. This  
Owners Edition -  
Workshop Manual  
covers the following  
Mercedes-Benz Vito  
and V-Class petrol and  
diesel powered  
vehicles spanning  
model years 2000 to  
2003. The petrol model  
113 with 130 b.h.p.  
engine (type 111) and  
the three diesel models  
108 CDI, 110 CDI and  
112 CDI, all fitted with  
the latest common rail  
2.2 litre diesel engines.

Depending on the  
version, the power  
units have outputs of  
82 b.h.p., 102 b.h.p.  
and 122 b.h.p.  
respectively. In  
Sections 0 and 1 can  
be found further details  
of the various models  
and engines dealt with  
here. This manual has  
been written for the  
practical owner who  
wants to maintain their  
vehicle in first-class  
condition and carry out  
the bulk of their own  
servicing and repairs.  
Comprehensive step-  
by-step instructions are  
provided for service  
and overhaul  
operations to guide the  
reader through what  
might otherwise be  
unfamiliar and  
complicated tasks and  
hundreds of  
illustrations are  
included to amplify the  
text. With the aid of  
this manual, many

aspects of service, overhaul and repair are within the scope of an owner with a reasonable degree of mechanical aptitude. Some operations however demand more skill. Other jobs require the use of special tools and in some cases, testing facilities and techniques that are not generally available. Only you can judge whether a job is within your capabilities. We do however try to assist the reader to come to an informed decision. Whilst every effort has been made to ensure that the information provided is correct, it is obviously not possible to guarantee complete freedom from errors or omissions. Information to be found in the driver's handbook is not necessarily

duplicated here and it is not possible within this volume to cover every aspect to be found in the manufacturer's own workshop manual which is of much greater size and complexity. However, it should be consulted if more detailed information is needed. Always remember that you are responsible for your own safety and that of others when working with you on a vehicle. Take particular care with safety-related systems like the brakes and steering and seek professional advice if in any doubt. Never work under a vehicle unless it is properly supported (a single jack is not enough). Take care with power tools, also regard as potentially harmful fuel,

lubricants, solvents and sealers which should always be stored in labelled, sealed containers. Always obtain your spare parts from an officially appointed Mercedes-Benz dealer. With care and common sense, the practical owner can make an excellent job of maintenance and overhaul. The benefits include money saved and the satisfaction of work well done. You will be adding to your knowledge too, knowing more about the vehicle you own will help you to make logical decisions about what needs to be done, even if it does in some instances have to go into a professional repair shop. The Mercedes-Benz Vito and V-Class vehicles are built with care and

precision. With regular care and maintenance they will provide long, reliable and faithful service.
