Future economic growth lies in the value of experiences and transformations--good and services are no longer enough. We are on the threshold, say authors Pine and Gilmore, of the Experience Economy, a new economic era in which all businesses must orchestrate memorable events for their customers. The Experience Economy offers a creative, highly original, and yet eminently practical strategy for companies to script and stage the experiences that will transform the value of what they produce. From America Online to Walt Disney, the authors draw from a rich and varied mix of examples that showcase businesses in the midst of creating personal experiences for both consumers and businesses. The authors urge managers to look beyond traditional pricing factors like time and cost, and consider charging for the value of the transformation that an experience offers. Goods and services, say Pine and Gilmore, are no longer enough. Experiences and transformations are the

basis for future economic growth, and The Experience Economy is the script from which managers can begin to direct their own transformations.

Once called the “dismal science,” economics now offers prescriptions for improving people’s happiness. In this book Richard Easterlin, the “father of happiness economics,” draws on a half-century of his own research and that conducted by fellow economists and psychologists to answer in plain language questions like: Can happiness be measured? Will more money make me happier? What about finding a partner? Getting married? Having a baby? More exercise? Does religion help? Who is happier—women or men, young or old, rich or poor? How does happiness change as we go through different stages of life? Public policy is also in the mix: Can the government increase people’s happiness? Should the government increase their happiness? Which countries are the happiest and why? Does a country need to be rich to be

happy? Does economic growth improve the human lot? Some of the answers are surprising (no, more money won’t do the trick; neither will economic growth; babies are a mixed blessing!), but they are all based on reason and well-vetted evidence from the fields of economics and psychology. In closing, Easterlin traces the genesis of the ongoing “Happiness Revolution” and considers its implications for people’s lives down the road.

Economics for the IB Diploma: Quantitative Skills Workbook

Cambridge University Press

An exciting series that covers selected topics from the Higher Level options in the IB History syllabus. This coursebook covers Higher Level option 3, Topic 10, The Cold War and the Americas 1945-81. The text is divided into clear sections following the IB syllabus structure and content specifications. It offers a sound historical account along with detailed explanations and analysis, and an emphasis on historical debate to prepare students for the in-depth, extended essay required in the Paper 3 examination. It also

provides plenty of exam practice including student answers with examiner's comments, simplified mark schemes and practical advice on approaching the Paper 3 examination.
