Hysteria, Perversion, and Paranoia in "The Canterbury Tales" John Murray

The Cambridge History of American Poetry offers a comprehensive exploration of the development of American poetic traditions from their beginnings until the end of the twentieth century. Bringing together the insights of fifty distinguished scholars, this literary history emphasizes the complex roles that poetry has played in American cultural and intellectual life, detailing the variety of ways in which both public and private forms of poetry have met the needs of different communities at different times. The Cambridge History of American Poetry recognizes the existence of multiple traditions and a dramatically fluid canon, providing current perspectives on both major authors and a number of representative figures whose work embodies the diversity of America's democratic traditions.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Beginning with the spectacle of hysteria, moving through the perversions of fetishism, masochism, and sadism, and ending with paranoia and psychosis, this book explores the ways that conflicts with the Oedipal law erupt on the body and in language in Chaucer's Canterbury Tales, for Chaucer's tales are rife with issues of mastery and control that emerge as conflicts not only between authority and experience but also between power and knowledge, word and flesh, rule books and reason, man and woman, same and other - conflicts that erupt in a macabre sprawl of broken bones, dismembered bodies, cut throats, and decapitations. Like the macabre sprawl of conflict in the Canterbury Tales, this book brings together a number of conflicting modes of thinking and writing through the surprising and perhaps disconcerting use of "shadow" chapters that speak to or against the four "central" chapters, creating both dialogue and interruption.

From the mid-nineteenth century on, America and Japan were caught in an extraordinary political, military and economic duel. This clash was characterised by a cultural incompatibility that was to haunt the negotiations of their two leaders, Emperor Hirohito and General MacArthur. Hirohito was a remarkable man. Diffident, uncharismatic and apparently obtuse, he survived as god-ruler of Japan for six decades through internal strife, war, defeat, occupation and economic victory. But Hirohito met his equal in MacArthur. Brash and domineering, MacArthur merited the honorary Japanese epithet shogun or 'army leader' for his almost single-handed six year rule over Japan. In this absorbing dual biography Robert Harvey traces their tense and complex relationship. His broad scope encompasses two great nations in war and peace - a momentous period of history which provides illuminating insight into American actions across the world today.

David Bordwell's new book is at once a history of film criticism, an analysis of how critics interpret film, and a proposal for an alternative program for film studies. It is an anatomy of film criticism meant to reset the agenda for film scholarship. As such *Making Meaning* should be a landmark book, a focus for debate from which future film study will evolve. Bordwell systematically maps different strategies for interpreting films and making meaning, illustrating his points with a vast array of examples from Western film criticism. Following an introductory chapter that sets out the terms and scope of the argument, Bordwell goes on to show how critical institutions constrain and contain the very practices they promote, and how the interpretation of texts has become a central preoccupation of the humanities. He gives lucid accounts of the development of film criticism in France, Britain, and the United States since World War II; analyzes this development through two important types of criticism, thematic-explicatory and symptomatic; and shows that both types, usually seen as antithetical, in fact have much in common. These diverse and even warring schools of criticism share conventional, rhetorical, and problem-solving techniques--a point that has broad-ranging implications for the way critics practice their art. The book concludes with a survey of the alternatives to criticism based on interpretation and, finally, with the proposal that a historical poetics of cinema offers the most fruitful framework for film analysis.

Derek Walcott's *Omeros* is a poem in five books, of circular narrative design, titled with the Greek name for Homer, which simultaneously charts two currents of history: the visible history charted in events -- the tribal losses of the American Indian, the tragedy of African enslavement -- and the interior, unwritten epic fashioned from the suffering of the individual in exile.
