An egotistical royal cat and his dung beetle sidekick track a jewelry thief in this hilarious new series set in ancient Egypt. Nominated for an Edgar Award! Can a lazy cat and a dung-obsessed beetle really crack a mystery? Ra relishes his role as the Pharaoh's beloved—and spoiled—cat. So when an amulet goes missing from the palace, Ra plans to keep enjoying his snacks and nap in the sun. But Ra's friend Khepri, a wise and industrious scarab beetle, insists on investigating in order to save the young servant girl who has been

framed for the crime. Once Ra gets going, he decides that being a Great Detective isn't so bad; in fact, he doesn't mind being hailed as "Protector of the Weak and Defender of Justice." The comically mismatched duo is on the case! Wacky illustrations with fun historical details bring these oddball characters to life. Includes a glossary, pronunciation guide, and detailed author's note. "An ingenious mystery full of entertaining details for fans of ancient Egypt."—Paula Harrison, author of the Rescue Princesses series

Casual stargazers are familiar with many classical figures and asterisms composed of bright stars (e.g., Orion and the Plough), but this book reveals not just the constellations of today but those of yesteryear. The history of the human identification of constellations among the stars is explored through the stories of some influential celestial cartographers whose works determined whether new inventions survived. The history of how the modern set of 88 constellations was defined by the professional astronomy community is recounted, explaining how the constellations described in the book became permanently "extinct." Dr. Barentine addresses why some figures were tried and discarded, and also

directs observers to how those figures can still be picked out on a clear night if one knows where to look. These lost constellations are described in great detail using historical references, enabling observers to rediscover them on their own surveys of the sky. Treatment of the obsolete constellations as extant features of the night sky adds a new dimension to stargazing that merges history with the accessibility and immediacy of the night sky.

 "Beetles are incredibly diverse, with over 23,000 named species in the United States alone. They take on all hues, shapes, and sizes, from the iridescent green of the Western Cedar Borer to the

striking red of the Rose Curculio. They can also be found in a wide range of habitats, from cold mountain streams to scorching deserts. Similar to its eastern counterpart, Beetles of Eastern North America, this book is a comprehensive guide to the beetles of the US and Canada that can be found west of the Continental Divide. It covers over 1,400 species across 130 different families. The book begins with a general introduction to beetles, with sections on morphology, behavior and natural history, and conservation, as well as information on how to find and photograph beetles. After the introduction, there is an illustrated key to common beetle families. The family descriptions include information on natural history, collection, identification,

common genera and species, and similar families"--

"My heart is afraid that it will have to suffer," the boy told the alchemist one night as they looked up at the moonless sky." Tell your heart that the fear of suffering is worse than the suffering itself. And that no heart has ever suffered when it goes in search of its dreams." Every few decades a book is published that changes the lives of its readers forever. The Alchemist is such a book. With over a million and a half copies sold around the world, The Alchemist has already established itself as a modern classic, universally

admired. Paulo Coelho's charming fable, now available in English for the first time, will enchant and inspire an even wider audience of readers for generations to come. The Alchemist is the magical story of Santiago, an Andalusian shepherd boy who yearns to travel in search of a worldly treasure as extravagant as any ever found. From his home in Spain he journeys to the markets of Tangiers and across the Egyptian desert to a fateful encounter with the alchemist. The story of the treasures Santiago finds along the way teaches us, as only a few stories have done, about the essential wisdom of listening to our hearts, learning to read the omens strewn along life's path, and, above all, following our dreams.

The Academy - Tempest Arcato Publishing

At seven years old, Martin Booth found himself with all of Hong Kong at his feet. His father was posted there in 1952, and this memoir is his telling of that youth, a time when he had access to the corners of a colony normally closed to a "Gweilo," a "pale fellow" like him. His experiences were colorful and vast. Befriending rickshaw coolies and local stallholders, he learned Cantonese,

sampled delicacies such as boiled water beetles and one-hundred-year-old eggs, and participated in vibrant festivals. He even entered the forbidden Kowloon Walled City, wandered into a secret lair of Triads, and visited an opium den. From the plink-plonk man with his dancing monkey to the Queen of Kowloon (a crazed tramp who may have been a Romanov), Martin Booth saw it all---but his memoir illustrates the deeper challenges he faced in his warring parents: a broad-minded mother who embraced all things Chinese and a bigoted father who was enraged by his family's interest in "going native." Martin Booth's compelling memoir, the last book he completed before dying, glows with infectious curiosity and humor and is an intimate representation of the now

extinct time and place of his growing up. The Crypt Thief CreateSpace
