Written with passion for anyone interested in seeing an end to the illegal trade in elephant ivory and rhino horn, this book shows how, by working together, people all over the world who care about these animals are gradually bringing about change for the better. It takes an overview of how the current situation came to pass by exploring poaching and its devastating consequences and the pivotal role of organized crime. The discussion of how matters are starting to improve covers the investigation and monitoring of ivory markets, sustainable uses and the key role of local communities. Enforcement of the law is vital in this story. Enter the enforcers, the technology they use to defeat the poachers and the evidence they require to prosecute offenders. Cases, some deeply shocking, are included, as well as a number of fascinating case studies, while the exploits of organized crime gangs make lively, as well as disturbing reading. Throughout the message is clear. We can and must save these animals from extinction.

 Die Vereinten Nationen (VN) sind ein zentrales Forum für die Außenpolitik der Europäischen Union (EU). Wie komplex die Mitwirkung der EU als überstaatliches Gebilde in den Gremien der VN ist, wird häufig unterschätzt. Der Autor unterzieht das Geflecht der europa- und völkerrechtlichen Regelungen einer systematischen Analyse und untersucht dabei auch die institutionelle Praxis. Er erklärt, inwieweit die EU im VN-System als rechtlich-institutioneller Akteur auftritt und welche neuen Perspektiven sich hinsichtlich des Vertrags von Lissabon eröffnen.

 International dispute settlement plays a fundamental role in maintaining the fabric of the international legal order, reflecting the desire of States, and increasingly non-State actors, to resolve their differences through international dispute procedures and other legal mechanisms. This edited collection focuses upon the growth and complexity of such legal methods, which includes judicial settlement (courts and tribunals), arbitration and other legal (or what might be termed 'extra-legal') means (international organisations, committees, inspection panels, and ombudsmen). In this important collection, such mechanisms are compared and evaluated side-by-side to provide, in one volume, a detailed and analytical account of the current framework. Ranging from key

conceptual issues of proliferation of legal mechanisms and the associated risks of fragmentation through to innovations in dispute settlement mechanisms in many topical areas of international law, including international trade law, collective security law and regional law, this collection, written by leading international lawyers, provides a major study in the ongoing trends and emerging problems in this crucial area of international law. This edited collection is published to mark the retirement of Professor John Merrills, Emeritus Professor of International Law, University of Sheffield, who has written widely on international law and human rights law, but is probably best known for his work on the settlement of international disputes, evidenced by the enduring appeal of his leading text *International Dispute Settlement*, now in its fourth edition.

A wealth of information and analysis on the environmental forces that have helped shaped the cultures of the African continent. A

scholarly reference work that will also appeal to the general reader, Sub-Saharan Africa sets the story of the African environment within the context of geological time and shows how the continent's often harsh conditions prompted humans to develop unique skills in agriculture, animal husbandry, and environmental management. Part of ABC-CLIO's Nature and Human Societies series, this book enables readers to better grasp the extent of humanity's effect on our world. Of particular interest are the book's sections dealing with the impact of the Biafran famine of the 1960s, the Sahelian drought of the 1970s, population growth, and the ongoing challenges of war and HIV/AIDS. Crucially, the book also shows how, despite their relative poverty, many African states have coped admirably with rapid urbanization and have developed world-class conservation and sustainability programs in order to protect and harness some of the most endangered species in the world.

During the founding of North Korea, competing visions of an ideal modern state proliferated. Independence and democracy were touted by all, but plans for the future of North Korea differed in their ideas about how everyday life should be organized. Daily life came under scrutiny as the primary arena for social change in public and private life. In *Everyday Life in the North Korean Revolution, 1945-1950*, Kim examines the revolutionary events that shaped people's lives in the development of the Democratic People's Republic of Korea. By shifting the historical focus from the state and the Great Leader to how villagers experienced social revolution, Kim offers new insights into why North Korea insists on setting its own course. Kim's innovative use of documents seized by U.S. military forces during the Korean War and now stored in the National Archives—personnel files, autobiographies, minutes of organizational meetings, educational materials, women's magazines, and court documents—together with oral histories allows her to present the first social history of North Korea during its formative years. In an account that makes clear the leading role of women in these efforts, Kim examines how villagers experienced, understood, and later remembered such events as the first land reform and modern elections in Korea's history, as well as practices in literacy schools, communal halls, mass organizations, and study sessions that transformed daily routine.

Russia is a huge storehouse of natural resources, including oil, gas, and other energy sources, which she can trade with the rest of the world for advanced technology and wheat. In this book, leading experts evaluate the Soviet potential in major energy and industrial raw materials, giving special attention to implications for the world economy to the end of the twentieth century. The authors examine the mineral and forest resources that the Soviet Union has developed and may yet develop to provide exports during the 1980s. They discuss the regional dimension of these resources, especially in Siberia and the Soviet Far East; individual mineral raw materials, such as petroleum, natural gas, timber, iron ore, manganese, and gold; and finally the role of raw materials in Soviet foreign trade. The authors, representing the United States, Canada, and Great Britain, are primarily geographers, but they include economists, political scientists, and a geologist. Their work is based on primary sources (for most of these reports, current information is no longer being released to researchers) and on interviews with Soviet officials.

Der Rechtsprechungskonflikt zwischen dem BVerfG und dem EGMR ist durch den einfachgesetzlichen Rang der EMRK sowie durch die Ablehnung der Wirkung der Entscheidungen des EGMR über den entschiedenen Fall hinaus in der innerdeutschen Rechtsprechung geprägt. In der vorliegenden Arbeit wird eine Rangerhöhung der EMRK sowie eine Verpflichtung zur Befolgung der EGMR durch eine entsprechende Gesetzesänderung vorgeschlagen, um eine Subsidiarität gegenüber dem EGMR als Kontrollinstanz zu erreichen und eine völkerrechtliche Pflichtverletzung nach Art. 46 Abs. 1 EMRK zu vermeiden.
