Again, this is a case where your new accessory came with a wiring harness of some kind. Take a moment to inspect it to be sure that it is truly ready to install, rather than get in the vehicle and start wiring it up only to find out that: Some or all of the wires are not long enough. How to Build a Wiring Harness - Muscle Car DIY Create wires Use Create Wire to create a wire between two pins within a harness assembly. The pins can exist on electrical components (connectors)

or splices. The wire that is created is selected from the Cable & Harness Library. The wire is created as rendered or centerline and with or without natural curvature depending on the selected display setting. Creating a Harness Layout in Arcadia When purchasing wires to use for a custom trailer wiring harness, you have to ensure your cables can withstand fire, abrasion, vibrations, corrosion and extreme temperatures. One way to ensure this is by getting heat-shrink collars galvanized wire clips to make the wires firm and straps to pack the cables together. Wiring Harness: The Ultimate Custom Guide Modeling a wire harness in NX enables you

to create it in context, so the harness model can update automatically with any assembly changes.
