Academic libraries are facing uncertain times. The international higher education environment is very volatile and academic libraries and librarians can play a major role in helping to strategically position their parent institution within it. In doing so, there needs to be clarity as to what the position of the academic library is with regard to the role and function it has within the university and how library leadership can have pan-institutional influence and impact. There are several ways in which the academic library can position itself and this collection demonstrates many of these. Strategic alignment with the university and its mission is a fundamental part of successful positioning, as is being flexible, adaptable and responsive to changing needs, requirements and expectations. Developments in research support and scholarly communications, as well as super-convergences with other academic support departments, are examples of such responsiveness. These topics along with other emerging themes, such as library functions and institutional partnerships and collaborations, are all discussed in the book and provide the reader with a rich variety of reflections and case studies on how academic libraries, from across the globe, have addressed their position within their institution. This book was originally published as a special issue of the journal *New Review of Academic Librarianship*.

This book critically examines various facets of conflicts involving people and the state arising due to the uneven distribution of natural resources. It provides an overview of the people's movements in Odisha, a resource-rich state in eastern India. Reflecting on the conceptual frameworks of conflict, it analyses violence, and struggle for rights over resources, and public policies around natural resources, alongside local strategies and governance. Drawing from extensive field surveys in the villages of Kalahandi and undivided Koraput districts in Odisha, this volume explores the sociopolitical and economical aspects of people's movements instead of solely viewing them as political and security threats. The authors demonstrate the misappropriations of these movements by both the state and non-state actors for their vested interests. This book offers recommendations for policymakers to draw up a more ready response to mitigate and minimize the conflict and violence and implement equitable policies around land and resources. While doing so, the book also provides some primers to development perspectives, the role of natural resources and conditions under which the natural resources can result in conflict, and principles and practices to overcome such conflicts. The volume will be an indispensable read for researchers and students of social history, social reform, tribal and indigenous studies, postcolonial studies, exclusion studies, development studies, political sociology, and South Asian studies.

Ciottone's Disaster Medicine - E-Book Routledge

In Chinese societies where both "money" and "gender" confer power, can a woman's economic success relative to her husband's bring about a more equal division of household labor? Lui's qualitative study of "status-reversed" Hong Kong families, wherein wives earn more than their husbands, examines how couples re-negotiate household labor in ways that perpetuate male dominance within the family even when the traditional gender expectation that "men rule outside, women rule inside" (nanzhuwai, nuzhunei) is challenged. Going beyond the dyadic negotiation of household labor, this important study also explores the role of "third parties," namely the couples' children and parents, who actively encourage couples to conform to traditional gender norms, thereby reproducing an unequal division of household labor. Based upon the experiences of families with stay-at-home dads, Lui further identifies a new mechanism of deconstructing gender, by which couples concertedly construct new norms of "work" and "gender" that they maintain through daily interactions to fit their atypical relative earnings. As a result, there are sparks of hope that both men and women can be liberated from a set of traditional social norms. Re-negotiating Gender: Household Division of Labor When She Earns More than He Does is essential reading in the fields of family and gender studies, sociology, psychology, and East Asian studies.

Wales (United Kingdom) considers the development of schools as learning organisations as vital for supporting schools to put its new, 21st century curriculum into practice. A growing body of research evidence shows that schools that operate as learning organisations can react more quickly to changing external environments and embrace changes and innovations. This report aims to support Wales in this effort, gauging the extent to which

schools have put into practice the characteristics of learning organisations and identifying areas for further development. It also examines the system-level conditions that can enable or hinder schools in Wales in developing as learning organisations. It offers a number of concrete recommendations for consideration by the Welsh Government and other stakeholders at various levels of the system. The report will be valuable not only for Wales, but also to the many countries that are looking to establish collaborative learning cultures across their school systems.

The Routledge Handbook on American Prisons is an authoritative volume that provides an overview of the state of U.S. prisons and synthesizes the research on the many facets of the prison system. The United States is exceptional in its use of incarceration as punishment. It not only has the largest prison population in the world, but also the highest per-capita incarceration rate. Research and debate about mass incarceration continues to grow, with mounting bipartisan agreement on the need for criminal justice reform. Divided into four sections (Prisons: Security, Operations and Administration; Types of Offenders and Populations; Living and Dying in Prison; and Release, Reentry, and Reform), the volume explores the key issues fundamental to understanding the U.S. prison system, including the characteristics of facilities; inmate risk assessment and classification, prison administration and employment, for-profit prisons, special populations, overcrowding, prison health care, prison violence, the special circumstances of death row prisoners, collateral consequences of incarceration, prison programming, and parole. The final section examines reform efforts and ideas, and offers suggestions for future research and attention. With contributions from leading correctional scholars, this book is a valuable resource for scholars with an interest in U.S. prisons and the issues surrounding them. It is structured to serve scholars and graduate students studying corrections, penology, institutional corrections, and other related topics.

Post-Communist Parliaments Rowman & Littlefield

This study represents the first systematic attempt to explore the functioning of the policing and criminal justice system in post-devolution Wales. Its particular relevance is underscored by the revelation that Wales has the highest imprisonment rate in western Europe. Drawing on official data as well as extensive interviews with senior figures, this book represents the first systematic exploration of the operation of the justice system in Wales across the jagged edge of devolved and non-devolved functions. There remains little understanding of how the justice system operates in the anomalous circumstances of post-devolution Wales. This book aims to fill this gap in understanding and concludes with an assessment of the proposals of the Commission on Justice in Wales for reform.

Routledge Handbook on American Prisons Routledge

In *Constitutional Culture, Independence, and Rights*, Javier García Oliva and Helen Hall coin the term "constitutional culture" to encapsulate the collective rules and expectations that govern the collective life within a jurisdiction. Significantly, these shared norms have both legal and social elements, including matters as diverse as standards of parenting, the modus operandi of police officers, and taboos around sexuality. Using Quebec, Scotland, and Catalonia as case studies, the book delves into what these constitutional battles mean for the rights, identity, and needs of everyday people, and it powerfully demonstrates why the hypothetical future independence of these regions would have far-reaching practical consequences, beyond the realm of political structures and academic theory. The book does not present a magic bullet to resolve debates around independence – this is not its purpose, and the text in fact demonstrates why there is no objectively optimal approach in any or all contexts. Instead, it seeks to shed light on aspects of these situations often overlooked in discussions around the fate of nations, and it addresses what the consequences of constitutional paradigm shifts might be for individuals. Constitutional culture is a complex web of interconnected understandings and behaviours, and the vibrations from shaking or cutting a fundamental strand will be felt throughout the structure.
