MasterPass Series This summary of the entire MRCPsych Part 1 syllabus uses identical sections and subsections to the actual syllabus with an additional section on how to tackle the examination. The MRCPsych Part 1 examination consists of a written part and a clinical part. The syllabus for the written part includes several different areas in basic sciences (eg. Psychology psychopharmacology and psychopathology) which few trainees would have covered in any detail as undergraduates. The book is essential for candidates for the MRCPsych Part 1 examination but medical students and medical students and mental health nurses may also find it useful. For more information on other titles in this series please click here For more information on 123Doc courses for Junior Doctors please click here

Examination Notes in Psychiatry 4th Edition Radcliffe Publishing

This collection of 'one-best-item-from-five' style multiple choice questions mirrors the new format for the exam. Its companion volume Extended Matching Items for the MRCPsych Examinations Part 1 by Michael Reilly and Bangaru Raju remains relevant for the new format where EMIs make up one third of the questions.

Revision Notes in Psychiatry Brush Education

Rutter's Child and Adolescent Psychiatry is the leading textbook in its field. Both interdisciplinary and international, it provides a coherent appraisal of the current state of the field to help researchers, trainees and practicing clinicians in their daily work. Integrating science and clinical practice, it is a comprehensive reference for all aspects of child and adolescent psychiatry. New to this full color edition are expanded coverage on classification, including the newly revised Diagnostic and Statistical Manual of Mental Disorders (DSM-5), and new chapters on systems neuroscience, relationship-based treatments, resilience, global psychiatry, and infant mental health. From an international team of expert editors and contributors, this sixth edition is essential reading for all professionals working and learning in the fields of child and adolescent mental health and developmental psychopathology as well as for clinicians working in primary care and pediatric settings. Michael Rutter has contributed a number of new chapters and a Foreword for this edition: "I greatly welcome this new edition as providing both a continuity with the past and a substantial new look." —Professor Sir Michael Rutter, extract from Foreword. Reviews of previous editions: "This book is by far the best textbook of Child & Adolescent Psychiatry written to date." —Dr Judith Rapoport, NIH "The editors and the authors are to be congratulated for providing us with such a high standard for a textbook on modern child psychiatry. I strongly recommend this book to every child psychiatrist who wants a reliable, up-to-date, comprehensive, informative and very useful textbook. To my mind this is the best book of its kind available today." —Journal of Child Psychology and Psychiatry

Radcliffe Publishing

The first comprehensive psychiatry review textbook, designed expressly for the Canadian market, Psychiatry Review and Canadian Certification Exam Preparation Guide is the resource residents and psychiatrists need to master the qualifying examinations in psychiatry of the Royal College of Physicians and Surgeons of Canada. These exams are required for certification both for graduating residents and most foreign-trained psychiatrists seeking to practice in Canada. This new volume, based on The American Psychiatric Publishing Board Review Guide for Psychiatry, has been carefully edited to include only material relevant to the Canadian exam. References have been taken from both the U.S. and Canadian psychiatric literature, and laboratory units, medication names and doses, and the language used have been edited to be consistent with Canadian psychiatry. The

volume takes the reader from the basic sciences comprising the foundation of psychiatry, through the psychiatric interview and other diagnostic topics, to syndrome-specific chapters paralleling DSM-IV-TR, and finally to current treatment options. Rounding out the review is a 200-question practice exam that reflects the structure of the actual board examinations. Although no substitute for quality medical and residency training, Psychiatry Review and Canadian Certification Exam Preparation Guide will help the prospective exam-taker ameliorate weaknesses and enhance strengths in preparation for a successful exam experience.

Examination Notes in Psychiatry - Basic Sciences 2Ed Examination Notes in Psychiatry - Basic Sciences

Over the last 20 years, Examination Notes in Psychiatry has become one of the leading texts for trainee psychiatrists. The 4th edition maintains the core of valuable information that is required by any would-be psychiatrist, but has been completely revised and updated. Assessment and diagnosis form the foundation to each section, but are now enhanced by the inclusion of treatment algorithms and evidence based medicine. Changes to the nomenclature have been made to reflect current practice. The fully revised reading lists lead the reader to the latest papers and publications, and a glossary of relevant websites will provide even further resources - whether during the revision process, or for the professional requiring a rapid reference between consultations. The sheer volume of essential information, provided in a structured, focused format, makes Examination Notes in Psychiatry 4e essential reading for trainees, psychiatrists, and mental health professionals alike.

Essential Notes in Psychiatry CRC Press

The MRCPsych examinations, conducted by the Royal College of Psychiatrists, are the most important exams for psychiatric trainees to achieve specialist accreditation. Written by authors with recent exam success and edited by the distinguished team behind Revision Notes in Psychiatry, Get Through MRCPsych Paper B: Mock Examination Papers provides candidates with the most realistic and up-to-date MCQ and EMIs, closely matched to themes appearing most often in the Paper B exam.

[Examination Notes in Psychiatry - Basic Sciences 2Ed](#) John Wiley & Sons

Research in neuroscience is revolutionizing how we think about psychiatric diagnosis and treatment. Psychiatric disorders reflect dysfunction of the human mind and involve changes in cognition, emotion, and motivation. Understanding how the neural networks that underlie these mental functions become dysfunctional holds great promise for devising innovative approaches to diagnosis and treatment. Scientific progress is being driven, in part, by advances in human functional neuroimaging, which is being used to characterize the activity of specific brain circuits at rest and during the performance of specific tasks. Moreover, advances in clinical neuroscience are being coupled with expanding knowledge about genetics and cellular and synaptic neuroscience. Taken together, these advancements offer the hope of much more mechanism-based approaches to treatment in the future. Better understanding of neural circuits also can provide the basis for innovative psychotherapeutic strategies that take advantage of brain plasticity for purposes of neurorehabilitation. In this book, we examine recent developments in the field of network neuroscience and their potential impact on clinical psychiatry, including the way that psychiatrists are trained and interact with other medical specialties and mental health professionals.

Now in a revised and expanded edition, this volume of notes on interviewing and examining psychiatric patients establishes the basis for successful interaction, diagnosis, and treatment. It is intended for students beginning their psychiatric training. The authors include discussions of topics now commonly integrated into professional training, among them forensic and geriatric psychiatry, neuropsychiatry, and mental retardation. A section on child and adolescent psychiatry is also

included.

Examination Notes in Psychiatry - Basic Sciences 2Ed CRC Press

Rapid Psychiatry is the fifth title in the Rapid series of short revision notes books, covering key information in a simple and easily accessible format, using a mnemonic to aid recall. This book provides an excellent revision tool in the run-up to exams, but is also useful for clinical students working on Psychiatry attachments. Rapid Psychiatry covers the common psychiatric conditions encountered on the wards, in clinics, in general practice, and in exams. It acts as a rapid refresher, and is a concise no-nonsense book covering just the basic relevant facts. The book is divided into sections covering psychiatric history-taking and examination, differential diagnosis, disorders, treatment, the key points of the Mental Health Act, psychiatric emergencies, and a glossary of terms. The disorders are arranged in A-Z format, and each topic is covered using the same Rapid series mnemonic that covers Definition, Aetiology, Associations/Risk Factors, Epidemiology, History, Examination, Pathology, Investigations, Management, Complications, Prognosis and Differential Diagnosis.

Psychiatric Examination Radcliffe Publishing

Completely up-to-date with the current MRCPsych Paper 1 examination, this list-based revision guide provides comprehensive coverage of the syllabus. It offers a focused set of essential notes that create a solid knowledge base for the candidate, rather than relying only on MCQs and EMIs for self-testing. Individual chapters are dedicated to each of the main topics within the curriculum and the succinct, bullet-point format aids recall and offers a realistic and user-friendly method for retaining knowledge. Key points are presented in manageable portions fostering confidence and encouraging further investigation. Written by a current trainee, Revision Notes for MRCPsych Paper 1 provides the most closely linked and relevant guide for candidates. It is also a highly useful reference for all Royal College candidates and medical and nursing students wanting an accessible introduction to psychiatry.

Examination Notes in Psychiatry - Basic Sciences CRC Press

Basic Notes in Psychiatry '... a vital revision aid which will remind you of all you have already learned, and will help you put all this information into a logical order... It has helped a great many of your colleagues who have gone before, and I hope it will do the same for you. Simon Baugh, in the Foreword Junior hospital psychiatrists, general practitioners and medical students will find this book a valuable study aid, as will psychiatric nurses, psychiatric social workers, psychiatric occupational therapists and clinical psychologists.

Examination Notes in Psychiatry BoD - Books on Demand

This is an essential text for candidates preparing for postgraduate specialist exams in psychiatry, particularly the MRCPsych. This Basic Sciences volume is a companion to the successful Examination Notes in Psychiatry 3/e: A postgraduate text, which covers the clinical topics. The basic sciences are often poorly understood by trainee psychiatrists, although they form the foundation of clinical practice and are examined in detail, particularly for the MRCPsych Part II examination. This is a comprehensive text for the basic sciences, offering a breadth of information at an appropriate level to meet the needs of the exam candidate.

Examination Notes in Psychiatry, 3Ed CRC Press

Over the last 20 years, Examination Notes in Psychiatry has become one of the leading texts for trainee psychiatrists. The 4th edition maintains the core of valuable information that is required by any would-be psychiatrist, but has been completely revised and updated. Essential Notes in Basic Sciences for the MRCPsych Part 2 John Wiley & Sons

This series is designed to prepare candidates for all three multiple choice question papers in the MRCPsych examination. Each book covers one paper and, in presenting a wide range of practice questions, they aim to teach us as much as to test. Questions are arranged as mock examination papers. They are relevant to the syllabus, and are based on accessible sources, including standard

textbooks and key papers, many from the recommended reading list of the Royal College of Psychiatrists. Explanations, notes and references support most answers. ICD-10 and DSM-IV have been adopted. Highly practical guidance is offered on preparing for and sitting the exams. This includes detailed advice on organizing revision and developing the expertise and skills to answer MCQs. In addition, the nature of the exams, the regulations and the principles underlying the construction of MCQs are clearly explained. All these books will enable candidates to rehearse and refine their technique, assess their knowledge and build on it. This basic sciences volume addresses recent changes in the format of the MRCPsych examination and prepares the candidate for what is considered to be the most difficult component of the examination.

Lecture Notes: Psychiatry CRC Press

The MRCPsych examinations, conducted by the Royal College of Psychiatrists are the most important exams for psychiatric trainee to achieve specialist accreditation. Written by authors with previous exam experience and edited by the distinguished team behind Revision Notes in Psychiatry, Get Through MRCPsych Paper A: Mock Examination Papers provides candidates with the most realistic and up-to-date MCQ and EMIs, closely matched to themes appearing most often in the Paper A exam.

Psychiatry and Clinical Neuroscience CRC Press

Psychiatry is one of the major specialties of medicine, and is concerned with the study and treatment of mental disorders. In recent times the field is growing with the discovery of effective therapies and interventions that alleviate suffering in people with mental disorders. This book of psychiatry is concise and clearly written so that it is usable for doctors in training, students and clinicians dealing with psychiatric illness in everyday practice. The book is a primer for those beginning to learn about emotional disorders and psychosocial consequences of severe physical and psychological trauma; and violence. Emphasis is placed on effective therapies and interventions for selected conditions such as dementia and suicide among others and the consequences of stress in the workplace. The book also highlights important causes of mental disorders in children.

Psychiatry Review for Canadian Doctors CRC Press

Revision Notes in Psychiatry, Third Edition continues to provide a clear and contemporary summary of clinical psychiatry and the scientific fundamentals of the discipline. It is an essential study aid for all those preparing for postgraduate examinations in psychiatry and a superb reference for practising psychiatrists. Structured to follow the entire MRCPsych exam syllabus, the book covers the following key areas, along with the CACS examination: Paper 1: General and adult psychiatric disorder History and mental state examination Cognitive assessment Neurology and psychology for psychiatrists Psychopathology History of psychiatry and psychiatric ethics Paper 2:

Psychopharmacology Neurobiology for psychiatrists Psychiatric genetics Epidemiology Advanced psychological processes and treatments Paper 3: Critical appraisal Learning disability Child and adolescent psychiatry Old age psychiatry Forensic psychiatry Consultation liaison psychiatry Neuropsychiatry Psychosexual medicine Fully updated with recent references and many additional figures, this third edition features a wealth of new material (including NICE guidelines) and updates the DSM-IV-TR criteria to the new DSM-5. Designed to meet the needs of today's candidates, Revision Notes in Psychiatry, Third Edition continues to provide a source of trusted expert information to ensure examination success for all those taking higher examinations in psychiatry.
