Foreign Aid and Emerging Powers

"The highest that can be said of any creature is that it fulfilled the purpose for which God made it." — A. W. Tozer
What is holding you back from being all God wants you to be? Are you still holding on to past sins? Do memories of your spiritual failures haunt you? Or maybe you want to stay in control and not become one of those "fanatical" Christians? Tozer says, "It is one of the devil's oldest tricks to discourage the saints by causing them to look back at what they were." Indeed, Satan has been in the business of intimidating and deceiving the people of God for a very long time. Tozer himself felt attacked by the devil even as he prepared the sermons distilled into this book. But as we press toward maturity in Christ, we are armed with great strength to engage in battle with that great Adversary. We can stand up to the Devil and shout "I am a child of God! I will not take this any longer, and I remind you that the forgiveness and cleansing I have freely received comes from Jesus Christ!" You can talk back to the Devil, but will you?

50 African American and Latina women are included in this book. All are extraordinary and excel in everything from medicine and law to industry and education, from communication and technology to entertainment, science, and the non-profit arena...inspiring role models for girls and young women. Each woman is presented with: a short biography, an early-life portrait presenting each role model as a girl or teenager, and a recent full-page portrait as an adult. Children learn to grow into adults by modeling what they see. If they see productive adults with qualities of character and integrity with whom they can identify, they will be more likely to grow into such adults themselves. Research also indicates that many African American and Latino adolescents lack visible role models more often than other adolescents. But if, as the saying goes, seeing is believing, then African American and Latina girls will be able to imagine what they, themselves, can do

in the future by learning what women of color are doing already. Although begun in Pennsylvania as a project for the Pennsylvania Commission for Women which has been an important advocate for women and girls in the Commonwealth, this book speaks to a need for empowerment for girls and young women throughout the U.S.A. The women "role models" in this book came from Cuba, Panama, Peru, California, Maryland, New York, Ohio and many other states...theirs are American stories of struggle and success.

As recently as five years ago, securing a network meant putting in a firewall, intrusion detection system, and installing antivirus software on the desktop. Unfortunately, attackers have grown more nimble and effective, meaning that traditional security programs are no longer effective. Today's effective cyber security programs take these best practices and overlay them with intelligence. Adding cyber threat intelligence can help security teams uncover events not detected by traditional security platforms and correlate seemingly disparate events across the network. Properly-implemented intelligence also makes the life of the security practitioner easier by helping him more effectively prioritize and respond to security incidents. The problem with current efforts is that many security practitioners don't know how to properly implement an intelligence-led program, or are afraid that it is out of their budget. Building an Intelligence-Led Security Program is the first book to show how to implement an intelligence-led program in your enterprise on any budget. It will show you how to implement a security information and event

management system, collect and analyze logs, and how to practice real cyber threat intelligence. You'll learn how to understand your network in-depth so that you can protect it in the best possible way. Provides a roadmap and direction on how to build an intelligence-led information security program to protect your company. Learn how to understand your network through logs and client monitoring, so you can effectively evaluate threat intelligence. Learn how to use popular tools such as BIND, SNORT, squid, STIX, TAXII, CyBox, and splunk to conduct network intelligence.

The book doesn't reference abstract studies or bore you with statistics, and has three parts: * The first section, Heart, focuses on inspiring stories of DSPs and the wonderful outcomes they achieve working with people with I/DD * The second part, Hope, provides details of our DSP Magnet® program and step-by-step actions providers can apply now with existing resources * The third section, Honesty, looks at longer-term options for providers that do not rely on more government funding What others

are saying: “Craig and Scott have cracked the code... They do it through a masterful use of storytelling, teaching and sharing real world results. There are no magic answers, but ‘Heart, Hope & Honesty’ shows you a smart, new path to recruit, retain and build a culture that will transform your organization and the lives of those you support!” — John Dickerson, CEO Quillo (spent 42 years with The Arc) “Provider friends, please order the book today! I read it cover-to-cover and it's just spot on.” — James W. Steele, Executive Director, Ohio Valley Residential Services “I loved the book. The stories about DSPs and people we support are great and there’s nothing like this out there. You have provided legitimacy to an aspect of our field that has been so overlooked, so thank you, thank you. I can’t wait to hold a finished copy!” — Anna Jeffries, Public Information Officer, Licking County Board of DD

US families have been pushed to the wall. At the bottom of the economic ladder, poor and working-class adults aren't forming stable relationships and can't give their kids the start they need because of low wages and uncertain job prospects. Toward the top, professional parents' lives have become a grinding slog of long hours of paid work. Meanwhile their kids are overstressed by pressure to succeed and get into good colleges. In this provocative book, Maxine Eichner argues that these very different struggles might seem unconnected, but they share the same root cause: the increasingly large toll that economic inequality and insecurity are taking on families. It's government rather than families that's to blame, Eichner persuasively contends. Since the 1970s, politicians have sold families out to the wrongheaded notion that the free

market alone best supports them. In five decades of "free-market family policy," they've scrapped government programs and gutted market regulations that had helped families thrive. The consequence is the steady drumbeat of bad news we hear about our country today: the opioid epidemic, skyrocketing suicide and mental illness rates, "deaths of despair," and mediocre student achievement scores. Meanwhile, politicians just keep telling families to work a little harder. The Free-Market Family documents US families' impossible plight, showing how much worse they fare than families in other countries. It then demonstrates how politicians' free-market illusions steered our nation wildly off course. Finally, it shows how, using commonsense measures, we can restructure the economy to work for families, rather than the reverse. Doing so would invest in our children's futures, increase our wellbeing, reknit our social fabric, and allow our country to reclaim the American Dream.

Under the Weather Simon and Schuster

Contemporary international events, and indeed even the US presidential election, demonstrate the continuing need for debate and discourse over the direction and emphases of US foreign policy. Following the success of the original hardback publication, this revised and updated paperback re-conceptualizes the 'war on terrorism' and analyzes the nature of American domestic and international policy-making within the context of historical and structural constraints upon US policy. American Global Strategy and the 'War on Terrorism' addresses a wide range of themes that are crucial to understanding the 9/11 crisis and to formulating an affective American and global foreign

and security policy to deal with that crisis. This study should be read by contemporary policy makers and scholars of foreign policy.

This book highlights the exigency of student success and how higher education institutions are addressing this call. On the heels of the COVID-19 global pandemic, institutions have been challenged further to manage student satisfaction issues, enrollment and financial insecurities, equity, inclusion and access. As starting point to these ongoing priorities, this book aims to raise awareness, questions and suggestions based on examples of courageous leadership that support retention and completion agendas but more so visionary and actionable approaches to ensure student success. The book addresses the various tensions among education stakeholders, the impressions of change, the expanded realities of competition, the casualties of silos, the value of examining and understanding data in advancing options, and the merits of collaboration, and opportunity thinking. Cases and interviews with thought leaders who candidly share experiences and realizations about ensuring student success provide insight about what else can be done to move the needle forward. *New Masters of Poster Design* iUniverse Librarians seeking guidance on how to launch or grow their teen internships will find help in this handbook. By providing this new way of encouraging youth participation, libraries can help teens to

meaningfully develop knowledge and skills for their futures while encouraging them to become dedicated library users and supporters into adulthood.

Turning Victory Into Success Moody Publishers

A groundbreaking reassessment of the American prison system, challenging the widely accepted explanations for our exploding incarceration rates In *Locked In*, John Pfaff argues that the factors most commonly cited to explain mass incarceration -- the failed War on Drugs, draconian sentencing laws, an increasing reliance on private prisons -- tell us much less than we think. Instead, Pfaff urges us to look at other factors, especially a major shift in prosecutor behavior that occurred in the mid-1990s, when prosecutors began bringing felony

charges against arrestees about twice as often as they had before. An authoritative, clear-eyed account of a national catastrophe, *Locked In* is "a must-read for anyone who dreams of an America that is not the world's most imprisoned nation" (Chris Hayes, author of *A Colony in a Nation*). It transforms our understanding of what ails the American system of punishment and ultimately forces us to reconsider how we can build a more equitable and humane society.
