Restoring for Love CreateSpace

Dave Carmichael and his daughter Peyton had been renovating homes for several years and were considered as among the best designers in the city of Calgary. When Peyton's aunt Julie, a realtor who lived up north, contacted them with an opportunity to restore a Lodge 300 miles away in the foothills of the Rocky Mountains, Dave was skeptical and thought it would be too far away. Peyton was excited though. She knew it would be a huge project, but they enjoyed doing flips, and she would be able to spend time with her aunt and enjoy the outdoors. Dave was finally persuaded and they purchased the Lodge in the small town of Rocky View. Little did they know that it would change both of their lives. Peyton drove the motorhome, packed with tools and equipment for the three-month month period that they were expecting to stay at the site. Dave was driving his pickup. The weather was stormy that day, and Peyton lost Dave along the way. What she didn't realize was that not long after they left home, he was in a serious accident and was taken back to the city in an ambulance. Peyton couldn't reach him online and continued to the Lodge on her own. When she was finally able to speak with him, he said he wouldn't be able to continue with the project, and she would have to do it on her own. Tom McCauley is a handsome young man who is single and the owner of a log home company in Rocky View. He is good friends with Julie and her husband Ed, and is a Christian, involved in church activities and well respected by the people in town. Julie is often trying to find a partner for Tom because he is over thirty and he would like to marry if only he could find the right one. When Peyton tells Julie and Ed about Dave's accident, they are horrified but promise to come and help her with the restoration. Julie contacts Tom to help as well, and when the two of them meet, it is the beginning of their relationship.

Beloved as the city of light, Paris in the nineteenth century sparked the acclaim of poets and the odium of the bourgeois with its distinctive sounds. Street vendors bellowed songs known as the Cris de Paris that had been associated with their trades since the Middle Ages; musicians itinerant and otherwise played for change; and flâneurs-writers, fascinated with the city's underside, listened and recorded much about what they heard. Aimée Boutin tours the sonic space that orchestrated the different, often conflicting sound cultures that defined the street ambience of Paris. Mining accounts that range from guidebooks to verse, Boutin braids literary, cultural, and social history to reconstruct a lost auditory environment. Throughout, impressions of street noise shape writers' sense of place and perception of modern social relations. As Boutin shows, the din of the Cris contrasted economic abundance with the disparities of the capital, old and new traditions, and the vibrancy of street commerce with an increasing bourgeois demand for quiet. In time, peddlers who provided the soundtrack for Paris's narrow streets yielded to modernity, with its taciturn shopkeepers and wide-open boulevards, and the fading songs of the Cris became a dirge for the passing of old ways.

The book provides an overview of socially responsible consumption and marketing, as well as a collection of teaching cases that discuss and emphasize how 21st-century organizations, both for-profit and non-profit, are addressing socially responsible consumers and meeting their changing needs while remaining profitable. Consumers, governments, academics, and practitioners are becoming more interested in promoting positive social changes through consumption. As a result, this book aims to understand the practice of marketing in bringing about positive social change through real-life case studies. Consumption by socially responsible consumers who care about the social good is unique, not only because of its inter-disciplinary and substantive subject matter but also because it presents challenges and pushes organizations to make significant changes in the ways they have been accomplishing organizational activities in the twenty-first century, from procurement to production to sales and services. The book goes beyond individual consumers and their lifestyles to promote the scope of discussing marketing strategies. It seeks to comprehend how people consume and how socially responsible consumption is conceived. The case studies present and pursue integrated solutions for more sustainable consumption. This is a must-read for marketers who want to reach out to socially responsible consumers.
