boost your confidence, reduce your stress- and to do your very best on test day. 10 complete sample ACT exams, with full explanations for every answer 10 sample writing prompts for the optional ACT essay portion Scoring Worksheets to help you calculate your total score for every test Expert guidance in prepping students for the ACT More practice and extra help online ACT is a registered trademark of ACT, Inc., which was not involved in the production of, and does not endorse, this product.

The Failed Promise of Transhumanism Simon and Schuster
 70,000 years ago, the human race almost went extinct. We survived, but no one knows how. Now the next stage of human evolution is beginning. Will we survive this time? Geneticist Kate Warner and counter-terrorism agent David Vale have prevented a fierce plague from wiping out

humanity - but the struggle to survive is far from over. The Atlantis World stretches deep into space and time, harbouring an enemy greater than anyone had imagined. Now Kate and David must race through galaxies, past space stations, and into the past of a mysterious culture whose secrets could save humanity in its darkest hour. This is the blockbusting final instalment in the Origin Mysteries.

The Inheritance Grove Atlantic
 A mugging gone wrong ... or murder? A dissident Russian poet is found dead - at the same time a delegation of Russian businessmen arrives in town. For some, it is crucial that the case is closed quickly, clinically and with the minimum of attention. But DI Rebus and DS Siobhan Clarke believe this is something more than a random attack - especially after a particularly nasty second killing. Then, a brutal and premeditated assault on a local

gangster puts Rebus in the frame - and he may not survive long enough to solve anything...

The Fields Penguin

New planet. New life. Same old S#*@. Against all odds, the Ark and her thirty-thousand survivors have reached Tau Ceti G to begin the long, arduous task of rebuilding human civilization. Meanwhile, on the other side of the world, Tau Ceti G's natives, the G'tel, are coming to grips with the sudden appearance of what many believe are their long-lost Gods. But first contact between humans and g'tel goes catastrophically wrong, visiting death on both sides. Rumors swirl that the massacre was no accident. The Ark's greatest hero, Bryan Benson, takes on the mystery. Partnered with native 'truth-digger' Kexx, against both of their better judgment, Benson is thrust into the heart of an alien culture with no idea how to tell who wants to worship him from who wants him dead. Together, Benson and Kexx will have to find enough common ground and trust to uncover a plot that threatens to plunge both of their peoples into an apocalyptic war that neither side can afford to fight. File Under: Science Fiction From the Paperback edition.

The Power of Organizing Without Organizations Orion

By his early thirties, Paul Allen was a world-famous billionaire-and that was just the beginning. In 2007 and 2008, Time named Paul Allen, the cofounder of Microsoft, one of the hundred most influential people in the world. Since he made his fortune, his impact has been felt in science, technology, business, medicine, sports, music, and philanthropy. His passion, curiosity, and intellectual rigor-combined with the resources to launch and support new initiatives-have literally changed the world. In 2009 Allen discovered that he had lymphoma, lending urgency to his desire to share his story for the first time. In this classic memoir, Allen explains how he solved problems, what he learned from his many endeavors-both the triumphs and the failures-and his compelling vision for the future. He reflects candidly on an extraordinary life. The book also features previously untold stories about everything from the true origins of Microsoft to Allen's role in the dawn of private space travel (with SpaceShipOne) and in discoveries at the frontiers of brain science. With honesty, humor, and insight, Allen tells the story of a life of ideas made real.

Adventures of an It Leader Cambridge University Press

This book aims to establish the position of the sidekick character in the crime and

detective fiction literary genres. It re-evaluates the traditional view that the sidekick character in these genres is often overlooked as having a small, generic or singular role—either to act as the foil to the detective in order to accentuate their own abilities at solving crimes, or else to simply tell the story to the reader. Instead, essays in the collection explore the representations and functions of the detective's sidekick across a range of forms and subgenres of crime fiction. By incorporating forms such as children's detective fiction, comics and graphic novels and film and television alongside the more traditional fare of novels and short stories, this book aims to break down the boundaries that sometimes exist between these forms, using the sidekick as a defining thread to link them together into a wider conceptual argument that covers a broad range of crime narratives.

Start-up Nation Yale University Press

A tightly argued and expansive examination of the pitfalls of transhumanism that reacquaints us with what it means to live well. Advocates of transhumanism, or "radical" enhancement, urge us to pursue the biotechnological heightening of select capacities - above all, cognitive ability - so far beyond any human limit that the beings with those capacities would exist on a higher ontological plane. For proponents of such views, humanity's self-transcendence through advancements in science and technology may even be morally required. Consequently, the human stakes of how we respond to transhumanism are immeasurably high. In *Posthuman Bliss? The Failed Promise of Transhumanism*, Susan B. Levin challenges transhumanists' overarching commitments regarding the mind and brain, ethics, liberal democracy, knowledge, and reality, showing their notion of humanity's self-transcendence into "posthumanity" to be little more than fantasy. Uniting philosophical with scientific arguments, Levin mounts a significant challenge to transhumanists' claim that science and technology support their vision of posthumanity. In a clear and engaging style, she dismantles transhumanists' breezy assurances that posthumans will emerge if we but allocate sufficient resources to that end. Far from offering theoretical and practical "proof of concept" for the vision that they urge upon us, Levin argues, transhumanists engage inadequately with cognitive psychology, biology, and neuroscience, often relying on questionable or outdated views within those fields. Having shown in depth why transhumanism should be rejected, Levin argues forcefully for a

holistic perspective on living well that is rooted in Aristotle's virtue ethics but that is adapted to liberal democracy. This holism is thoroughly human, in the best of senses: It directs us to consider worthy ends for us as human beings and to do the irreplaceable work of understanding ourselves rather than relying on technology and science to be our salvation.

Winter World JHU Press

A new ice age. A mysterious object in space. And a desperate mission to save humanity from extinction.

Theory, Algorithms, and Systems Orbis Books

"A fascinating survey of the digital age . . . An eye-opening paean to possibility."

—The Boston Globe "Mr. Shirky writes cleanly and convincingly about the intersection of technological innovation and social change." —New York Observer An extraordinary exploration of how technology can empower social and political organizers For the first time in history, the tools for cooperating on a global scale are not solely in the hands of governments or institutions. The spread of the internet and mobile phones are changing how people come together and get things done—and sparking a revolution that, as Clay Shirky shows, is changing what we do, how we do it, and even who we are. Here, we encounter a woman who loses her phone and recruits an army of volunteers to get it back from the person who stole it. A dissatisfied airline passenger who spawns a national movement by taking her case to the web. And a handful of kids in Belarus who create a political protest that the state is powerless to stop. Here Comes Everybody is a revelatory examination of how the wildfirelike spread of new forms of social interaction enabled by technology is changing the way humans form groups and exist within them. A revolution in social organization has commenced, and Clay Shirky is its brilliant chronicler.

The Cambridge History of the Graphic Novel BenBella Books, Inc.

In this volume of 15 articles, contributors from a wide range of disciplines present their analyses of Disney movies and Disney music, which are mainstays of popular culture. The power of the Disney brand has heightened the need for academics to question whether Disney's films and music function as a tool of the Western elite that shapes the views of those less empowered. Given its global reach, how the Walt Disney Company handles the role of race, gender, and sexuality in social structural inequality merits serious reflection according to a

number of the articles in the volume. On the other hand, other authors argue that Disney productions can help individuals cope with difficult situations or embrace progressive thinking. The different approaches to the assessment of Disney films as cultural artifacts also vary according to the theoretical perspectives guiding the interpretation of both overt and latent symbolic meaning in the movies. The authors of the 15 articles encourage readers to engage with the material, showcasing a variety of views about the good, the bad, and the best way forward.

The Wonderful Wizard of Oz Grove Press
WINNER OF THE COSTA FIRST NOVEL AWARD A NATIONAL BOOK FOUNDATION 5 UNDER 35 "Open Water is tender poetry, a love song to Black art and thought, an exploration of intimacy and vulnerability between two young artists learning to be soft with each other in a world that hardens against Black people."—Yaa Gyasi, author of *Homegoing* In a crowded London pub, two young people meet. Both are Black British, both won scholarships to private schools where they struggled to belong, both are now artists—he a photographer, she a dancer—and both are trying to make their mark in a world that by turns celebrates and rejects them. Tentatively, tenderly, they fall in love. But two people who seem destined to be together can still be torn apart by fear and violence, and over the course of a year they find their relationship tested by forces beyond their control. Narrated with deep intimacy, *Open Water* is at once an achingly beautiful love story and a potent insight into race and masculinity that asks what it means to be a person in a world that sees you only as a Black body; to be vulnerable when you are only respected for strength; to find safety in love, only to lose it. With gorgeous, soulful intensity, and blistering emotional intelligence, Caleb Azumah Nelson gives a profoundly sensitive portrait of romantic love in all its feverish waves and comforting beauty. This is one of the most essential debut novels of recent years, heralding the arrival of a stellar and prodigious young talent.

A Meditation on Suffering Penguin

In a unified and carefully developed presentation, this book systematically examines recent developments in VRP. The book focuses on a portfolio of significant technical advances that have evolved over the past few years for modeling and solving vehicle routing problems and VRP variations. Reflecting the most recent scholarship, this book is written by one of the top research scholars in Vehicle Routing and is one of the most important books in VRP to be published in recent times.

The Atlantis World Simon and Schuster
"The latest wave of Sherlockians come to the hobby from a non-traditional perspective. They are the online generation. And yet, their passion for the world's greatest detective is as strong as those in the traditional Sherlockian universe. And now these two worlds come together in this volume"--Publisher's website.

A Novel Oxford University Press
Seventeen-year-old Edgar Poe counts down the days until he can escape his foster family—the wealthy Allans of Richmond, Virginia. He hungers for his upcoming life as a student at the prestigious new university, almost as much as he longs to marry his beloved Elmira Royster. However, on the brink of his departure, all his plans go awry when a macabre Muse named Lenore appears to him. Muses are frightful creatures that lead Artists down a path of ruin and disgrace, and no respectable person could possibly understand or accept them. But Lenore steps out of the shadows with one request: "Let them see me!"

The Wall Street Journal Harvard Business Press

This book presents recent work that analyzes general issues of green logistics and smart cities. The contributed chapters consider operating models with important ecological, economic, and social objectives. The content will be valuable for researchers and postgraduate students in computer science, information technology, industrial engineering, and applied mathematics.

The Polymath W. W. Norton & Company
Seventeen-year-old Riven comes from a world parallel to Earth, a world that has

been ravaged by a devastating android war. As a Legion General, she is the right hand of Prince Cale, the young Prince of Neospes. In her world, she's had everything: rank, responsibility, and respect. But when Prince Cale sends her away to rescue his long-lost brother, Caden, who has been spirited to modern day Earth, Riven finds herself in uncharted territory. Armed with the mindset of a soldier and racing against time to bring Caden home, Riven must learn how to blend in as a girl in a realm that is the opposite of all she's ever known. Will she be able to find the strength to defy her very nature? Or will she become the monstrous soldier she was designed to be?
Book One of the V Trilogy McGraw Hill Professional

A breakneck procedural that is beautifully written and masterfully crafted, Erin Young's *The Fields* is a dynamite debut—crime fiction at its very finest. Some things don't stay buried. It starts with a body—a young woman found dead in an Iowa cornfield, on one of the few family farms still managing to compete with the giants of Big Agriculture. When Sergeant Riley Fisher, newly promoted to head of investigations for the Black Hawk County Sheriff's Office, arrives on the scene, an already horrific crime becomes personal when she discovers the victim was a childhood friend, connected to a dark past she thought she'd left behind. The investigation grows complicated as more victims are found. Drawn deeper in, Riley soon discovers implications far beyond her Midwest town.

A Novel Twelve

Winter World

The Almost Girl Duke University Press
From the bestselling author of *Charlie and the Chocolate Factory* and *The BFG!* Last seen flying through the sky in a giant elevator in *Charlie and the Chocolate Factory*, Charlie Bucket's back for another adventure. When the giant elevator picks up speed, Charlie, Willy Wonka, and the gang are sent hurtling through space and time. Visiting the world's first space hotel, battling the dreaded Vermicious Knids, and saving the world are only a few stops along this remarkable, intergalactic joyride.
