Comprehensive coverage of all major structured finance transactions
Structured Finance is a comprehensive introduction to non-recourse financing techniques and asset-based lending. It provides a detailed overview of leveraged buyouts, project finance, asset finance and securitisation. Through thirteen case studies and more than 500 examples of companies, the book offers an in-depth analysis of the topic. It also provides a historical perspective of these structures, revealing how and why they were initially created.
Instruments within each

type of transaction are examined in detail, including Credit Default Swaps and Credit Linked Notes. A presentation of the Basel Accords offers the necessary background to understand the regulatory context in which these financings operate. With this book, readers will be able to:
Delve into the main structured finance techniques to understand their components, mechanisms and how they compare
Understand how structured finance came to be, and why it continues to be successful in the modern markets
Learn the characteristics of financial instruments found in various structured transactions
Explore the global context of structured finance, including the regulatory framework under which it operates
Structured Finance provides foundational knowledge and global perspective to facilitate a comprehensive understanding of this critical aspect of modern finance. It is a must-read for undergraduate and MBA students and finance professionals alike.

 The question of intercreditor equity is one of the most contentious issues in debt restructuring, both historically and today. *Intercreditor Equity in Sovereign Debt* Restructuring maps and establishes the content of these intercreditor equity rules, and examines how they influence the restructuring process. *Laws Passed by the ... Legislature of the State of Texas* Penguin
 The practical importance of the subject of 'The External Debt' in contemporary international life goes without saying. On the analytical level, the interest and indeed the difficulty of the subject lies in the need for a multidisciplinary approach, where political, financial and legal aspects are closely linked and require a clear understanding. From the purely legal point of view,

the traditional and largely artificial boundaries between private and public law, between private international law and public international law and even, more generally, between municipal and international law are clearly marked here. In this respect any analyst has to be a complete jurist, and this collection of essays (in English and French) is an illustration of this fact. *Reports of Cases in Law and Equity in the Supreme Court of the State of New York*
