Curating Under Pressure breaks the silence surrounding curatorial self-censorship and shows that it is both endemic to the practice and ubiquitous. Contributors map the diverse forms such self-censorship takes and offer creative strategies for negotiating curatorial integrity. This is the first book to look at pressures to self-censor and the curatorial responses to these pressures from a wide range of international perspectives. The book offers examples of the many creative strategies that curators deploy to negotiate pressures to self-censor and gives evidence of curators' political acumen, ethical sagacity and resilience over the long term. It also challenges the assumption that self-censorship is something to be avoided at all costs and suggests that a decision to self-censor may sometimes be politically and ethically imperative. Curating Under Pressure serves as a corrective to the assumption that censorship pressures render practitioners impotent. It demonstrates that curatorial practice under pressure offers inspiring models of agency, ingenuity and empowerment. Curating Under Pressure is a highly original and intellectually ambitious volume and as such will be of great interest to students and academics in the areas of museum studies, curatorial and gallery studies, art history, studio art and arts administration. The book will

also be an essential tool for museum practitioners.

Britain, the Empire, and the World at the Great Exhibition is the first book to situate the Crystal Palace Exhibition of 1851 in a truly global context. Addressing national, imperial, and international themes, this collection of essays considers the significance of the Exhibition both for its British hosts and their relationships to the wider world, and for participants from around the globe. How did the Exhibition connect London, England, important British colonies, and significant participating nation-states including Russia, Greece, Germany and the Ottoman Empire? How might we think about the exhibits, visitors and organizers in light of what the Exhibition suggested about Britain's place in the global community? Contributors from various academic disciplines answer these and other questions by focusing on the many exhibits, publications, visitors and organizers in Britain

The essays expand our understanding of the meanings, roles and legacies of the Great Exhibition for British society and the wider world, as well as the ways that this pivotal event shaped Britain's and other participating nations' conceptions of and locations within the wider nineteenth-century world.
