*Aegis Series* Elisabeth Naughton Publishing LLC Originally published at the height of the Watergate crisis, Charles Black's classic *Impeachment: A Handbook* has long been the premier guide to the subject of presidential impeachment. Now thoroughly updated with new chapters by Philip Bobbitt, it remains essential reading for every concerned citizen. Praise for *Impeachment: "To understand impeachment, read this book. It shows how the rule of law limits power, even of the most powerful, and reminds us that the impact of the law on our lives ultimately depends on the conscience of the individual American."--Bill Bradley, former United States senator "The most important book ever written on presidential impeachment."--Lawfare "A model of how so serious an act of state should be approached."--Wall Street Journal "A citizen's guide to impeachment. . . . Elegantly written, lucid, intelligent, and comprehensive."--New*

York Times Book Review "The finest text on the subject I have ever read."-

Winner of the African Politics Conference Group's Best Book Award In September 1958, Guinea claimed its independence, rejecting a constitution that would have relegated it to junior partnership in the French Community. In all the French empire, Guinea was the only territory to vote "No." Orchestrating the "No" vote was the Guinean branch of the Rassemblement Démocratique Africain (RDA), an alliance of political parties with affiliates in French West and Equatorial Africa and the United Nations trusts of Togo and Cameroon. Although Guinea's stance vis-à-vis the 1958 constitution has been recognized as unique, until now the historical roots of this phenomenon have not been adequately explained. Clearly written and free of jargon, *Cold War and Decolonization in Guinea* argues that Guinea's vote for independence was the culmination of a decade-long struggle between local militants and political leaders for

control of the political agenda. Since 1950, when RDA representatives in the French parliament severed their ties to the French Communist Party, conservative elements had dominated the RDA. In Guinea, local cadres had opposed the break. Victimized by the administration and sidelined by their own leaders, they quietly rebuilt the party from the base. Leftist militants, their voices muted throughout most of the decade, gained preeminence in 1958, when trade unionists, students, the party's women's and youth wings, and other grassroots actors pushed the Guinean RDA to endorse a "No" vote. Thus, Guinea's rejection of the proposed constitution in favor of immediate independence was not an isolated aberration. Rather, it was the outcome of years of political mobilization by activists who, despite Cold War repression, ultimately pushed the Guinean RDA to the left. The significance of this highly original book, based on previously unexamined archival records and oral interviews with grassroots activists, extends far

beyond its primary subject. In illuminating the Guinean case, Elisabeth Schmidt helps us understand the dynamics of decolonization and its legacy for postindependence nation-building in many parts of the developing world. Examining Guinean history from the bottom up, Schmidt considers local politics within the larger context of the Cold War, making her book suitable for courses in African history and politics, diplomatic history, and Cold War history.

Economic history states that money replaced a bartering system, yet there isn't any evidence to support this axiom. Anthropologist Graeber presents a stunning reversal of this conventional wisdom. For more than 5000 years, humans have used elaborate credit systems to buy and sell goods. Since the beginning of the agrarian empires, humans have been divided into debtors and creditors. Through time, virtual credit money was

replaced by gold and the system as a whole went into decline. This fascinating history is told for the first time. *A Novel of the Bayou Butcher* Elisabeth Naughton Publishing LLC

In a world where we usually measure animals by human standards, prize-winning author and MacArthur Fellow Carl Safina takes us inside their lives and minds, witnessing their profound capacity for perception, thought and emotion, showing why the word "it" is often inappropriate as we discover who they really are. Weaving decades of observations of actual families of free-living creatures with new discoveries about brain functioning, Carl Safina's narrative breaches many commonly held boundaries between humans and other animals. In Beyond Words, readers travel the wilds of Africa to visit some of the last great elephant gatherings, then follow wolves of Yellowstone National Park sort out the aftermath of their personal tragedy, then plunge into the astonishingly peaceful society of killer whales

living in waters of the Pacific Northwest. We spend quality time, too, with dogs and falcons and ravens; and consider how the human mind originated. In his wise and passionate new book, Safina delivers a graceful examination of how animals truly think and feel, which calls to question what really does—and what should—make us human. Dangerous Proposal Extreme Measures In Mosaic warfare, individual warfighting platforms are assembled like ceramic tiles to make a larger "mosaic," or force package. The authors apply lessons from the human immune system and a U.S. Navy project to mosaic warfare. Bonus Novella: Surrender \*\*Note: This book was previously published as part of Forbidden by Elisabeth Naughton\*\* **Firebrand Series Bundle** Montlake Romance Elizabeth DeLoughrey invokes the cyclical model of the continual movement and rhythm of the ocean ('tidalectics') to destabilize the national, ethnic, and even regional frameworks that have been the mainstays of literary study. The result is a privileging of alter/native epistemologies whereby island cultures are positioned where they should have been all along—at the forefront of the world historical process of transoceanic migration and landfall. The research, determination, and

intellectual dexterity that infuse this nuanced and meticulous reading of Pacific and Caribbean literature invigorate and deepen our interest in and appreciation of island literature. —Vilsoni Hereniko, University of Hawai'i "Elizabeth DeLoughrey brings contemporary hybridity, diaspora, and globalization theory to bear on ideas of indigeneity to show the complexities of 'native' identities and rights and their grounded opposition as 'indigenous regionalism' to free-floating globalized cosmopolitanism. Her models are instructive for all postcolonial readers in an age of transnational migrations." —Paul Sharrad, University of Wollongong, Australia Routes and Roots is the first comparative study of Caribbean and Pacific Island literatures and the first work to bring indigenous and diaspora literary studies together in a sustained dialogue. Taking the "tidalectic" between land and sea as a dynamic starting point, Elizabeth DeLoughrey foregrounds geography and history in her exploration of how island writers inscribe the complex relation between

routes and roots. The first section looks at the sea as history in literatures of the Atlantic middle passage and Pacific Island voyaging, theorizing the transoceanic imaginary. The second section turns to the land to examine indigenous epistemologies in nation-building literatures. Both sections are particularly attentive to the ways in which the metaphors of routes and roots are gendered, exploring how masculine travelers are naturalized through their voyages across feminized lands and seas. This methodology of charting transoceanic migration and landfall helps elucidate how theories and people travel, positioning island cultures

in the world historical process. In fact, DeLoughrey demonstrates how these tropical island cultures helped constitute the very metropolises that deemed them peripheral to modernity. Fresh in its ideas, original in its approach, *Routes and Roots* engages broadly with history, anthropology, and feminist, postcolonial, Caribbean, and Pacific literary and cultural studies. It productively traverses diaspora and indigenous studies in a way that will facilitate broader discussion between these often segregated disciplines. *Fatal Pursuit* Academic Press
