When New York Times bestselling author Raymond Moody began writing about near-death experiences, he noticed that the stories resembled the nonsensical writing of his literary heroes Lewis Carroll, Edward Lear, and Dr. Seuss. In this book, Dr. Moody shares the groundbreaking results of four decades of research into the philosophy of nonsense, revealing new ways to understand and experience life, death, and spirituality. Explore the nuanced feelings that accompany nonsense language, and learn how engaging with nonsense can help you on your spiritual path. Discover how nonsense transcends classical true/false logic, opening the doorway to new spiritual and philosophical breakthroughs. With dozens of examples from literature, comedy, music, and art, this accessible book presents a fascinating new

approach to the mysteries of the human spirit.

It's been a decade since Lynne Dorfman and Rose Cappelli wrote the first edition of *Mentor Texts* and helped teachers across the country make the most of high-quality children's literature in their writing instruction. In the second edition of this important book Lynne and Rose show teachers how to help students become confident, accomplished writers by using literature as their foundation. The second edition includes brand-new "Your Turn Lessons," built around the gradual release of responsibility model, offering suggestions for demonstrations and shared or guided writing. Reflection is emphasized as a necessary component to understanding why mentor authors chose certain strategies, literary devices, sentence structures, and words. Lynne and Rose offer new children's book titles in each chapter and in a carefully curated and annotated Treasure Chest. At the end of each chapter a "Think About It--Talk About It--Write About It" section invites reflection and conversation with colleagues. The book is organized around the characteristics of good writing--focus, content, organization, style, and conventions. Rose and Lynne write in a friendly and conversational style, employing numerous anecdotes to help teachers visualize the process, and offer strategies that can be immediately implemented in the classroom. This practical resource demonstrates the power of learning to read like writers.

How do you approach teaching English in the modern classroom? What is expected of a would-be English teacher? This best-selling textbook combines theory and practice to present a broad introduction to the opportunities and challenges of teaching English in secondary school classrooms. Each chapter explains the background to debates about teaching the subject and provides tasks, practical teaching approaches and further reading to explore issues and ideas in relation to school experience. Already a major text for many university teacher education courses, this new edition has been thoroughly updated in the light of recent revisions to the National Curriculum for English, examination syllabuses and the Standards for Qualified Teacher Status. As well as containing critical explorations of the history and definitions of the subject and policies such as the Secondary National Strategy that are appropriate to Professional and Masters level PGCE study, other chapters present a broad range of effective, innovative approaches to teaching such crucial areas as: reading and writing, speaking and listening; drama; media studies and information and communications technology; grammar, poetry and language study; Shakespeare; post-16 English language and literature. Written particularly with the new and student teacher in mind, this book offers principles and practical examples of teaching and learning within a 21st Century

context in which new notions of literacy compete with demands of national assessment. Taking these changing principles as a starting point, the text also addresses questions about the nature of initial teacher preparation and raises issues concerning standards-based teacher education, mentoring in schools and monitoring the development of a student teacher.
