inclusive/exclusive/pluralistic categories and looks at Judaism's interactions with other faiths. *Pathways to Dialogue* Fordham Univ Press Every generation of theologians must respond to its context by rearticulating the central tenets of the faith. Interreligious comparison has been integral to this process from the start of the Christian tradition and is especially salient today.

The emerging field of comparative theology, in which close study of another religious tradition yields new questions and categories for theological reflection in the scholar's home tradition, embodies the ecumenical spirit of this moment. This discipline has the potential to enrich systematic theology and, by extension, theological education, at its foundations. The essays in

Comparing Faithfully demonstrate that engagement with religious diversity need not be an afterthought in the study of Christian systematic theology; rather, it can be a way into systematic theological thinking. Each section invites students to test theological categories, to consider Christian doctrine in relation to specific comparisons, and to take up comparative study in their

own contexts. This resource for pastors and theology students reconsiders five central doctrines of the Christian faith in light of focused interreligious investigations. The dialogical format of the book builds conversation about the doctrine of God, theodicy, humanity, Christology, and soteriology. Its comparative essays span examples from Hindu, Buddhist, Jewish, Muslim, Jain, and Confucian

traditions as well as indigenous Aztec theology, and contemporary “spiritual but not religious” thought to offer exciting new perspectives on Christian doctrine. *Theology for Earth Community* Taylor & Francis The concept of religious freedom is the favoured modern human rights concept, with which the modern world hopes to tackle the phenomenon of religious

pluralism, as our modern existence in an electronically shrinking globe comes to be increasingly characterised by this phenomenon. To begin with, the concept of religious freedom, as embodied in Article 18 of the Universal Declaration of Human Rights, seems self-evident in nature. It is the claim of this book, however, that although emblematic on the one hand, the concept is also

problematic on the other, and the implications of the concept of religious freedom are far from self-evident, despite the ready acceptance the term receives as embodying a worthwhile goal. This book therefore problematizes the concept along legal, constitutional, ethical and theological lines, and especially from the perspective of religious studies, so that religious freedom in the

world could be enlarged in a way which promotes human flourishing. Human Security and International Insecurity Oxford University Press There has been a proliferation of publications in the field of Christian ecological theology over the last three decades or so. These include a number of recent edited volumes, each covering a range of topics and consolidating many of the

emerging insights in ecological theology. The call for Christian churches to respond to the environmental crisis has been reiterated numerous times in this vast corpus of literature, also in South Africa. Western Traditions A&C Black This contributed volume examines in detail the major Western religious traditions, namely Judaism, Zoroastrianis

m, Christianity, Islam, and religions of the ancient world. The text traces each tradition in depth from its origins, through its development, to the religion's meaning and practice in today's society. Comprehensive and accessible, the new third edition offers a thorough and engaging introduction to the Western faiths. Human Rights and Dynamic Humanism
AFRICAN SUN

MeDIA Religion and Politics: New Developments Worldwide features ten articles about recent developments in the interaction of Religion and Politics in various countries of Asia, Africa, Europe, and both North and South America. Most articles focus on one country, and including China, South Korea, India, Nigeria, Malaysia, France, and Cuba. Others address issues across regions

such as Latin America, Southeast Asia, or the Middle East. The fifteen contributors are scholars from diverse disciplines as well as diverse regions of Asia, Europe, Africa, and the Americas. Subjects include the Indian government's favoritism for Hinduism over rival religions; the way the Sikhs of India avoid the religion-politics divide; the way the Western media fails to understand

the Chinese government's policies on religious minorities; the aftermath of the Charlie Hebdo demonstration s in France; religious attitudes toward tax politics in South Korea as well as among Christians compared to Muslims; how to lessen the radicalization of Muslims in Southeast Asia; whether Nigeria should encourage its Muslims to be active in the Organisation of Islamic Cooperation;

the spiritual role played by the permaculture movement in Cuba; and how the former tendency of scholars to polarize religion and politics is no longer viable, especially in Latin America. *Theology of Migration in the Abrahamic Religions* Routledge Are the secular foundations of international relations sustainable at present? This comprehensive study shows how the global resurgence of

religion confronts international relations theory with a theoretical challenge comparable to that raised by the end of the Cold War or the emergence of globalization. The volume tries to shake the secular foundational myths of the discipline and outline the need for an expansion into religiously inspired spheres of thought. It also challenges the most condemning accusation

against religion: the view that the politicization of religion is always a threat to security and inimical to the resolution of conflict. Finally, the task of demystifying religion is taken further with an argument for a stronger and "progressive" political engagement of the worldwide religious traditions in the contemporary globalized era. *A Field Guide* Springer Science &

Business Media This book presents a comprehensive overview of Asian families residing in Canada and the United States by portraying and analyzing Asian Canadian and Asian American immigrant families in an integrated yet nuanced way. Key areas of coverage include: Integrated overview of Asian American and Asian Canadian families, including an exploration of the historical and current immigration

policies.

Methodological strategies in investigating Asian families and their impact on the field. Asian Families in Canada and the United

States is a must-have resource for researchers, professors, graduate students as well as clinicians, professionals, and policymakers in the fields of developmental, social, and cross-cultural psychology, parenting and family studies, social work, and all interrelated disciplines. Gods in the Global Village Mahmoud Refaat This book is about new forms of religious activities

emerging in the context of their dialectic relations with contemporary multicultural realities. World religions are effectively a major agent of the multiculturalization of contemporary societies. However, multiculturalism pushes them not only toward change but also toward new conflicts. The Routledge Handbook of Religions and Global Development Routledge This collection of essays

assesses various dimensions of dialogue between Islam and other religions, especially Christianity. This book celebrates the work of Professor Mahmoud Ayoub and reflects the themes that are central in his scholarship spanned over the last three decades and which are more relevant than ever at the inauguration of the twenty-first century. The themes reflected are the Qur'an

and hadith, theology and philosophy, and Islam's interaction with other religions. Ayoub needs no introduction to those familiar with and engaged in inter-religious dialogue in general and Muslim-Christian-Jewish dialogue in particular. He is a well-known Muslim scholar and historian of religion, currently director of the Islamic studies program in the department of

religion at Temple University in Philadelphia. His broad area of interest is of course Islamic studies but he has also exerted considerable scholarly efforts in comparative religion. As evidenced from Dr. Ayoub's works, he moves with ease between philosophy and mysticism, scripture and tradition and between Islam and other religions. As a Muslim, Ayoub has provided a model of

being religious which combines openness to others without compromising rigorous historical scholarship. Contributors to this volume include some of his close friends and colleagues, as well as former students both Muslim and Christian. This book was previously published as a special issue of *Islam and Christian-Muslim Relations: A Global Perspective* Dynamic humanism in

the defense and promotion of human rights. Activism is driven by positive sentiment; deprivations are driven by negative sentiment. The book explores these issues in the context of theory as well as specific chapters which focus on the multiple dimensions of the human rights problem. **Western Traditions** University of Ottawa Press In this festschrift,

former students of Robert Cummings Neville and fellow theologians reflect critically on Neville's scholarship.

Islam and Other Religions

Ashgate Publishing, Ltd.

This book provides an indispensable voice in the scholarly conversation on migration. It shows how migration has shaped and has been shaped by the three Abrahamic religions - -

Judaism, Christianity, and Islam. No theory of migration will be complete unless the theological insights of these religions are seriously taken into account.

The Return from Exile
John Wiley & Sons
This volume brings together original essays by both seasoned professionals and emerging scholars who examine state-of-the-art scholarship and pedagogy in ecologically-alert theology. Authors assess what various theologians have to offer, and draw implications for reshaping religious and environmental studies, as

well as preparing the next generations of church leaders or pastoral workers. What needs to be done, these authors ask, to bring biblical studies, systematics, social ethics, practical theology, spiritual formation, and liturgy up to speed with eco-justice thought and action on environmental questions?

In spite of the debate about secularization or de-secularization,

the existential-bodily need for religion is basically the same as always. What have been changed are the horizons within which religions are interpreted and the relationships within which religions are integrated. This book explores how religions continue to challenge secular democracy and science, and how religions are themselves being challenged by secular values

and practices. All traditions - whether religious or secular - experience a struggle over authority, and this struggle seems to intensify with globalization, as it has brought people around the world in closer contact with each other. In this book internationally leading scholars from sociology, law, political science, religious studies, theology and the religion and science debate, take stock of the current interdisciplinary research on religion and open new perspectives at the cutting edge of the debate on religion in the 21st century. *Religious Epiphanies Across Traditions and Cultures* Routledge World ReligionsWestern TraditionsOxford University Press, USA
