Awakening: An Introduction to the History of Eastern Thought engages students with lively anecdotes, essential primary and secondary sources, an accessible writing style, and a clear historical approach. The text focuses primarily on India, China, and Japan, while showing the relationships that exist between Eastern and Western traditions. Patrick Bresnan consistently links the past to the present, so students may see that Eastern traditions, however ancient their origins, are living traditions and relevant to modern times. Updates to the Sixth Edition include a new introduction as well as new approaches to problem areas throughout the text, but with special emphasis in Chapter 5 (Ashtanga Yoga), Chapter 10 (Basic Teaching of Shakyamuni Buddha), Chapter 12 (Mahayana Buddhism: Madhyamaka section)

and Chapter 18 (Chan Buddhism: regarding the relationship of Chan Buddhism to Zen Buddhism). In addition, all references and source material have been brought up to date. The companion website includes two new videos and many new photos, produced by the author. New to this Sixth Edition: • A new introduction that provides a helpful overview of each of the nineteen chapters and important connections between them; • An improved explanation of the nature of Vedanta philosophy, and a more logical organization of the Key Elements of the Upanishads in Chapter 3; • An extensive rewrite of Chapter 5, which deals with the subject of Ashtanga Yoga as expressed in the Yoga Sutras of Patanjali; • A greatly improved presentation of Buddha's "Four Noble Truths" in Chapter 10; • A total recasting of the teaching of Nagarjuna in the Madhyamaka section of Chapter 12; • A clearer and easier to understand presentation of the teaching of the Dao De Jing in Chapter 14; • A major revision of Chapter 18 so as to clearly distinguish Chinese Chan from Japanese Zen; • Greater emphasis throughout, where pertinent, on the role of meditation practice in all Eastern traditions; • Revised and updated Questions for Discussion at the end of each chapter; • New photos and two newly produced videos prepared by the author for the book's companion website: <http://patrickbresnan.com/>.

The Ancient Wisdom of the Celts American Bar Association Council of War: A History of the Joint Chiefs of Staff, 1942--1991 follows in the tradition of volumes previously prepared by the joint History Office dealing with JCS involvement in national policy, the Korean War, and the Vietnam War. Adopting a broader view than earlier volumes, it surveys the JCS role and contributions from the early days of World War II through the end of the Cold War. Written from a combination of primary and secondary sources, it is a fresh work of scholarship, looking at the problems of this era and their military implications. The main prism is that

of the joint Chiefs of Staff, but in laying out the JCS perspective, it deals also with the wider impact of key decisions and the ensuing policies. The narrative traces the role and influence of the Joint Chiefs of Staff from their creation in 1942 through the end of the Cold War in 1991. It is, first and foremost, a history of events and their impact on national policy. It is also a history of the Joint Chiefs of Staff themselves and their evolving organization, a reflection in many ways of the problems they faced and how they elected to address them. Over the years, the Joint History Office has produced and published numerous detailed monographs on JCS participation in national security policy. There has never been, however, a single-volume narrative summary of the JCS role. This book, written from a combination of primary and secondary sources, seeks to fill that void. World History Teaching in Asia is the first broad survey of the content and approaches used to teach world history in secondary schools and colleges in Asia. The collection has been crafted by scholars and educators whose goal was to shed light on the importance of history education and to foster understanding of and between Asian countries. These essays show how the teaching of world history in Asian countries has developed since World War II, with many interesting parallels, including the issue of Eurocentrism, but also distinctive national trends, and considerable changes over time. At a time when many Asian countries are making great strides in education, this study of history education in Asia will be of real interest to educators, history scholars, and policy-makers worldwide.
