Microsoft Certification Covers: Windows Server 2008 Exams (MCTS 70-640, 70-642, 70-643, and MCITP 70-646, 70-647) *MCTS 70-662 and MCITP 70-663* John Wiley & Sons Provides an actual real-life Microsoft Windows network lab environment over the Internet. With step-by-step labs based on the hands-on projects in the main text, students can log on anywhere, anytime via a

Web browser to gain essential hands-on experience with the actual Microsoft Windows Server 2008 operating system. **MCITP Self-paced Training Kit (exam 70-685)** John Wiley & Sons Microsoft Windows Server is a multi-purpose server designed to increase reliability and flexibility of a network infrastructure. Windows Server is the paramount

tool used by enterprises in their datacenter and desktop strategy. The most recent versions of Windows Server also provide both server and client virtualization. Its ubiquity in the enterprise results in the need for networking professionals who know how to plan, design, implement, operate, and troubleshoot networks relying on Windows Server. Microsoft Learning is

preparing the next round of its Windows Server Certification program with exams covering the new version of the software, Windows Server 2012. The exams and certification path change significantly from the previous version of Windows Server. This provides an opportunity for the MS line to capitalize on the dual disruption of brand-new software and brand-new certifications.
