Kelley Wingate's Math
Practice for fifth grade is
designed to help students
master basic math skills
through focused math
practice. Practice pages
will be leveled in order to
target each student's
individual needs for
support. Some pages will
provide clear, step-by-
step examples. The basic
skills covered include
multiplication and division
of fractions, more
advanced division,
decimals, volume, and a
comprehensive selection
of other fifth grade math
skills. This well-known

series, Kelley Wingate,
has been updated to align
content to the Common
Core State Standards. The
128-page books will
provide a strong
foundation of basic skills
and will offer
differentiated practice
pages to make sure all
students are well
prepared to succeed in
today's Common Core
classroom. The books will
include Common Core
standards matrices, cut-
apart flashcard sections,
and award certificates.

Helping tech-savvy
marketers and data
analysts solve real-world
business problems with
Excel Using data-driven
business analytics to
understand customers
and improve results is a
great idea in theory, but
in today's busy offices,
marketers and analysts
need simple, low-cost
ways to process and make

the most of all that data. This expert book offers the perfect solution. Written by data analysis expert Wayne L. Winston, this practical resource shows you how to tap a simple and cost-effective tool, Microsoft Excel, to solve specific business problems using powerful analytic techniques—and achieve optimum results. Practical exercises in each chapter help you apply and reinforce techniques as you learn. Shows you how to perform sophisticated business analyses using the cost-effective and widely available Microsoft Excel instead of expensive, proprietary analytical tools. Reveals how to target and retain profitable customers and avoid high-risk customers. Helps you forecast sales and improve response rates for marketing campaigns. Explores how to optimize price points for products and services, optimize store layouts, and improve online advertising. Covers social media, viral marketing, and how to exploit both effectively. Improve your marketing results with Microsoft Excel and the invaluable techniques and ideas in *Marketing Analytics: Data-Driven Techniques* with

Microsoft Excel.

MULTILIT (Making Up Lost Time in Literacy).
 Routledge
 A surprisingly simple way for students to master any subject--based on one of the world's most popular online courses and the bestselling book *A Mind for Numbers* and its wildly popular online companion course "Learning How to Learn" have empowered more than two million learners of all ages from

around the world to master subjects that they once struggled with. Fans often wish they'd discovered these learning strategies earlier and ask how they can help their kids master these skills as well. Now in this new book for kids and teens, the authors reveal how to make the most of time spent studying. We all have the tools to learn what might not seem to come naturally to us at first--the secret is to understand how the brain works so we can unlock its power. This book explains: • Why sometimes letting your mind wander is an important part of the learning process • How to avoid "rut think" in order to think outside the box • Why having a poor memory can be a good thing • The value of metaphors in developing understanding • A simple, yet powerful, way to stop procrastinating Filled with illustrations, application questions, and exercises, this book makes learning easy and fun.

Media Flight Plan was developed in response to the need for affordable media planning simulations in the university classroom. Professional level media planning software ranges in price from hundreds to thousands of dollars. Media Flight Plan, including both the textbook and the online simulation, sells at or below the average price of a used textbook. MFP provides university students' access to not only realistic simulations of planning software, but also includes access to professional syndicated data like MRI, SRDS, Nielsen data, (all by permission) and other syndicated sources that only large corporations

and agencies can afford. Besides the online software simulation, the text includes eight chapters that cover basics like basic math models involved in media buying/planning, and exercises that cover calculation of audience ratings, media share, reach and frequency, and gross rating points. Case studies are included for actual Fortune 500 clients. All cases require students to interpret and apply professional syndicated data and employ the basic methods for writing marketing driven media plans. Both authors, Dennis Martin and Dale Coons, have professional ad agency experience. Coons is executive vice president in a major agency where he directs research, media planning and client development. He is among the most sought-after experts in the field of advertising research. Martin worked on national brands as a copywriter and creative director and co-authored *Strategic Advertising Campaigns*, a national best-seller for Advertising Age's publishing division. Earning his Ph.D. at University of Illinois, he achieved national and international recognition

as a professor of marketing communications. *Multiplication and Division - Student Book* Scott Foresman & Company This highly motivational text approaches the study of algebra with imaginative applications and clear problems derived from the real world.
