BEST COMPTON

[Information Technology Investment](#) Springer Science & Business Media

This two-volume set constitutes the refereed proceedings of the 11th International Conference on Industrial and Engineering Applications of Artificial Intelligence and Expert Systems, IEA/AIE-98, held in Benicassim, Castellon, Spain, in June 1998. The two volumes present a total of 187 revised full papers selected from 291 submissions. In accordance with the conference, the books are devoted to new methodologies, knowledge modeling and hybrid techniques. The papers explore applications from virtually all subareas of AI including knowledge-based systems, fuzzyness and uncertainty, formal reasoning, neural information processing, multiagent systems, perception, robotics, natural language processing, machine learning, supervision and control systems, etc..

[The Performance of Socially Responsible Investment Funds in Europe](#) World Scientific

With the world uniting to achieve Sustainable Development Goals, change lies ahead for businesses. These organizations must rethink strategies and business behavior and assess their impact to align with sustainability goals that promote industrial innovation, maintain wellbeing, protect the planet, and ensure business value is created. To achieve this ambitious agenda, a strong commitment and the means to implement it are required. [Technological Innovations for Sustainability and Business Growth](#) is a crucial reference source delivering dynamic research on accelerating growth in business through knowledge creation and technological innovations. While highlighting topics such as consumer analytics, international business, and risk assessment, this publication explores a wide range of techniques adopting and achieving a sustainable competitive advantage in business. This book is ideally designed for multinational investors, marketing researchers, managers, executives, board members, IT consultants, economists, stakeholders, policymakers, financial analysts, professionals, academicians, researchers, and students.

[KESEJAHTERAAN YANG BAIK](#) Springer

These proceedings represent the work of researchers participating in the 11th International Conference on Intellectual Capital, Knowledge Management & Organisational Learning - ICICKM 2014, which this year is being held at The University of Sydney Business School, The University of Sydney, Australia. The Conference Co-Chairs are Dr John Dumay from Macquarie University, Sydney, Australia and Dr Gary Oliver from the University of Sydney, Australia. The conference will be opened with a keynote by Goran Roos, Advanced Manufacturing Council, Adelaide, Australia who will address the topic of "Intellectual capital in Australia: Economic development in a high cost economy." The second day will be opened with a from James Guthrie, University of Sydney, Australia on the topic of "Intellectual Capital and the Public Sector Research: Past, Present, and Future."

[11th European Conference on Innovation and Entrepreneurship](#) CRC Press

The government budget should be the financial mirror of society's choices. Yet most people view budgeting as the epitome of eye-glazing subjects, rarely explained in a way that is understandable to the non-specialist and too often presented without adequate consideration of a country's governance and institutional capacity. [Government Budgeting and Expenditure Management](#) fills a gap in the literature to redress these failings and does so in comparative international perspective. This book provides a comprehensive but pithy and easy-to-understand treatment of public financial management, taking into account a variety of special issues including budgeting in post-conflict situations, at subnational government levels, for military/security expenditures, and in countries with large extractive revenues. Distilling the lessons of budgeting reform in countries at different levels of income and administrative capacity, each chapter gradually progresses from the basic principles to the more technical aspects and then on to implementation issues, using concrete examples and illustrations from around the globe. [Government Budgeting and Expenditure Management](#) is ideally suited as the primary text for advanced undergraduate or graduate courses

in government budgeting or public financial management, or as a supplementary text for courses in public finance, public economics, economic development, public administration or comparative politics. With its attention to practical implementation aspects, the book will also be of direct interest to practitioners, policy-makers, and government employee training organizations.

[Investments](#) □□□□□□

In order to measure the dynamics of flow-performance relationships for a multi-domicile sample, Simon Weiler applies existing flow-performance research methods to a broad set of European equity (UCITS) funds and proves that major findings (performance-chasing behaviour and a convex flow-performance relationship) also hold true in a cross-border market environment.

[Marketing and Supply Chain Management](#) Springer Nature

A properly structured financial model can provide decision makers with a powerful planning tool that helps them identify the consequences of their decisions before they are put into practice.

[Introduction to Financial Models for Management and Planning, Second Edition](#) enables professionals and students to learn how to develop and use computer-based models for financial planning. This volume provides critical tools for the financial toolbox, then shows how to use them tools to build successful models.

[Bibliography of Agriculture](#) Routledge

The theories in the topics of SAPM have been given in detail and in an analytical manner, and their practical applications have been illustrated with examples and case studies, which are often taken from the real world. It follows a learning-outcome-based approach, and it is packed with rich chapter-end exercises to reinforce learning. It is designed to be a comprehensive textbook for all senior-level postgraduate students of MBA-Finance, PGDM-Finance, and M.Com. programs, and final-level students of other professional courses like CA, CMA, CS and CFA. Investors will find this book to be of an immensely useful reference.

[Handbook of Research on Engineering, Business, and Healthcare Applications of Data Science and Analytics](#) Vikas Publishing House

From small law offices to federal agencies, all entities within the justice system are governed by complicated economic factors and face daily financial decision-making. A complement to [Strategic Finance for Criminal Justice Organizations](#), this volume considers the justice system from a variety of economic and financial perspectives and introduces quantitative methods designed to improve the efficiency and effectiveness of organizations in both the non-profit and for-profit sectors. Using only a minimum of theory, [Economic and Financial Analysis for Criminal Justice Organizations](#) demonstrates how to make decisions in the justice system using multiple financial and economic models. Designed for readers with little knowledge of advanced mathematics, quantitative analysis, or spreadsheets, the book presents examples using straightforward, step-by-step processes with Excel and Linux Calc spreadsheet software. A variety of different types of decisions are considered, ranging from municipal bond issuance and valuation necessary for public revenues, pension planning, capital investment, determining the best use of monies toward construction projects, and other resource planning, allocation, and forecasting issues. From municipalities and police departments to for-profit prisons and security firms, the quantitative methods presented are designed to improve the efficiency and effectiveness of all organizations in the justice domain.

[The Nigerian Academic Forum](#) Profile Books

From the individual to the largest organization, everyone today has to make investments in IT. Making a smart investment that will best satisfy all the necessary decision-making criteria requires careful and inclusive analysis. This textbook provides an up-to-date, in-depth understanding of the methodologies available to aid in this complex process of multi-criteria decision-making. It guides readers on the process of technology acquisition ? what methods to use to make IT investment decisions, how to choose the technology and justify its selection, and how the decision will impact the organization. Unique to this textbook are both financial investment models and more complex

decision-making models from the field of management science so that readers can extend the analysis benefits to enhance and confirm their IT investment choices. The wide range of methodologies featured in the book gives readers the opportunity to customize their best-fit solutions for their unique IT decision situation. This textbook is especially ideal for educators and students involved in programs dealing with technology management, operations management, applied finance, operations research, and industrial engineering. A complimentary copy of the Instructor's Manual and Test Bank and the PowerPoint presentations of the text materials are available for all instructors who adopt this book as a course text. Please send your request to sales@wspc.com.

IGI Global

How to make sound investment decisions: Fundamentals of Investment Appraisal, 2nd edition, is based on long-term experience with students and is written in an easily understood style. A case study has been constructed to illustrate all methods discussed. The goal of the book is to pace a sure way through the variety of methods in investment appraisal. Mathematical basics are specifically explained in detail. The book shows clearly why there are different methods in investment appraisal and on where to focus in a given situation. As all methods are introduced by the same case study, it is easy to compare and evaluate the results. The statements in the text are

further consolidated by abstracts and evaluations of each of the methods. Exercises with extensive solutions will lead to the confidence which is necessary for an ease of handling the investment appraisal techniques and for a good preparation for students' exams. German and international students at universities and other institutions of higher education will find this book an excellent systematic preparation for their exams.

Directory of Pension Funds and Their Investment Managers CIMMYT

This book constitutes the refereed proceedings of the 11th International Workshop on Cooperative Information Agents, CIA 2007, held in Delft, The Netherlands, September 2007. The 19 revised full papers presented together with four invited papers were carefully reviewed and selected from 38 submissions. The papers are organized in topical sections on information search and processing, applications, rational cooperation, interaction and cooperation and trust.

ECISM 2017 11th European Conference on Information Systems Management IGI Global

Kesehatan dan kesejahteraan masyarakat tidak terbatas pada upaya mengatasi berbagai jenis penyakit; layanan kesehatan (obat, vaksin, perekrutan dan pelatihan tenaga kesehatan), meningkatkan kesehatan mental dan kesejahteraan, perlindungan risiko finansial, dan upaya meningkatkan pembiayaan kesehatan. Topik unggulan kesehatan dan kesejahteraan dapat diakomodasi oleh berbagai disiplin ilmu. Kesejahteraan yang baik merupakan tema yang relevan dengan kebutuhan masyarakat dalam era pascapandemi.

Methodology and Tools in Knowledge-Based Systems

Socially responsible investing (SRI) is an investment approach that combines investors' financial as well as nonfinancial goals in the security selection process. Technically, investors can engage in SRI either by directly investing in companies that implement corporate social activities or by investing their money in SRI funds, which apply screening criteria to select securities. The screening process applied by the SRI funds has led to controversy among academics regarding whether the use of SRI screens in the security selection process influences the financial performance of the funds. The empirical study analyzes whether or not the screening process applied by such funds influences their financial performance. Previous research mostly has focused on analyzing the performance of SRI equity funds established in the United States. The study at hand not only includes SRI equity funds, but also SRI balanced and fixed income funds established in Europe, the biggest market for SRI globally. The study provides unexpected results that are not only of interest for investors, who want to get a better understanding of the effect on the financial performance of their portfolios in case SRI funds are added. The results are also relevant for SRI fund managers, who are interested in promoting their funds and attracting (new) investors, and for academics, whose research interests are e. g., located in the fields of SRI, fund portfolio performances and market efficiencies.

Emerging Issues in Finance Routledge

The marketing discipline has been dominated by managerial research that has never really been counterbalanced by a systematic critical analysis which is problematic given the assumed legitimization of the managerialism that has ensued. This book is an attempt to rest the balance, articulating a social critique and evaluation of marketing. The book offers a critical survey of the most important contributions to managerial marketing discourse from the earliest twentieth century onwards, covering traditions of research such as scientific selling, marketing management and service marketing and drawing from Michel Foucault's understanding of power and Ernesto Laclau and Chantal Mouffe's Discourse Theory. The analysis reveals that managerial marketing discourse has promoted a government of organizations that is centred around the customer and that the shifts and turning points in this rationality through time signify more fundamental shifts in emphasis in the type of power promoted by marketing discourse and the subject positions it ascribes to people.
