 Escorts Mk1 and Mk2 were built in huge numbers around the world, in Britain, France, Germany, Spain, Australia, New Zealand and South Africa. During the life of the models, no less than 130 different variants were produced, ranging from the 2-door base model saloon through four-doors, vans and estates, campers and plush Ghia models to the highly desirable sporting versions like the Twin-Cam and RS models. In addition there were special editions by companies such as Allard, Crayford, Broadspeed, Lawrencetune, Uren and Willment. For every variant, The Complete Catalogue of the Ford Escort Mk1 & Mk2 provides specifications and a description, and all of them are illustrated.

This text gives practical advice on how to power tune a high-performance version of Ford's 4-cylinder 1600, 1800 and 200 cc Pinto engine which has been used in Ford's most popular cars (Escort, Capri, Cortina, Sierra) over many years. Whether the reader wants a fast road car or to go racing, Des Hammill explains, without using technical jargon, how to build a reliable high power engine using as many stock parts as possible and without wasting money on parts and modifications that don't work. The text also covers Cosworth versions of Pinto engines and fitting Cosworth heads to normal blocks. It does not cover 1300, E-Max 1600 or American built 2300.

This is the thrilling, warts-engine-oil-and-all autobiography of the only racing driver Ayrton Senna ever feared - the 200mph flawed genius of Tommy Byrne. It tells the surreal tale of a poverty-stricken Dundalk kid's rise to become the only racing driver the great Ayrton Senna ever feared - and how it all went wrong from there. For a brief moment Tommy Byrne was arguably the world's greatest driver, the motor racing equivalent of George Best and Muhammad Ali rolled into one - A racer, a thief, a raconteur. This is the story of his improbable escape, his rapid rise and his spectacular and bizarre fall from grace. Peppared with dark humour and a cast of ridiculous characters, it is the antithesis of a fairytale - and it's all true. Hold on tight, the tale of Tommy Byrne is quite a ride - from fending for himself as the runt of a big Catholic litter in the '60s, running the gauntlet of the sectarian violence in the '70s, troubling Ayrton Senna and making it to F1 in the '80s, resorting to drugs in the aftermath and driving for a deluded billionaire madman and then gun-toting Mexicans in the '90s. It's raw, passionate, and - with Byrne's ability to tell it like it is - not for the faint-hearted.

Ford's motorsport center, at Boreham, Essex, first opened in 1963 and finally closed its doors at the end of 2003, bringing to an end 40 years of involvement with Ford's racing, rally and high-performance road car projects. Over the years, Boreham's products have gained fame for success in all the major world rallies and in numerous touring car championships around the world. Here is a unique, behind-the-scenes look at the motorsport center which gave birth to such legends as the Escort RS series, the RS200, the Sierra RS Cosworth and the Escort RS Cosworth.

Ford has been making special performance cars in Europe since the 1960s. From the original "Fast Ford", the Cortina GT Mk 1 of 1963, to the very latest Focus RS and StreetKa, family after family of sporty models have been developed, sold and campaigned in motorsport. The "Fast Ford" fraternity is one of the largest of all motoring enthusiasts movements, with a vast number of one-make events held in the UK and overseas. This book is a model-by-model guide and accurate reference source for the enthusiast. The book contains: details of all significant "Fast Fords"; the behind-the-scenes development story, evolution and technical specifications for each model; many previously unpublished photographs from the Ford RS brand over the years; full details of the rally cars, including the Escorts, Sierra RS Cosworth and the Focus WRC; and details of world-beating racing cars such as the Lotus-Cortina, Capri RS2600 and Sierra RS500 Cosworth.

How to Power Tune Ford Sohc 4-Cylinder Engines First Principles

The Official Biography of Keith Duckworth
Expert practical advice from an experienced race engine builder on how to build a high-performance version of Ford's 4-cylinder engine. Whether the reader wants a fast road car or to go racing, Des Hammill explains, without using technical jargon, how to build a reliable high-power engine using as many FoMoCo parts as possible and without wasting money on parts and modifications that don't work. Although the text of this book specifically relates to engines with carburetors, many of the modifications described are appropriate to

turbocharged/supercharged engines and engines with fuel injection.

When world rallying introduced a new formula for "World Rally Cars", Ford seized the opportunity. Malcolm Wilson's M-Sport organization was contracted to do the job, completed the design in less than a year, and spent the next 12 years campaigning this turbocharged, four-wheel-drive car all round the world. Working from state-of-the-art facilities, M-Sport built 97 Focus WRCs, all of which proved to be worthy of World level action when they won 44 World Championship events. Stellar drivers like Colin McRae, Carlos Sainz, Markko Märtin, Marcus Grönholm and Mikko Hirvonen all added to the mystique of an ultra-professional organization, along with substantial support and sponsorship from the likes of Martini, BP, and the state of Abu Dhabi. By building its in-house technical expertise, M-Sport not only engineered and developed the entire car on behalf of Ford, but gradually took over development of the 300bhp, 2.0-litre, turbocharged engine, and led the design of the complex four-wheel-drive transmissions provided by Xtrac. M-Sport's reputation exploded to the point that when regulations changed, the company immediately produced a new-generation Fiesta WRC, and kept the winning days rolling.

This book chronicles the life of Keith Duckworth OBE, the remarkable engineer famous for being co-founder of Cosworth Engineering and creating the most successful F1 engine of all time, the DFV. Although the company's engines are given due prominence, this isn't an intricate technical examination of their design, but a more rounded look at the life and work of their designer - work which included significant contributions to aviation, motorcycling, and powerboating.

Ford Mustang Red Book Veloce Publishing Ltd

From the late 19th century the progress of the movies has paralleled that of the motorcar. Now, for the first time, these developments are chronicled through the medium of the Movie

Poster. The book celebrates the progression from the simple and crude, through the functional, the ambitious, the barking mad, right up to today's high-tech, computer generated, often soulless examples of both cinema and automobile. By charting the poster art of the movies chronologically, the book takes you on a journey through the 20th Century in black and white, sepia, hand coloring, stone-litho, and glorious Technicolor. The book shows the obsessively accurate, the artist's impression, the photographic and the wildly imaginative depictions of the automobile. The development of product placement in marketing is well-illustrated. Why did the Mustang appear in so little publicity for Bullitt? Where was the Mini in most of the world's publicity for The Italian Job? Why wasn't the Alfa Romeo Dueto prominent in the advertising of The Graduate? The book doesn't provide intricate plot lines or vast cast lists; there are many reference works, both in books and on-line that supply this detail. Instead it shows how different countries promoted the same movie and give a brief guide to buying posters of movies safely. Primarily this is a book to wallow in, beautifully photographed artwork is guaranteed to bring memories favorite cars in movies and gives a fascinating insight into the evolution of cinema, marketing and the automobile. With 250 color photos, this book is a fascinating feast in all respects. With 250 pictures of rare and original posters and a star rating system for rarity, this is a beautiful book to browse and a valuable investment guide.
