This compelling story of exploration charts and celebrates humankind in space, from Sputnik's launch in 1957 through the Apollo Moon landings and the International Space Station to future missions to Mars and beyond. Spaceflight chronicles how, in the half-century that followed Sputnik, the world was revolutionized by space travel and exploration. The opening up of Earth's orbit to satellites led to a revolution in communications, monitoring of the environment, and materials science. For the human imagination, the impact has been even greater: the voyages of robotic space probes have transformed our view of the Solar System, while Earth-orbiting satellites and missions to the Moon have forever changed our view of ourselves. This book is a celebration of human ingenuity and imagination. From the work of pioneers like Wernher von Braun, Yuri Gagarin, and Neil Armstrong to the triumphs and tragedies that followed, it reveals the people, science, and technology that have propelled us into the Space Age.

Now a major motion picture! Every day a different body. Every day a different life.

Every day in love with the same girl. There's never any warning about where it will be or who it will be. A has made peace with that, even established guidelines by which to live: Never get too attached. Avoid being noticed. Do not interfere. It's all fine until the morning that A wakes up in the body of Justin and meets Justin's girlfriend, Rhiannon. From that moment, the rules by which A has been living no longer apply. Because finally A has found someone he wants to be with—day in, day out, day after day. With his new novel, David Levithan, bestselling co-author of Will Grayson, Will

Grayson, and Nick and Norah's Infinite Playlist, has pushed himself to new creative heights. He has written a captivating story that will fascinate readers as they begin to comprehend the complexities of life and love in A's world, as A and Rhiannon seek to discover if you can truly love someone who is destined to change every day. "A story that is always alluring, oftentimes humorous and much like love itself—splendid." —Los Angeles Times

When it comes to obesity, diabetes, heart disease, cancer, and depression, everything you believe is a lie. With research gleaned from the National Institutes of Health, T.S. Wiley and Bent Formby deliver staggering findings: Americans really are sick from being tired. Diabetes, heart disease, cancer, and depression are rising in our population. We're literally dying for a good night's sleep. Our lifestyle wasn't always this way. It began with the invention of the lightbulb. When we don't get enough sleep in sync with seasonal light exposure, we fundamentally alter a balance of nature that has been programmed into our physiology since day one. This delicate biological rhythm rules the hormones and neurotransmitters that determine appetite, fertility, and mental and physical health. When we rely on artificial light to extend our day until 11 p.m., midnight, and beyond, we fool our bodies into living in a perpetual state of summer. Anticipating the scarce food supply and forced inactivity of winter, our bodies begin storing fat and slowing metabolism to sustain us through the months of hibernation and hunger that never arrive. Our own survival instinct, honed over millennia, is now killing us. Wiley and Formby also reveal: -That studies from our own government research prove the role of sleeplessness in diabetes, heart disease, cancer, infertility, mental illness, and premature aging -Why the carbohydrate-rich diets recommended by many health professionals are not only ridiculously ineffective but deadly -Why the lifesaving information that can turn things around is one of the best-kept secrets of our day. Lights Out is one wake-up call none of us can afford to miss.

Sibeal has always known that she is destined for a spiritual life, and is committed to it with all her heart. The only thing left for her to do before she enters the nemetons is to spend the summer visiting her sisters, Muirrin and Clodagh, on the northern island of Inis Eala. But Sibeal has barely set foot on the island before a freak storm out at sea sinks a ship before her eyes. In spite of frantic efforts, only three survivors are fished alive from the water, and one of them, a man Sibeal names Ardal, clings to life by the merest thread. Life continues on the island, as it must, and Sibeal befriends Ardal as he begins to regain his health. But it becomes clear there is something unusual about the three shipwrecked strangers. Why won't the beautiful Svala speak? And what is it that the gravely ill Ardal can't remember - or won't tell? When a visiting warrior is found dead at the bottom of a cliff, and an attempt is made on Ardal's life, Sibeal finds herself a pawn in a deadly game. The truth will be far more astonishing than she could ever have believed - and the consequences for Sibeal unimaginable.

A key challenge in the first-year composition course is to inspire students as readers and to spark the kind of thoughtful classroom discussion that leads to solid academic writing. As series editor of "The Best American Essays" Robert Atwan constantly scours a wide range of print and online periodicals, bringing to "America Now" an unrivaled awareness of the best writing on today's hottest issues. To make these issues especially relevant for students, Atwan also explores hundreds of campus newspapers on the Internet to find the best student writing on current topics. These models by their peers from across the country show students that they, too, can share ideas through their own discussion and writing.

Even though we spend a third of our lives asleep, the behaviour remains largely a mystery. Sandra Huber's first book, *Assembling the Morrow: A Poetics of Sleep*, assumes that any attempt to solve this mystery requires new modes of experimentation. What happens when the line of a Berger's wave (an electroencephalography recording of brainwaves in sleep) turns into a line of poetry, an act of focused consciousness? The earliest readings of the sleeping brain, captured by EEGs in the 1930s, revealed that sleep is as active and lively as its daytime counterpart, not simply a passive state that naturally ensues when wakefulness ceases. Sleep not only assimilates the day that's passed, but also looks forward, assembling what's to come. To engage this concept, Huber sculpts a long poem onto the neural oscillations of sleep, in order to explore what is beneath them both: the conscious organism, the writer, and the written. In the field of the poem, where sleep is traditionally a metaphor for death, the idea that to be awake is to be alive is put to the test in a new kind of writing that invites a new kind of being. Prefaced by a discussion on poetry, the science of sleep, and those who have sought a language of consciousness - from Hans Berger to Gertrude Stein - *Assembling the Morrow* proposes that entering the mystery of sleep requires a radical reframing of our biases on what it means to be conscious.

The Italian-American mafia has its roots in a mysterious and powerful criminal network in Sicily. While the mythology of the mafia has been widely celebrated in American culture, the true origins of its rituals, laws, and methods have never actually been revealed. John Dickie uses startling new research to expose the secrets of the Sicilian mafia, providing a fascinating account that is more violent, frightening, and darkly comic than anything conceived in popular movies and novels. How did the Sicilian mafia begin? How did it achieve its powerful grip in Italy and America? How does it operate today? From the mafia's origins in the 1860s to its current tense relationship with the Berlusconi government, *Cosa Nostra* takes us to the inner sanctum where few have dared to go before. This is an important work of history and a revelation for anyone who ever wondered what it means to be "made" in the mob.
