EdPsych Modules uses an innovative modular approach and case studies based on real-life classroom situations to address the challenge of effectively connecting theory and research to practice. Succinct, stand-alone modules are organized into themed units and offer instructors the flexibility to tailor the book's contents to the needs of their course. The units begin with a set of

case studies written for early childhood, elementary, middle, and secondary classrooms, providing students with direct insight into the dynamics influencing the future students they plan to teach.

All 25 modules highlight diversity, emphasizing how psychological factors adapt and change based on external influences such as sex, gender, race, language, disability status, and socioeconomic background. The Fourth Edition includes over three hundred new references across all 25 modules, and expanded coverage of diversity in new diversity-related research. This title is accompanied by a complete teaching and learning package. Contact your SAGE representative to request a demo.

New and Improved - Revisit Five Simple Principles and Engage With Every Family Why haven't we been more successful in engaging every family in the educational lives of their children? Why do we still struggle with the notion of engaging every family as a conduit to improved student learning? This book outlines a pathway and process to engage every family, including those families that have been traditionally disengaged or disenfranchised. Updates to this second edition include updated research to ensure a firmer foundation for each of its five simple principles as well

as: - Reflections about implicit bias, equitable learning outcomes, and the role family engagement plays - A deeper dive into the idea of family efficacy, or empowering families to work alongside teachers for improved learning - A nuanced switch from building to developing relationships, and how trust is at the core of that subtle difference Join Dr. Steve Constantino as he shares what he has learned and how he has improved the Five Simple Principles for family engagement and its powerful effects upon student achievement.

This volume contains contributions from the NSF-CBMS Conference on Tropical Geometry and Mirror Symmetry, which was held from December 13-17, 2008 at Kansas State University in Manhattan, Kansas. It gives an excellent picture of numerous connections of mirror symmetry with other areas of mathematics (especially with algebraic and symplectic geometry) as well as with other areas of mathematical physics. The techniques and methods used by the authors of the volume are at the frontier of this very active area of research.
