For courses in Beginning Algebra.  
Understanding and Applying Mathematical  
Concepts The goal of the Bittinger  
Concepts and Applications Series is to help  
today's student learn and retain  
mathematical concepts. This proven  
program prepares students for the  
transition from skills-oriented elementary  
algebra courses to more concept-oriented

college-level mathematics courses. This  
requires the development of critical-  
thinking skills: to reason mathematically,  
to communicate mathematically, and to  
identify and solve mathematical problems.  
The new editions support students with a  
tightly integrated MyLab(tm) Math course;  
a strong focus on problem-solving,  
applications, and concepts, and the robust

MyMathGuide workbook and objective-based video program. In addition, new material - developed as a result of the authors' experience in the classroom, as well as from insights from faculty and students - includes more systematic review and preparation for practice, as well as stronger focus on real-world applications. Also available with MyLab Math. MyLab(tm) Math is an online homework, tutorial, and assessment program designed to work with this text to engage students and improve results. Within its structured environment, students practice what they learn, test their understanding, and pursue a personalized study plan that helps them absorb course material and understand difficult concepts. Note: You are purchasing a standalone product; MyLab does not come packaged with this content. Martin-Gay's focus on the student shapes her clear, accessible writing, inspires her constant pedagogical innovations, and contributes to the popularity and effectiveness of her video resources. This revision of Martin-Gay's worktext series continues her focus on students and what they need to be successful. This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. **ALERT:** Before you purchase, check with your instructor or review your course syllabus to ensure that you select the correct ISBN. Several versions of Pearson's MyLab &

Mastering products exist for each title, including customized versions for individual schools, and registrations are not transferable. In addition, you may need a CourseID, provided by your instructor, to register for and use Pearson's MyLab & Mastering products. Packages Access codes for Pearson's MyLab & Mastering products may not be included when purchasing or renting from companies other than Pearson; check with the seller before completing your purchase. Used or rental books If you rent or purchase a used book with an access code, the access code may have been redeemed previously and you may have to purchase a new access code. Access codes Access codes that are purchased from sellers other than Pearson carry a higher risk of being either the wrong ISBN or a previously redeemed code. Check with the seller prior to purchase.

The Bittinger series changed the face of developmental education with the introduction of objective-based worktexts that presented math one concept at a time. This approach allowed readers to understand the rationale behind each concept before practicing the associated skills and then moving on to the next topic. With this revision, Marvin Bittinger continues to focus on building success through conceptual understanding, while

also supporting readers with quality applications, exercises, and new review and study materials to help students apply and retain their knowledge.

For courses in college algebra. Visualize. Interact. Succeed. The Graphs and Models series by Bittinger, Beecher, Ellenbogen, and Penna is known for helping students "see the math" through its focus on visualization and technology. These texts continue to maintain the features that have helped students succeed for years: focus on functions, visual emphasis, side-by-side algebraic and graphical solutions, and real-data applications. With the Sixth Edition, visualization is taken to a new level with technology, and students find even more ongoing review. Also available with MyMathLab MyMathLab® is an online homework, tutorial, and assessment program designed to work with this text to

"For courses in elementary and intermediate algebra." Objective: Visualizing the Concepts One of the hallmarks of the Bittinger Developmental Math program is objective-based learning. In "Elementary and Intermediate Algebra: Graphs and Models, "Fifth Edition, the authors place special emphasis on

conceptual understanding, modeling, and visualization. Their goal is to help students see the math and learn algebra by making connections between the math and real-world applications. For the Fifth Edition, the authors have made many updates to the text and applications, as well as to the accompanying resources. These include important enhancements to the MyMathLab course, new Active Learning Figures, and the creation of a new interactive video program, To-the-Point Objective Videos, associated with a new student workbook, "MyMathGuide: Notes, Practice, and Video Path." Also available with MyMathLab MyMathLab is an online homework, tutorial, and assessment program designed to work with this text to engage students and improve results. With a visual, graphical approach that emphasizes connections among concepts, this text helps students make the most of their study time. The authors show how different mathematical ideas are tied together through their zeros, solutions, and x-intercepts theme; side-by-side algebraic and graphical solutions;

calculator screens; and examples and exercises. By continually reinforcing the connections among various mathematical concepts as well as different solution methods, the authors lead students to the ultimate goal of mastery and success in class.
