In his tour de force, of Business Voyages, Professor Stapleton combines the values of his pioneering American family, the leadership learned from quarterbacking winning football teams, the insights gained from decades of teaching future CEOs, and practical commercial acumen into a must-read chronicle for those seeking to recover from the economic chaos gripping our nation. William John Cox, public interest lawyer, retired prosecutor, Business Voyages is four books in one—it is an autobiography (so that we learn something about the author), a brief guide to transactional analysis (to learn briefly about scripts, ego states and games that people play), a small business case book (to learn from others) and it is a book for entrepreneurs (inviting

them to look at the available web and other resources, encouraging them to plan a business voyage and challenging them to actually go on that voyage). The entrepreneurs will smile as they go through this book and just look forward to so much that life can bring. From a business learning and teaching viewpoint this book has much to offer. (Dr.) Bill Dimovski, Former student and now Senior Lecturer in Finance, Deakin University, Australia, and a director of various companies engaged in construction and retail activities. In an informative chapter called "Games Educators Play," Richard Stapleton applies his expertise in management and mathematics to a persistent and vexing question: what weight should be given to university students' ratings of their professors. In a significant addition to the debate, Stapleton's hard data show that neither professors nor their students are well served when student ratings are used in personnel decisions. Judith D. Fischer,

Associate Professor of Law, Louis D. Brandeis School of Law, University of Louisville, Louisville, Kentucky In the storms of a postmodern age rife with narcissism, incompetence, fanaticism, greed and desperation, *Business Voyages* charts a course toward a more just and dependable economic society. It provides lessons for business schools, politicians, corporate CEOs, entrepreneurs, small business owners and citizens – for all of us - to help discover and co-construct better business worlds for all people around Earth.

The basic structure of the text continues to evolve and expand with numerous updates and revisions throughout. *Selling and Sales Management* Xlibris Corporation Addressing the immensely important topic of research credibility, Raymond Hubbard's groundbreaking work proposes that we must treat such information

with a healthy dose of skepticism. This book argues that the dominant model of knowledge procurement subscribed to in these areas—the significant difference paradigm—is philosophically suspect, methodologically impaired, and statistically broken. Hubbard introduces a more accurate, alternative framework—the significant sameness paradigm—for developing scientific knowledge. The majority of the book comprises a head-to-head comparison of the "significant difference" versus "significant sameness" conceptions of science across philosophical, methodological, and statistical perspectives. *A How-To Guide for OD Consultants* McGraw-Hill/Irwin This book focuses on business firms as catalysts and agents of social and economic change, and explores the argument that sustainable development is the perfect opportunity for businesses to strengthen the evolving notion of corporate social responsibility, while achieving long-term growth through innovation, research and

development.
