Business Essentials
 John Wiley & Sons
 With the impressive
 emergence of Islamic
 finance as a branch of
 Islamic economics, the
 need for a solid
 knowledge base that
 encompasses theories,
 thoughts and
 applications related to
 the subject increased
 in importance.
 However, writing about
 Islamic economics is a
 great challenge due to
 the differences in
 opinion on many of its
 issues. This includes
 methodologies for
 determining the Islamic

perspective on
 economic concepts and
 issues as well as
 applicable solutions for
 today's economic and
 social problems. It is
 further argued that
 Islamic economics
 topics are not as clear
 as those in
 conventional
 economics as they
 have their own
 religious, spiritual and
 social dimensions. The
 points of controversy
 have generated
 lengthy discussions.
 Moreover, Islamic
 economics
 encompasses a vast
 array of topics and
 approaches, from the
 purely theoretical,
 which may include
 philosophy or religious
 ideas, to mathematical
 and quantitative
 analyses. We tried our
 best throughout this
 textbook to simplify,
 clarify and summarise

these concepts to make them accessible to all readers including students, practitioners, academics and even interested non-specialists. This textbook presents, discusses and analyses various topics and issues related to Islamic economics ranging from philosophical, epistemological and methodological to microeconomic and macroeconomic perspectives. In this endeavour, the social aspect of Islamic economics—an essential part of the discipline—is not neglected. The textbook compares Islamic ideas and concepts related to economics with those in conventional economics to highlight Islamic economics as a

distinct field of knowledge with an emphasis on the ethical and social aspects. The authors have tried their level best to explain the theoretical concepts as simply as possible without ignoring today's realities and without compromising Shari'ah principles and objectives. One of the main objectives of the book is to provide the reader with Islamic economic ideas and solutions that are realistic and applicable within the current highly globalised economic and business environment, which is largely dominated by conventional interest-based systems and institutions. Despite being written for an elementary-level audience, this textbook can also be beneficial

to a wide range of specialist and non-specialist readers and seekers of knowledge. For those specialising in Islamic economics, it is an appropriate source of reference to gain an overview on different topics relating to the foundations of Islamic economics. At this point, however, it must be mentioned that each topic deliberated upon, by its nature, would require a book on its own to cover all its aspects. Therefore, further exploration is required for Islamic economics specialists. A list of references and recommended readings is provided for that purpose at the end of each chapter. On the other hand, students of mainstream economics, finance and

other academic majors will find this textbook an excellent resource for comprehensive knowledge of Islamic economics and its related issues. Universities may benefit from the different topics presented in this textbook in designing or preparing their economics courses at different levels based on their own curriculums and classes. This textbook could be used at the undergraduate level or even for a master's level economics or Islamic economics course, especially in an Islamic banking and finance programme or for an MBA having a specialisation in Islamic banking and finance where an economics or Islamic economics course is offered.

Furthermore, practitioners and interested readers who are seeking essential and simple knowledge about Islamic economics will also find this textbook to be a helpful guide. It is important to mention here that Islamic economics literature shows wide differences among the scholars in almost every subtopic. Presenting all opinions within a limited number of pages is almost impossible. However, with the great contribution of more than 60 scholars from a wide span of countries and from various economic schools, this book represents an important attempt to present the topics and issues from various perspectives with the maximum objectivity

possible. Through comprehensive content editing, the editors have striven to improve the flow of arguments, remove inconsistencies and put the ideas together in as coherent a manner as possible. However, the editors acknowledge that some biases and overlaps may still persist.

It covers the basics of Earth surface forms and processes, while reflecting on the latest developments in the field. Fundamentals of Geomorphology begins with a consideration of the nature of geomorphology, process and form, history, and geomorphic systems, and moves on to discuss: structure: structural landforms associated with plate

tectonics and those associated with volcanoes, impact craters, and folds, faults, and joints process and form: landforms resulting from, or influenced by, the exogenic agencies of weathering, running water, flowing ice and meltwater, ground ice and frost, the wind, and the sea; landforms developed on limestone; and landscape evolution, a discussion of ancient landforms, including palaeosurfaces, stagnant landscape features, and evolutionary aspects of landscape change. This third edition has been fully updated to include a clearer initial explanation of the nature of geomorphology, of land surface process and form, and of land-

surface change over different timescales. The text has been restructured to incorporate information on geomorphic materials and processes at more suitable points in the book. Finally, historical geomorphology has been integrated throughout the text to reflect the importance of history in all aspects of geomorphology. Fundamentals of Geomorphology provides a stimulating and innovative perspective on the key topics and debates within the field of geomorphology. Written in an accessible and lively manner, it includes guides to further reading, chapter summaries, and an extensive glossary of key terms. The book is

also illustrated throughout with over 200 informative diagrams and attractive photographs, all in colour.

Pain is the most common symptom bringing a patient to a physician's attention. Physicians training in pain medicine may originate from different disciplines and approach the field with varying backgrounds and experience. This book captures the theory and evidence-based practice of behavioral, psychotherapeutic and psychopharmacological treatments in modern pain medicine. The book's contributors span the fields of psychiatry, psychology, anesthesia, neurology, physical medicine and

rehabilitation, and nursing. Thus the structure and content of the book convey the interdisciplinary approach that is the current standard for the successful practice of pain management. The book is designed to be used as a text for training fellowships in pain medicine, as well as graduate courses in psychology, nursing, and other health professions.
