and to motivate, *Ear Candling in Essence* provides students with an exciting and accessible introduction to ear candling. Ear candling, or thermal-auricular therapy as it is sometimes known, has been used for millennia. This fascinating book covers the history of ear candling from its use by the ancient Egyptians, Greeks, Romans, and Aztecs to other world cultures including the Hopi Indians by whose name the treatment is often referred today. The book includes information on the anatomy and physiology of the ear, nose, and throat, the benefits of ear candling, and the contraindications to treatment. It then concentrates on

practical application with step-by-step color photographs and instruction on the treatment and massage techniques. Written in an accessible style with numerous FAQs, case studies and summaries, this book is the perfect introduction for students on short courses, professional therapists topping up their skills, and anyone wanting to learn more about the history and practice of ear candling.

In Oncology Massage - an integrative approach to cancer care the authors have created a textbook which will provide both experienced and inexperienced therapists with a resource to expand their knowledge and understanding of working with people with cancer. Cancer occurrence and survivorship are now so common that every massage therapist will at some time work with clients who have been through cancer treatment. The short and long-term effects of biomedical cancer treatment require massage therapy

adaptations to pressure, site, position and duration to provide safe and effective treatments. Informed massage therapists can support the body to promote overall wellness as well as identify the underlying secondary effects of cancer treatment that contribute to physical dysfunction. Oncology Massage: An Integrative Approach to Cancer Care provides massage therapists with essential information for: Treatment planning based on the physiology of cancer and cancer treatments Critical, thoughtful treatment decision making Consideration of the psychosocial effects of cancer Enhancing therapist self-

awareness and building a therapeutic relationship. The information is presented in a clear and simple format with plentiful use of illustrations and information boxes which allows it to be used both as a learning tool for those new to the field of oncology massage and as a resource for quick referral when working with new patients. The techniques of massage therapy change very little; it is the knowledge and understanding of their use that distinguishes a massage therapist. Oncology Massage is unusual in that it includes contributions not only from a range of experienced practitioners but also from people with cancer who have

received massage during and after cancer treatment. This feedback from clients provides an invaluable addition to the understanding of how massage can be used as a safe and effective part of cancer care. Nelson Thornes Completely revised to map to the recently-updated Professional Hairdressing and Barbering Level 3 National Occupational Standards, this new edition of Martin Green's bestselling textbook is the only book needed to successfully complete a Hairdressing or Barbering Level 3 NVQ qualification. This is the only Level 3 guide to be endorsed by both Habia and VTCT and is trusted by students and trainers. This book is suitable for those

studying for NVQ Level 3 qualifications with all awarding associations, including VTCT, City & Guilds, ITEC and other providers. It has been developed to equip learners with everything they need to gain their qualification and provide a handy reference throughout their career.
