Military Construction, Veterans Affairs, and Related Agencies Appropriations for 2012: VA OIG; VA budget; FY2012 budget submission: summary volume; FY2012 budget submission: Medical programs and IT programs; FY2012 budget submission: benefits and burial programs and departmental administration United Nations

This book traces the evolution of White House news management during America's changing media environment over the past two decades. Comparing and contrasting the communication strategies of Bill Clinton, George W. Bush, Barack Obama, and Donald Trump, it demonstrates the difficulty that all presidents have in controlling their messages despite a seemingly endless array of new media outlets and the great advantages of the office. That difficulty is compounded by new media's amplification of presidential character traits for good or ill. Facebook, Twitter, and YouTube notwithstanding, presidential power still resides in the "power to persuade," and that task remains a steep challenge. More than ever, presidential character matters, and the media presidents now employ report on the messenger as much as the message. The book also looks at the media strategies of candidates during the 2016 presidential campaign, puts presidential media use in global context, and covers the early phase of the Trump administration, the first true Twitter presidency.

## American Gridlock Routledge

Government and governance will be very different in the future than anticipated by the literature in the field.

*The Routledge Handbook of European Criminology* Jones & Bartlett Learning

The new second edition of this forward-thinking text goes beyond the discussion of health disparities to highlight the importance of health equity. As the title suggests, *Health Equity, Diversity and Inclusion: Contexts, Controversies, and Solutions* helps the reader understand key social justice issues relevant to health disparities and/or health equity, taking the reader from the classroom to the real world to implement new solutions. The new Second Edition features:

- Two new chapters: one on the impact of urban education on urban health and another covering the elderly and health equity
- Updated and enhanced coverage on men's health, demographic data, the importance of cultural proficiency, maternal mortality and Black women, and much more.
- Current trends and movements, including the role of social media in the provision of health care information for improved health literacy; mass incarceration and criminal justice reform; and much more.

## *Daily Graphic* Routledge

Changing business environments and information technology advancements fundamentally reshaped the traditional information landscape in our contemporary society, urging companies to seek innovative ways to diffuse and manage assets on a global scale. It is crucial for society to understand the new methodologies and common practices that organizations can utilize to leverage

their knowledge into practice. *Global Information Diffusion and Management in Contemporary Society* is an essential reference source featuring research on the development and implementation of contemporary global information management initiatives in organizations. Including coverage on a multitude of topics such as data security, global manufacturing, and information governance, this book explores the importance of information management in a global context. This book is ideally designed for managers, information systems specialists, professionals, researchers, and administrators seeking current research on the theories and applications of global information management.

**Unfinished Business** Elsevier

A 28-month Stand-By Arrangement (SBA) for the Dominican Republic was introduced against the global recession. The main objective of the program is to limit the procyclicality of policies. The countercyclical macroeconomic program improved confidence and fostered aggregate demand. Monetary policy remained accommodative with a record low policy rate. Fiscal policy became countercyclical. All structural benchmarks were observed. IMF staff supports the waiver requests and the completion of the first SBA review given the proposed actions and satisfactory performance.

**Handbook of Vacuum Technology**

Routledge

Loss of muscle mass and increased fibrosis characterize both sarcopenia of aging and muscular dystrophy. Research is increasingly showing that these two conditions also share several pathophysiological mechanisms, including mitochondrial dysfunction, increased apoptosis, abnormal

modulation of autophagy, decline in satellite cells, increased generation of reactive oxygen species, and abnormal regulation of signaling and stress response pathways. This Research Topic will cover several mechanisms involved in aging and dystrophic sarcopenia and explore the therapeutic potential of various strategies for intervention.

*Handbook of Research on Innovations in Systems and Software Engineering*

Cambridge University Press

This new book brings together some of the leading criminologists across Europe, to showcase the best of European criminology. This Handbook aims to reflect the range and depth of current work in Europe, and to counterbalance the impact of the – sometimes insular and ethnocentric – Anglo-American criminological tradition. The end-product is a collection of twenty-eight chapters illustrating a truly comparative and interdisciplinary European criminology. The editors have assembled a cast of leading voices to reflect on differences and commonalities, elaborate on theoretically grounded comparisons and reflect on emerging themes in criminology in Europe. After the editors' introduction, the book is organised in three parts: five chapters offering historical, theoretical and policy oriented overviews of European issues in crime and crime control; seven chapters looking at different dimensions of crime in Europe, including crime trends, state crime, gender and crime and urban safety; fifteen chapters examining the variety of institutional responses, exploring issues such as policing, juvenile justice, punishment, green crime and the role of the victim. This book gives some indication of the richness and scope of the emerging comparative European criminology and

will be required reading for anyone who wants to understand trends in crime and its control across Europe. It will also be a valuable teaching resource, especially at postgraduate level, as well as an important reference point for researchers and scholars of criminology across Europe.

Military Construction, Veterans Affairs, and Related Agencies Appropriations For 2011, Part 6, 2010, 111-2 Hearings SAGE

"This book offers professional teacher educators a rare opportunity to harvest the thinking of pioneering colleagues spanning dozens of universities, and to benefit from the creativity, scholarship, hard work, and reflection that led them to the models they describe"--Provided by publisher.

*Military Construction, Veterans Affairs, and Related Agencies Appropriations for 2013* Taylor & Francis

This book provides a practical, multidisciplinary approach to support a broad range of health professionals, social workers, public health workers and others tasked with providing health and care to young adults. The continuum of life begins with the health and wellness of parents prior to conception, followed by embryonic and fetal development, and continues throughout life. Each person's life stages prepare them for the next and determine their health outcome and wellbeing over time. The text highlights the importance of promoting health throughout the lifespan, the influence of intergenerational health, and the concept of the Developmental Origins of Health and Disease in epigenetic processes and embryology. Authors underscore the importance of advancing health equity and lift up some of the ethical considerations in this work. The authors explore specific interventions in four major categories:

Lifestyle, Infections, Nutrition, and Contraception / Pregnancy Planning (LINC). Preconception care is defined by the World Health Organization as the provision of biomedical, behavioural and social health interventions to women and couples before conception.

Preconception care includes evidence-based interventions to improve health status, to reduce behaviours, individual and environmental factors that contribute to poor health outcomes. This book offers readers evidence-based guidance regarding fertility awareness and sperm health, genetic counselling and lifestyle assessments, as well as mental wellbeing, alcohol, tobacco and pharmacotherapy, and specialist care for those with chronic conditions, including a review of medications. It also covers relevant infections, including HIV and the Zika virus, as well as different types of environmental and occupational exposure. The book employs a framework focusing on health promotion, the social determinants of health, and the science behind preconception care. Strategies for improving preconception and interconception health, including examples from around the globe, are described in detail.

Energy and Water Development Appropriations for 2010: Dept. of Energy fiscal year 2010 justifications Routledge

Arab Society: A Compendium of Social Statistics is the latest in a series of biennial compendia of the Statistics Division of the Economic and Social Commission for Western Asia (ESCWA). It provides a general view of Arab society in the ESCWA region and the changes it has encountered over time. Drawing on data provided mainly from national statistics offices (NSOs), it focuses on issues of population, labour, housing conditions, education, poverty, health

and culture. Each issue of the Compendium focuses on a single theme. The twelfth issue of the Compendium concerns household composition and family formation.

*Arab Society. Issue 12* Orpen Press Atomic, molecular, and optical (AMO) science illustrates powerfully the ties of fundamental physics to society. Its very name comes from three of the twentieth century's greatest advances: the establishment of the atom as the building block of matter; the development of quantum mechanics, which made it possible to understand the inner workings of atoms and molecules; and the invention of the laser. Advances made possible by the scientists in this field touch almost every sphere of societal importance in the past century. Navigation by the stars gave way to navigation by clocks, which in turn has given way to today's navigation by atomic clocks. Laser surgery has replaced the knife for the most delicate operations. Homeland security relies on a multitude of screening technologies based on AMO research to detect toxins in the air and hidden weapons in luggage or on persons, to name a few. New drugs are now designed with the aid of x-ray scattering to determine their structure at the molecular level using AMO-based precision measurement techniques. And the global economy depends critically on high-speed telecommunication by laser light sent over thin optical fibers encircling the globe. AMO scientists are proud of their central role in science and society in the twentieth century, and they have been rewarded with numerous Nobel prizes over the past decade, including the 2005 prize in physics. But in this report we look to the future. The National Research Council of the National Academies has

undertaken a study of opportunities in atomic, molecular, and optical (AMO) science and technology over roughly the next decade. The committee carrying out the AMO 2010 study, has been asked to assess the state of AMO science, emphasizing recent accomplishments and identifying new and compelling scientific questions. The six grand challenges, summarized below, will each form a chapter of the committee's final report: What is the nature of physical law? What happens at the lowest temperatures in the universe? What happens when we turn up the power? Can we control the inner workings of a molecule? How will we control and exploit the nanoworld? What lies beyond Moore's law? Controlling the Quantum World of Atoms, Molecules, and Photons: An Interim Report provides a preview of the final document. It summarizes the committee's opinion on the key opportunities in forefront AMO science and in closely related critical technologies and discusses some of the broad-scale conclusions of the final report. It also identifies how AMO science supports national R&D priorities. IGI Global

American Gridlock is a comprehensive analysis of polarization encompassing national and state politics, voters, elites, activists, the media, and the three branches of government.

### **Tourism Policy and Planning in Bangladesh** Rowman & Littlefield

The Internet of Things is a wide-reaching network of devices, and these devices can intercommunicate and collaborate with each other to produce variety of services at any time, any place, and in any way. Maintaining access control, authentication and managing the identity of devices while they interact with other devices, services and people

is an important challenge for identity management. The identity management presents significant challenges in the current Internet communication. These challenges are exacerbated in the internet of things by the unbound number of devices and expected limitations in constrained resources. Current identity management solutions are mainly concerned with identities that are used by end users, and services to identify themselves in the networked world. However, these identity management solutions are designed by considering that significant resources are available and applicability of these identity management solutions to the resource constrained internet of things needs a thorough analysis. Technical topics discussed in the book include: Internet of Things; Identity Management; Identity models in Internet of Things; Identity management and trust in the Internet of Things context; Authentication and access control; Identity management for Internet of Things contributes to the area of identity management for ubiquitous devices in the Internet of Things. It initially presents the motivational factors together with the identity management problems in the context of Internet of Things and proposes an identity management framework. Following this, it refers to the major challenges for Identity management and presents different identity management models. This book also presents relationship between identity and trust, different approaches for trust management, authentication and access control. Key milestones identified for Identity management are clustering with hierarchical addressing, trust management, mutual authentication and access control. Identity management for

Internet of Things is ideal for personnel in computer/communication industries as well as academic staff and master/research students in wireless communication, computer science, operational research, electrical engineering and telecommunication systems Internet, and cloud computing. Content Preface; 1. Internet of Things Overview; 2. Elements of Internet of Things Security; 3: Identity Management Models; 4. Identity Management and Trust; 5. Identity Establishment; 6. Access Control; 7. Conclusions

*Pathophysiological Mechanisms of Sarcopenia in Aging and in Muscular Dystrophy: A Translational Approach*  
National Academies Press

This book is ground breaking in its study of business actors in climate and energy politics. While various studies have demonstrated the influence of business actors across multiple policy domains, this is the first to examine the behaviour of business actors in energy centric industries in the US that will be vital for achieving a clean energy transition, namely the oil, gas, coal, utility, and renewable industries. Drawing on almost 80 interviews with senior energy executives, lobbyists, and policymakers, it asks two central questions: (i) how and why are business actors shaping energy policy contests in the US? And (ii) what are the implications for policymakers? In answering these questions, this book provides new insights about the preferences and strategies of business in the energy sector, and, significantly, it identifies strategies for policymakers seeking to regulate energy in the face of political resistance from incumbent fossil fuel industries. This book will be of particular value to students, scholars, and policymakers working in the fields of energy, climate, and environmental

politics, as well as individuals generally interested in the role that business exerts over policy processes.

*Dominican Republic* Jones & Bartlett Learning

This book examines the history behind the formulation, implementation, and evaluation of population policies in the more developed, the less developed, and the least developed countries from 1950 until today, as well as their future prospects. It links population policies with the theories of the demographic, epidemiological, and migratory transitions. It begins by summarizing the demographic situation around the world, with an emphasis on population policies and their underlying theories. Then, it reviews the early efforts to reduce mortality and fertility in the developing countries. This is followed by a description of the internationalization of the debate on population issues and the transformation of these programs into more formal population policies, particularly in the developing countries. The book reviews also the situation of the developed countries and their specific challenges – sub-replacement fertility, population aging, and immigration – and examines the effectiveness of population policies. It also explores the way forward and future prospects for population policies over the next decades. The book provides numerous concrete examples from all over the world, and show how population policies are actually implemented and what have been their successes as well as their constraints. Above all, the book highlights the importance of understanding underlying demographic trends when assessing the development prospects of any country. The book is recommended for not only demographers, social scientists, and

policymakers but also economists and political scientists who are interested in social and demographic change around the world. Demography students and researchers who are interested in applying knowledge on population trends and prospects in designing and evaluating public policies will find this an invaluable reference work.

**World Population Policies** Rowman & Littlefield Publishers, Incorporated  
With social and community services coming under increasing pressure as austerity continues, *Unfinished Business* examines how social policy has operated in Ireland and how it has been affected by consistent government cutbacks. It examines a wide range of issues important to social care students, such as poverty, homelessness, disability, immigrants, mental health and many other issues pertinent to Irish society today. This book: Is the first Irish social policy textbook written for social care students  
Poses important questions about not only social policy approaches but also policy failings, and makes the case for a move towards social policy regulation  
Is useful to students from other disciplines, such as community work, early childhood studies, nursing, addiction studies and child protection studies  
Is written in a clear and accessible style and laid out in a user-friendly manner  
The book is aimed at undergraduate students in social studies, social science and public administration, and will also prove useful to practitioners who seek to broaden their understanding of social care.

News Media and the Financial Crisis Routledge

This volume contains a collection of articles that examines workplace flexibility, work-family conflict, and workers' increasing lack of leisure time and how it pertains to long-term U.S. national stability. The contributors argue that current workplaces are not meeting the needs of today's workers, and the lack of workplace flexibility is having huge human capital costs that are affecting every sector of society. They explore how flexibility, despite having fixed costs, can be an effective tool for attracting and retaining employees and increasing productivity -- the key being to make the workplace flexible in ways that are profitable for employers and also engage workers to feel more satisfied and committed to their jobs.

This book accounts that Bangladesh is a potential destination in South Asia exhibiting a steady growth in its economy along with socio-cultural developments. With a population of over 170 million, the country possesses significant possibilities in (domestic) tourism. This book explicates that increasing number of upper social classes along with their affordability to spend on tourism and leisure activities has recalled attention for the development of this emerging industry. This book comprehensively examines the overall tourism and hospitality contexts in Bangladesh under the lens of current policy and administrative frameworks. In so doing, the contribution of tourism and hospitality industry has

been highlighted in the economy of Bangladesh as a means to creating employment opportunities. Further, the book addresses that contributions remain uneven and distributed improperly and to date the tourism industry has not been offered the desired attention in supporting examples in this regard. Nonetheless, tourism and hospitality education and research have been intensifying in recent years across numerous higher academic institutions (e.g. public and private universities) in Bangladesh. This book explores critically the requirement of supportive roles of key tourism and hospitality stakeholders both from public and private domains. Ultimately, the book signifies collaborative and continuous efforts are imperative that partake both the practitioners and the academia in the development and execution of inclusive and functional tourism policy and planning in Bangladesh.
