The Apple and the Thorn Univ of California Press

Based on Bentley and Ziegler's best-selling, comprehensive survey text, Traditions & Encounters: A Brief Global History provides a streamlined account of the cultures and interactions that have shaped world history. The text's strong hallmark themes of traditions (the formations and development of the world's major societies) and encounters (cross-cultural interactions and exchanges) bring focus to the human experience and help turn the giant story of world history into something more manageable to teach and learn. At the same time, an effective part structure organizes developments into seven eras of global history, putting events into perspective and creating a framework for cross-cultural comparisons. With an engaging narrative, visual appeal, extended pedagogy, and a strong emphasis on critical thinking, this concise version offers enhanced flexibility and affordability without sacrificing the features that have made the complete text a favorite among instructors and students alike.

Money is the key to learning economics. If the monetary system is well understood, it will clarify seemingly impenetrable economic events. The History of Money for Understanding Economics is indeed the indispensable reference to decrypt economics, and it does so in an enthralling way, from antiquity to the present day, with readily accessible language. This book answers questions such as: How did money and banking appear? Why did gold coins vanish after circulating for centuries? What is inflation? What is the IMF? The History of Money for Understanding Economics also explains new interpretations of history that have underscored how monetary changes have catalyzed events from the fall of the Roman Empire to World War II and beyond. Considering such past monetary influences, Lannoye challenges the reader with a monetary innovation to speed up the economy (and finance a green economy).

The unfathomable rate of Black males in education should result in a national call to action. Across the country Black males represent only 2% of the teaching workforce. By the year 2024, minority students will be the majority, yet our current education workforce does not reflect this growing trend in what has been called "The Browning of America." Why is it acceptable that a student can matriculate from Kindergarten through twelfth grade and not have one Black male as his or her teacher? Why has it been a challenge to recruit and in many instances retain Black males in the classroom? *Unopened Books* explains what is referenced in the book as the Five Black Male Deterrents in Education. Through the personal narrative of Jermaine D. Gassaway, a native Washingtonian, educator, and school leader; coupled with practical solutions, *Unopened Books* provides insight to multiply the 2%. It is intended to not only be a provocative conversation starter but an actionable approach to increase the number of Black men in the classroom.

"Managerial styles are influenced by habit, familiarity, and workplace culture. It's no wonder that well-intentioned professionals doing their best to be good organizational leaders often repeat unhelpful supervisory practices experienced in their early careers, even if they disliked them at the time. In the DUH! Book of Management and Supervision, the author disagrees with many accepted leadership principles (unabashedly referring to them as myths) and makes new and different approaches easier to imagine. Her challenging and controversial concepts illustrated with poignant stories suggest common-sense and immediately applicable alternatives more suitable in today's workplace"--Back cover.

Why would anybody believe that God could sanction terrorism? Why has the rediscovery of religion's power in recent years manifested in such a bloody way? What, if anything, can be done about it? *Terror in the Mind of God*, now in its fourth edition, answers these questions and more. Thoroughly revised and expanded, the book analyzes in detail terrorism related to almost all the world's major religious traditions: European Christians who oppose Muslim immigrants; American Christians who support abortion clinic bombings and militia actions; Muslims in the Middle East associated with the rise of ISIS, al Qaeda, and Hamas; Israeli Jews who support the persecution of Palestinians; India's Hindus linked to assaults on Muslims in the state of Gujarat and Sikhs identified with the assassination of Indira Gandhi; and Buddhist militants in Myanmar affiliated with anti-Muslim violence and in Japan with the nerve gas attack in Tokyo's subway. Drawing from extensive personal interviews, Mark Juergensmeyer takes readers into the mindset of those who perpetrate and support violence in the name of religion. Identifying patterns within these cultures of violence, he explains why and how religion and violence are linked and how acts of religious terrorism are undertaken not only for strategic reasons but to accomplish a symbolic purpose. *Terror in the Mind of God* continues to be an indispensable resource for students of religion and modern society.
