Welcome to the companion website for Manipulation of the Spine, Thorax and Pelvis, 4e. You now have access to video sequences demonstrating the techniques described in part B of the book (with the exception of the last technique described in chapter 11). Elsevier: · Welcome Movement of the

thoracic spine is coupled with movement of the adjoining ribs. Thoracic extension involves concurrent posterior rotation (external torsion) and depression of the posterior ribs with elevation of the anterior ribs. Bending to the side is a combination of spinal segments side bending, ribs on the same come together while ribs on the opposite side separate.
