From the August 1957 VIR race program: "The rolling Virginia hills have been painstakingly clad with an ultra-smooth skin of macadam to provide a course of great natural beauty. The superb spectator visibility is nicely equated to a road layout that will test the best in racing machines and men." In the late 1950s, a group of sports car enthusiasts dreamed of creating a first-class racing facility. The result was Virginia International Raceway, a challenging 3.2-mile course with 12 turns, 2 straightaways, and over 100 feet of elevation change. Located in southern Virginia, east of Danville and just across the North Carolina border, the track opened in 1957. During VIR's first 18 years of existence, races featured some of the top names in American motorsports including Carroll Shelby, Roger Penske, Walt Hansgen, and Richard Petty. The track also hosted numerous important events including SCCA Nationals, the President's Cup, a Trans-Am race in the first season of that circuit, as well as IMSA races in the early 1970s. Facing financial difficulties, the track shut down in 1974, and for the next 25 years VIR was a cow pasture. It was reopened in 2000 and the outstanding new facility is again one of the top racing venues in the country.

CONSER CATALOGING MANUAL 2000 UPDATE NO. 12 (SPRING). Haynes Manuals N. America, Incorporated

Riding motorcycles is fun, but author Ken Condon maintains that there is a state of consciousness to be achieved beyond the simple pleasure of riding down the road. Riding in the Zone helps riders find that state of being. It's the experience of being physically and mentally present in the moment, where every sense is sharply attuned to the ride. Your mind becomes silent to the chatter of daily life, and everyday problems seem to dissolve. You feel a deeper appreciation for life. Your body responds to this state of being with precise, fluid movements, you feel in balance, your muscles are relaxed, and it seems as though every input you make is an expression of mastery. This is "the Zone." Condon identifies all of the factors that affect entering the Zone and addresses each one individually, from the development of awareness and mental skills to mastering physical control of the motorcycle. At the end of each chapter are drills designed to transform the book's ideas into solid, practical riding skills. Riding in the Zone takes riders to the next level in their skill set.

A Christmas Treasury for Latter-Day Saint Families Veloce Publishing Ltd

Best in Show is a collection of photographs of well-groomed and award-winning dogs by New York City-based photographer Dolly Faibyshev. The images from the Westminster Kennel Club Dog Show and beyond focus on the unique—and often humorous—relationship between each dog and their

handler. Dolly Faibyshev focuses on kitsch, irony, and the larger than life human and canine characters that make up Best in Show. The result is a colorful, vibrant, campy, and satirical take on this specific slice of Americana. • The colorful, closely cropped juxtapositions of each coiffed canine contestant and their dedicated human are both humorous and charming. • Sure to delight fans of all breeds of dogs • A universal and ideal book for all canine lovers with a sense of humor Best in Show captures a specific subculture of dog devotees primarily from the infamous Westminster Kennel Club Dog Show at Madison Square Garden in New York. • A perfect book for anyone who is completely and totally obsessed with dogs and the Westminster Kennel Club Dog Show • Photographers and contemporary art lovers will also love this celebration of Dolly Faibyshev's work • Great for fans of The Dogist: Photographic Encounters with 1,000 Dogs by Elias Weiss Friedman, Dogs by Lewis Blackwell and Tim Flach, and Underwater Dogs by Seth Casteel

Cornering Confidence provides motorcycle riders with a simple progression of skills to elevate their riding within a short period of time. The ultimate goal of the book is mastering the often misunderstood trail braking technique. These advanced skills can take years to discover separately, but have been condensed here into a nice little package. Learn the secrets to 100% cornering confidence.

New Century Senior Physics Arcadia Publishing

I have physical scars from past surgeries, however, I have emotional scars as well. They were buried deep inside (hidden). It wasn't until my mother died was I able to "catch my breath" and to make sense of or process the emotional pain I had endured due to her prescription drug addiction, resulting in my own addictions.

Carrying Coal to Columbus Deseret Book

This best-selling book is also "#1 book in motorcycle safety" (Nielsen BookScan) and essential reading for all motorcyclists regardless of their years of experience. Author David L. Hough, a revered motorcycle author, columnist, and riding-safety consultant, lays out a clear course for all riders who want to sharpen their handling skills and improve their rides. This second edition, expanded and now in full color, offers new riders and road warriors the exact kind of advice they need to be prepared for anything when on the road, how to avoid accidents, and how to handle the unexpected. Hough, who began motorcycling in the 1960s, tackles every imaginable topic—from the mechanics of the bike, selection of the right-sized bike, and basic riding skills to night riding, group outings, and advanced survival tactics. In the chapter called "Motorcycle Dynamics," Hough spells

out the equipment needed and basic skills required to control a bike, and specifically keeping the rider's safety and ability to avoid potentially injurious or fatal crashes. The author is outspoken and direct when it comes to safety, and he emphasizes the importance of the rider's braking abilities and spells out how to improve them. The chapter offers six tried-and-true techniques for quick-stop tactics, critical for every rider to understand and master. He also addresses other vital skills that riders need to evaluate and improve, such as turning, maintaining balance and stability, and steering. He defines, compares, and analyzes the ins and outs of steering and control: direct steering, countersteering, push steering, out-tracking, coning, u-turns, and directional control. The chapter called "Cornering Habits" is a virtual master class in acceleration, deceleration, use of weight, throttle, leaning, and handling challenging terrain. Hough's skill as a photographer and illustrator adds a graphic element to his books that leads to immediate understanding of the concepts he explains. The detail offered in each section of the book can only come from decades on the road, and the author is the consummate instructor, assigning homework to the readers in the form of exercises to practice and improve specific techniques that he outlines and illustrates in the text. Any rider who would venture out on the road without David Hough's voice in his head takes an unnecessary risk with his own life. Proficient Motorcycling takes riders from long, snaking country roads right into the traffic of the big city, and Hough offers the best advice for riders dealing with the most challenging conditions, whether it's road construction, snap-jawed intersections, skateboarders, or suddenly slippery road surfaces. A critical section of the book offers riders advice on how to deal with automobiles, including aggressive car drivers, oblivious SUV drivers, or "blind" truck drivers. The book offers the kind of first-hand experience that can literally save riders' lives, as illustrated in the chapters "Booby Traps" and "Special Situations," which offer evasive tactics and advice to avoid and handle everything from slick surfaces, curbs, and construction plates to ferocious dogs, hazardous wildlife, and difficult weather conditions. The final chapter of the book, "Sharing the Ride," is geared toward experienced riders who travel together in groups or who travel with a second passenger on the bike. Topics covered are formation, packing for trips, communication between riders, sidecars, trikes, and more. The book concludes with a resources section of organizations, training schools, educational tools, and websites; a glossary of 80+ terms; and a complete index.

 "Amazingly raw and candid . . . Come As You Are is as good as rock bios get" —Billboard
 Nirvana came out of nowhere in 1991 to sell nearly five million copies of their landmark album Nevermind, whose thunderous sound and indelible melodies embodied all the confusion, frustration, and passion of the emerging Generation X. Come As You Are is the close-up, intimate story of Nirvana—the only book with exclusive in-depth interviews with bandmembers Kurt Cobain, Krist Noveselic, and Dave Grohl, as well as friends, relatives, former bandmembers, and associates—now updated to include a final chapter detailing the last year of Kurt Cobain's life, before his tragic suicide in April 1994.

Design Transactions presents the outcome of new research to emerge from 'Innochain', a consortium of six leading European architectural and engineering-focused institutions and their industry partners. The book presents new advances in digital design tooling that challenge

established building cultures and systems. It offers new sustainable and materially smart design solutions with a strong focus on changing the way the industry thinks, designs, and builds our physical environment. Divided into sections exploring communication, simulation and materialisation, Design Transactions explores digital and physical prototyping and testing that challenges the traditional linear construction methods of incremental refinement. This novel research investigates 'the digital chain' between phases as an opportunity for extended interdisciplinary design collaboration. The highly illustrated book features work from 15 early-stage researchers alongside chapters from world-leading industry collaborators and academics.

New Century Senior Physics meets the global objectives of the 2007 Queensland Senior Physics syllabus in terms of Knowledge and Conceptual Understanding, Scientific Investigation and Evaluating and Concluding. All 10 key concepts of the syllabus have been developed in varied contexts along with an extensive range of mandatory and elective key ideas.
Key Features:
 A contextual approach throughout—each chapter begins with questions, problems or situations that experienced teachers have found to spark students' interest
 A familiar format allowing students to quickly find information, whatever the context they may be studying
 Teachers can develop contexts of their own choosing without restriction to a narrow set of pre-chosen contexts
 An easy to follow progression through focus questions to the underlying key concepts and ideas
 Many and varied contextualised questions, problems and puzzles, including traditional closed-response questions as well as open-ended and stimulus-response questions - all essential for understanding
 Novel 'Challenge' questions - drawn from unfamiliar situations and designed to develop the higher order thinking (HOT) skills
 End-of-chapter review questions - ranging from simpler practice questions requiring straight-forward use of principles and problem-solving (one and two star difficulty) to more challenging extension questions (three stars) requiring HOT skills
 A focus on the tentative nature of scientific knowledge where throughout history accidents and serendipity have gone hand-in-hand with scientific investigation
 An open, 'chatty' writing style that speaks directly to students but with sufficient depth to cover information they will need for tertiary studies in science and other physics-related areas such as engineering, medical science, computing, human movement etc.
 Gender-balanced contexts using material drawn from boys' and girls' spheres of experience
 Vicon-coded stimulus ideas for experimental and non-experimental investigations suggested by physics teachers throughout the state
 Online Support
 Visit the authors' Web Page containing on-line worked solutions to the end-of-chapter extension (challenging, complex, novel) questions and the Novel Challenge text-box questions, suggestions for Extended Experimental Investigations and hints to students who are about to undertake them, as well as a host of other resource material useful in developing a school work program.
 Go to seniorphysics.com and select the textbook webpage.

After more than 50 years, Mazda Raceway Laguna Seca near Monterey is regarded as one of the most famous racetracks in the world. Mazda Raceway offers competitors challenges unlike any other with its mix of corners, which includes the Corkscrew, where drivers encounter the largest elevation change in the shortest distance of any track worldwide. The raceway also offers spectators sweeping open vistas of the track, and all within view of the Pacific Ocean.

Dialed Motorbooks

As early as 1755, explorers found coal deposits in Ohio's Hocking Valley. The industry that followed created towns and canals and established a new way of life. The first shipment of coal rolled into Columbus in 1830 and has continued ever since. In 1890, the United Mine Workers of America was founded in Columbus. Lorenzo D. Poston became the first of the Hocking Valley coal barons, and by the start of the twentieth century, at least fifty thousand coal miners and their families lived and worked in Athens, Hocking and Perry Counties. Authors David Meyers, Elise Meyers Walker and Nyla Vollmer detail the hard work and struggles as they unfolded in Ohio's capital and the Little Cities of Black Diamonds.

This second edition emphasizes the environmental impact on reproduction, with updated chapters throughout as well as complete new chapters on species such as sharks and rays. This is a wide-ranging book that will be of relevance to anyone involved in species conservation, and provides

critical perspectives on the real utility of current and emerging reproductive sciences. Understanding reproductive biology is centrally important to the way many of the world's conservation problems should be tackled. Currently the extinction problem is huge, with up to 30% of the world's fauna being expected to disappear in the next 50 years. Nevertheless, it has been estimated that the global population of animals in zoos encompasses 12,000 - 15,000 species, and we anticipate that every effort will be made to preserve these species for as long as possible, minimizing inbreeding effects and providing the best welfare standards available. Even if the reproductive biology community cannot solve the global biodiversity crisis for all wild species, we should do our best to maintain important captive populations. Reproductive biology in this context is much more than the development of techniques for helping with too little or too much breeding. While some of the relevant techniques are useful for individual species that society might target for a variety of reasons, whether nationalistic, cultural or practical, technical developments have to be backed up by thorough biological understanding of the background behind the problems.
