Chapter 2: Visualizing and Manipulating Data Using R. Chapter 3: Data Visualization with Lattice. Chapter 4: Cluster Analysis. Chapter 5: Agglomerative Clustering Using `hclust()` Learning Predictive Analytics with R Book Description: R is statistical software that is used for data analysis. There are two main types of learning from data: unsupervised learning,

where the structure of data is extracted automatically; and supervised learning, where a labeled part of the data is used to learn the relationship or scores in a target attribute. As important information is often hidden in a lot of data, R helps to extract that information with its many standard and cutting-edge statistical functions.
