### The Guerilla Film Makers Handbook OR Books

In this indispensable guide to digital film-making, leading filmmaker, Mike Figgis, offers the reader a step-by-step tutorial in how to use digital technology so as to get the best from it. He outlines the equipment and its uses, and provides an authoritative guide to the shooting process - from working with actors to lighting, framing, and camera movement. He further dispenses wisdom on the editing process and the use of sound and music, all the while establishing a sound aesthetic basis for the digital format. This handbook is essential whether your goal is to make no-budget movies, or simply to put your video camera to

more use than just holidays and weddings.

*The Little Blue Book for Filmmakers* Taylor & Francis

This fluent and comprehensive field guide responds to increased interest, across the humanities, in the ways in which digital technologies can disrupt and open up new research and pedagogical avenues. It is designed to help scholars and students engage with their subjects using an audio-visual grammar, and to allow readers to efficiently gain the technical and theoretical skills necessary to create and disseminate their own trans-media projects. *Documentary Making for Digital Humanists* sets out the fundamentals of filmmaking, explores academic discourse on digital documentaries and online distribution, and considers the place of this discourse in the evolving academic landscape. The book walks its readers through the intellectual and practical processes of creating digital media and documentary projects. It

is further equipped with video elements, supplementing specific chapters and providing brief and accessible introductions to the key components of the filmmaking process. This will be a valuable resource to humanist scholars and students seeking to embrace new media production and the digital landscape, and to those researchers interested in using means beyond the written word to disseminate their work. It constitutes a welcome contribution to the burgeoning field of digital humanities, as the first practical guide of its kind designed to facilitate humanist interactions with digital filmmaking, and to empower scholars and students alike to create and distribute new media audio-visual artefacts.
