A guide to citing bibliographic data according to MLA, APA, and Chicago style guidelines also discusses how to conduct research while avoiding plagiarism. *Cites & Sources* John Wiley & Sons
In his bestselling guide, *Doing Honest Work in College: How to Prepare Citations, Avoid Plagiarism, and Achieve Real Academic Success*, veteran teacher Charles Lipson brought welcome clarity to the principles of academic honesty as well as to the often murky issues surrounding plagiarism in the digital age. Thousands of students have turned to Lipson for no-nonsense advice on how to cite sources properly—and avoid plagiarism—when writing their research papers. With his latest book, *Cite Right*, Lipson once again provides much-needed counsel in a

concise and affordable handbook for students and researchers. Building on *Doing Honest Work in College*, Lipson's new book offers a wealth of information on an even greater range of citation styles and details the intricacies of many additional kinds of sources. Lipson's introductory essay, "Why Cite," explains the reasons it is so important to use citations—and to present them accurately—in research writing. In subsequent chapters, Lipson explains the main citation styles students and researchers are likely to encounter in their academic work: Chicago; MLA; APA; CSE (biological sciences); AMA (medical sciences); ACS (chemistry, mathematics, and computer science); physics, astrophysics, and astronomy; Bluebook and ALWD (law); and AAA (anthropology and ethnography). His discussions of these styles are presented simply and clearly with examples drawn from a wide range of source types crossing all disciplines, from the arts and humanities to science, law, and medicine. Based on deep experience in the academic trenches, *Cite Right* is an accessible, one-stop resource—a must-have guide for students and researchers

alike who need to prepare citations in any of the major disciplines and professional studies.

Ethical Behaviour in the E-Classroom

Elsevier Health Sciences

Most students struggle with learning how to find references, use them effectively, and cite them appropriately in a required format. One of the most common formats is that of APA. The authors all teach at the same university, where their current

off-the-shelf reference book, while helpful, is filled with a lot of extra information that they do not use and contains missing or incorrect information. The cost of this book also continues to rise. In a search for something else to meet their needs, they discovered that there are no concise guides that deal with APA only that are cost effective or user-friendly for students who are not familiar with using references and formatting an essay in the APA format. In order to offer student writers a source of information that is concise and cost-effective, the authors have written this handbook to provide students with important information in clear, concise, user-friendly language, as well as to offer practical examples that will help them grasp the concept of secondary research writing. Much of the published materials present the nitpicky details of APA in very technical terms that are not easy to understand. This handbook presents the same information in simplified terms with images and step-by-step instructions in ways that will make sense to both undergraduate and graduate student writers. Additionally, student writers often

struggle with understanding the concept of plagiarism, as well as how to find sources, evaluate the appropriateness of sources, and use sources in effective ways (e.g., how to integrate quotes, when to paraphrase, among others). This book provides this information in a concise and easy-to-understand format.
