CHRIS MALLORY

The Teaching of Social Sciences in India, 1947-67 Cambridge University Press

The legal regulation of gender and sexuality has undergone dramatic changes throughout Europe in the last 40 years and this has shaped what it means to be a European citizen. Drawing on a range of interdisciplinary research, this book uses the discourses around current European sexual politics as an entry point to interrogate how, and with what effect, the EU and its Member States harness issues of gender and sexuality to support issues of higher political importance. It takes recent and ongoing political debates and legislative changes around prostitution and sexual assault as a focus. Using four national case studies: Poland, Germany, Sweden and Italy it illuminates how the EU's desire for increased harmonisation across the Union around gender and sexuality norms and values operates differently and with specific effects across Member States. The book's structure provides a detailed map of how and why contemporary European sexual politics is changing, and how this contributes to establishing European norms and values in developments in

law and policy around prostitution and sexual assault. By examining how and why the EU and its Member States implement their policies in these two policy areas we can begin to illuminate how contemporary European sexual politics serve some groups' interests while marginalizing 'Others'.

The History of Modern Europe Springer Nature

This open access book discusses political, economic, social, and humanitarian challenges that influence both how people deal with their past and how they build their identities in contemporary Europe. Ongoing debates on migration, on local, national, inter- and transnational levels, prove that it is a divisive issue with regards to understanding European integration and identity. At the same time, the European Union increasingly invests in projects related to European heritage, museums, and cultural memory networks, while having to take dissonant heritages into account. These processes in their combination offer an interesting dynamic and form the complex puzzle that poses challenging questions for anyone involved in academic research, heritage practices, and policy debates. With this puzzle at its core, this book explicitly focuses on slippery and transforming notions of Europe and critically discusses ongoing and transforming power structures of heritage and memory in

today's Europe. The book combines theoretical and methodological contributions to the debates on European heritage and memory studies and in-depth analyses of empirical case studies. Its main aim is to bring research fields concerning memory and heritage into a closer dialogue and thus explore the cultural and political dynamics of contemporary Europe.

Informal Marriages in Early Modern Venice A History of the Western Educational Experience

The year of 1832 marked a turning point in France as the country struggled to find its way in the wake of the French Revolution. Following the Revolution of 1830, Legitimists, supporters of the recently ousted Bourbon dynasty's claim to the throne, continued to plot against King Louis-Philippe and his "July Monarchy." In early 1832, after failing to launch a coup in Southern France, Legitimists plotted an unsuccessful uprising in the Vendée, a region in Western France that had supported the royalist cause during the French Revolution. The Duchesse de Berry led the rebellion in the hopes of placing her son, the Bourbon heir, on the French throne. The revolt marked the last attempt by the Bourbons to retake the throne by force and helped solidify the end of the Bourbon dynasty. During the cholera outbreak, which also spread throughout France in 1832, lower income areas suffered higher losses to the disease, for they were more likely to have contaminated water supplies. The lower classes spread rumors that the outbreak was an elitist plot to subdue the masses and the epidemic exacerbated class tensions. Meanwhile, conditions in France continued to be characterized by violence during the early 1830s as Louis-Philippe attempted

to establish his regime's authority. The most significant of these uprisings was the republican-dominated June Revolution of 1832. Victor Hugo and other contemporaries perceived the barricades of June as natural extensions of the cholera epidemic, or the "political continuation of a biological crisis." The sad fate of the uprising, however, prompted republicans to regroup and develop new strategies for success. As a whole, then, 1832 helped solidify the end of the Bourbon monarchy and class identities, and was a crucial moment in the (re)organization and growing solidification of French republicanism that paved the way for the Revolution of 1848. This edited collection examines these three pivotal events in French history in 1832—a royal Legitimist uprising led by the Duchesse de Berry, the cholera epidemic, and the June Revolution (featured in the climax of Hugo's novel, *Les Misérables*)—within the context of the legacy of the French Revolution. While the events of 1832 are significant, they have been relatively ignored because scholars have been distracted by the Revolutions of 1830 and 1848. This collection is the first piece of scholarship to examine these three events in an interconnected pattern to better examine France as it transitioned from a monarchy to a republic. As a result, this collection will be of value to both historians and academics studying diverse subfields within French and European studies.

Despite the great wave of publications on European cities and towns in the pre-industrial period, little has been written about the thousands of small towns which played a key role in the economic, social and cultural life of early modern Europe. This collection, written by leading experts, redresses that

imbalance. It provides the first comparative overview of European small towns from the fifteenth to the early nineteenth century, examining their position in the urban hierarchy, demographic structures, economic trends, relations with the countryside, and political and cultural developments. Case studies discuss networks in all the major European countries, as well as looking at the distinctive world of small towns in the more 'peripheral' countries of Scandinavia and central Europe. A wide-ranging editorial introduction puts individual chapters in historical perspective.

Conditions of the marriage market and sexual culture, and the needs of wealthy families and their members created social tensions in the late sixteenth and early-seventeenth century Venice. This study details these tensions and discusses concubinage- a long-term, sexual, non-marital union - as an alternate family model that soothed them by meeting the needs of families and individuals in a manner that did not offend the sensibilities of the authorities or other Venetians. Concubinage was quite common, and the Venetian community regularly accepted concubinaries, concubinal relationships, and the offspring concubinage produced.

In seinen Aufsätzen stellt Peter Antes vor allem den Islam und das Christentum als Religionen mit vielen Gemeinsamkeiten

und einem zugleich hohen Konfliktpotential ins Zentrum seiner religionswissenschaftlichen Analysen. Religionsvergleichende Arbeiten, Untersuchungen zur religiösen Gegenwartskultur Europas und die Frage nach dem Beitrag von (Religions-)Wissenschaft für ein besseres Verständnis sowohl der eigenen als auch fremder religiöser Kulturen dokumentieren die Intentionen des umfangreichen Werks des Autors. Sie liefern gleichzeitig Beiträge zu aktuellen Debatten um die Bedeutung von Religion im säkularisierten wie auch nach wie vor religiös geprägten Europa.

Transitions to Capitalism in Early Modern Europe Routledge

Confessional Diplomacy in Early Modern Europe examines the role of religion in early modern European diplomacy. In the period following the Reformations, Europe became divided: all over the continent, princes and their peoples split over theological, liturgical, and spiritual matters. At the same time, diplomacy rose as a means of communication and policy, and all powers established long- or short-term embassies and sent envoys to other courts and capitals. The book addresses three critical areas where questions of religion or confession played a role: papal diplomacy, priests and other clerics as diplomatic agents, and religion as a question for diplomatic debate, especially concerning embassy chapels.
