James and Stumpf first met in Prague in 1882. James soon started corresponding with a "colleague with whose persons and whose ideas alike I feel so warm a sympathy." With this, a lifelong epistolary friendship began. For 28 years until James's death in 1910, Stumpf became James's most

important European correspondent . Besides psychological themes of great importance, such as the perception of space and of sound, the letters include commentary upon Stumpf's (Tonpsychologie) and James's main books (The Principles of Psychology, The Varieties of Religious Experience), and many other works. The two friends also exchange views concerning other scholars,

religious faith and metaphysical topics. The different perspectives of the American and the German (European) way of living, philosophizing and doing science are frequently under discussion. The letters also touch upon personal questions of historical interest. The book offers a critical edition and the English translation of hitherto unpublished primary sources.

Historians of psychology and historians of philosophy will welcome the volume as a useful tool for their understanding of some crucial developments of the time. Scholars in the history of pragmatism and of phenomenology will also be interested in the volume.

This book delivers the

first comprehensive study on German modal verbs which summarises and critically reflects the discussion of the last 500 years, checks these findings against large corpus data and is accessible to the English reader. It is shown that non-epistemic modal verbs modify events, whereas their epistemic counterparts modify the proposition, and how the latter developed from the

former. *historische, ökonomische und rechtliche Aspekte eines zentralen Phänomens der Pop- und Rockmusik* Amsterdam University Press

German
Lieder in the

Nineteenth-Century provides a detailed introduction to the German lied. Beginning with its origin in the literary and musical culture of Germany in the nineteenth-century, the book covers individual composers, including Schubert, Schumann, Brahms, Strauss, Mahler and Wolf, the literary sources of lieder, the historical and conceptual issues of song

cycles, and issues of musical technique and style in performance practice. Written by eminent music scholars in the field, each chapter includes detailed musical examples and analysis. The second edition has been revised and updated to include the most recent research of each composer and additional musical examples. *Legacies of Survival and Perpetration*

The development of German pop music represents a fascinating cultural mirror to the history of post-war Germany, reflecting sociological changes and political developments. While film studies is an already established discipline, German pop music is currently emerging as a new and exciting field of academic study. This pioneering

companion is the first volume to provide a comprehensive overview of the subject, charting the development of German pop music from the post-war period 'Schlager' to the present 'Diskursrock'. Written by acknowledged experts from Germany, the UK and the US, the various chapters provide overviews of pertinent genres as well as focusing on major bands such as CAN, Kraftwerk or

Rammstein. While these acts have shaped the international profile of German pop music, the volume also undertakes in-depth examinations of the specific German contributions to genres such as punk, industrial, rap and techno. The survey is concluded by an interview with the leading German pop theorist Diedrich Diederichsen. The volume constitutes an indispensable companion for

any student, teacher and scholar in the area of German studies interested in contemporary popular culture. focus on their own popular music cultures from Germany, Austria and Switzerland for the first time: from subcultural to mainstream phenomena; from the 1950s to contemporary acts. Starting with an introduction and two chapters on the histories of German popular music and its study, the volume then concentrates on focused, detailed and yet concise close readings from different

perspectives (including particular historical East and West German perspectives), mostly focusing on the music and its protagonists. Moreover, these analyses deal with very original specific genres such as Schlager and Krautrock as well as transcultural genres such as Punk or Hip Hop. There are additional chapters on characteristic German developments within music

media, journalism and the music industry. The book will contribute to a better understanding of German, Austrian and Swiss popular music, and will interconnect international and especially Anglo-American studies with German approaches. The book, as a consequence, will show close connections between global and local popular music cultures and diverse traditions of study.

forms of mass communication. Information is aestheticized, and music in turn is incorporated into pre-existing symbolic fields. This volume - the first in the series Musical Cultures of the Twentieth Century - offers a wide-ranging exploration of the relations between sound, technology and listening practices, considered from the complementary perspectives of art music

and popular music, music theatre and multimedia, composition and performance, ethnographic and anthropological research. The Eurovision Song Contest Musicdata Incorporated This biography attempts to shed light on all facets of Zermelo's life and achievements. Personal and scientific aspects are kept separate as far as coherence allows, in order to enable the reader to

follow the one or the other of these threads. The presentation of his work explores motivations, aims, acceptance, and influence. Selected proofs and information gleaned from unpublished notes and letters add to the analysis. Philosophy and Poetry, Music and Eros in H_lderlin, Nietzsche, and Heidegger Routledge The unconscious raises relevant problems in the theory of

knowledge as regards non-conceptual contents and obscure representations. In the philosophy of mind, it bears on the topic of the unity of consciousness and the notion of the transcendental Self. It is a key-topic of logic with respect to the distinction between determinate-indeterminate judgments and prejudices, and in aesthetics it appears in connection with the problems of

reflective judgments and of the genius. Finally, it is a relevant issue also in moral philosophy in defining the irrational aspects of the human being. The purpose of the present volume is to fill a substantial gap in Kant research while offering a comprehensive survey of the topic in different areas of research, such as history of philosophy, philosophy of mind, aesthetics, moral

philosophy, and anthropology. Operating System Glossarium: Unsilenced Texts Throughout his career, David Lewin labored to make even the most abstract theory speak to the experience of the ordinary listener. This book combines many of Lewin's classic articles on song and opera with newly drafted chapters on songs of Brahms, Robert

Bound together by Lewin's cogent insight, the resulting collection constitutes a major statement concerning the methodological problems associated with interpretation of texted music. <i>The Spectator</i> Routledge The volume presents current research in the field of Systematic Musicology at</p>	<p>the Institute of Musicology, University of Hamburg. <p>& Co KG Song Translation: Lyrics in Contexts grew out of a project dedicated to the translation of song lyrics. The book aligns itself with the tradition of descriptive translation studies. Its authors, scholars from Finland, Great Britain, Greece, Italy, Norway and Sweden, all deal with the translation of song lyrics in a great variety of different contexts, including music and</p>	<p>performance settings, (inter)cultural perspectives, and historical backgrounds. On the one hand, the analyses demonstrate the breadth and diversity of the concept of translation itself, on the other they show how different contexts set up conditions that shape translational practices and products in different ways. the continent and abroad. The Contest is broadcast live in over 30 countries with over 100 million viewers annually. Established in 1956 as a televised spectacle to unify postwar Western Europe through music, the Contest features singers who represent a participating nation with a new popular song. Viewers vote by phone for their favourite performance, though they

cannot vote for their own country's entry. This process alone reveals much about national identities and identifications, as voting patterns expose deep-seated alliances and animosities among participating countries. Here, an international group of scholars from a variety of disciplines, including musicology, communications, history, sociology, English and German studies,

explore how the contest sheds light on issues of European politics, national and European identity, race, gender and sexuality, and the aesthetics of camp. For some countries, participation in Eurovision has been simultaneously an assertion of modernity and a claim to membership in Europe and the West. Eurovision is sometimes regarded as a low-brow camp spectacle of little aesthetic

or intellectual value. The essays in this collection often contradict this assumption, demonstrating that the contest has actually been a significant force and forecaster for social, cultural and political transformations in postwar Europe.
