The Publishers' Trade List Annual Allyn & Bacon

Building and operating successful public institutions is a perennial and long-term challenge for governments, which is compounded by the volatile conditions found in fragile settings. Yet some government agencies do manage to take root and achieve success in delivering results earning legitimacy and forging resilience in otherwise challenging contexts. Drawing on mixed-method empirical research carried out on nine public agencies in Lao PDR, Sierra Leone, The Gambia, and Timor Leste, this volume identifies the shared causal mechanisms underpinning institutional success in fragile states by examining the inner workings of these institutions, along with the external operational environment and sociopolitical context in which they exist. Successful institutions share and deploy a common repertoire of internal and external operational strategies. In addition they connect this micro-institutional repertoire to the macro-sociopolitical context along three discernible pathways to institutional success. Institutional development is a heavily contextual, dynamic, and non-linear process but certain actionable lessons emerge for policy-makers and development partners.

Secondary School Reading, Process, Program, Procedure IGI Global

Secondary School Reading presents carefully thought out, practical strategies for promoting the development of reading skills at the post-elementary level. Practical applications are presented through their relationship to the theoretical conception of the total reading-learning process as they relate to the learner's needs. Reading instruction in the secondary school is essentially different than elementary instruction in the school. The older young people have different needs and interests and utilize different cognitive strategies. This volume presents strategies for older learners which reflects a thorough knowledge of both reading and teaching, as well as many years of experience in teaching this level. Secondary School Reading is a good blend of theoretical constructs and practical application. Its examples offer the teacher many ideas for learning activities. Its appendices direct the reader to many sources of information and teaching materials.

Vocabulary Taylor & Francis

In *Building Academic Vocabulary: Teacher's Manual*, Robert J. Marzano and Debra J. Pickering give teachers a practical way to help students master academic vocabulary. Research has shown that when teachers, schools, and districts take a systematic approach to helping students identify and master essential vocabulary and concepts of a given subject area, student comprehension and achievement rises. In the manual, readers will find the following tools: * A method to help teachers, schools, and districts determine which academic vocabulary terms are most essential for their needs * A six-step process for direct instruction in subject area vocabulary * A how-to to help students use the *Building Academic Vocabulary: Student Notebook*. The six-step method encourages students to learn critical academic vocabulary by connecting these terms to prior knowledge using linguistic and non-linguistic means that further encourage the refinement and deepening of their understanding. * Suggestions for tailoring academic vocabulary procedures for English Language Learners. * Samples and blackline masters for a variety of review activities and games that reinforce and refine student understanding of the academic terms and concepts they learn. The book also includes a list of 7,923 vocabulary terms culled from the national standards documents and other publications, organized into 11 subject areas and 4 grade-level categories. *Building Academic Vocabulary: Teacher's Manual* puts into practice the research and ideas outlined in Marzano's previous book *Building Background Knowledge for Academic Achievement*. Using the teacher's manual and vocabulary notebooks, educators can guide students in using tools and activities that will help them deepen their own understanding of critical academic vocabulary--the building blocks for achievement in each discipline.

Journal of Reading World Bank Publications

Activism in any social movement group is, as Deborah Gould observes, a project of collective 'world-making'. It is about changing the world out there by influencing policy and public opinion, but is also about the way it transforms the lives of participants - activists generate new identities, cultures, social ties, rich and varied emotional experiences and interpretations of the world around them. Movements are more likely to be able to attract and sustain support when as projects of collective world-making they feel compelling to activists and would-be activists. In this book Busher explores what has made activism in the English Defence League (EDL), an anti-Muslim protest movement that has staged demonstrations across the UK since 2009, so compelling to those who have chosen to march under its banner. Based on sixteen months of overt observation with grassroots activists, he explores how people became involved with the group; how they forged and intensified belief in the EDL cause; how they negotiated accusations that they were just another racist, far right group; and how grassroots EDL activism began to unravel during the course of 2011 but did not do so altogether. Providing a fresh insight as to how contemporary anti-minority protest movements work on the inside, this book will be of interest to students, scholars and activists working in the areas of British politics, extremism, social movements, community relations and current affairs more generally.

The Publishers Weekly Allyn & Bacon

Charge and Energy Storage in Electrical Double Layers presents the basic scientific concepts and implementation of procedures devised to obtain capacitive energy from changes in the potential of electrical double layers when the salinity of solutions is changed. Capacitive deionization—the closely connected reciprocal process—is also considered. The book covers the fundamentals of electrical double layers and ion transport in porous media, the description of promising techniques of energy extraction, and the practical problems involved in each. It is written for scientists in academia and industry, and for graduate students working in supercapacitors, capacitive mixing and deionization. Provides a didactic presentation of the fundamentals of interface science involved in charge and energy storage processes Presents a pioneering overview of the application of the properties of solid/solution interfaces to desalination and energy extraction Edited by leading specialists with vast experience in the theory and experimental characterization of charged interfaces

Institutions Taking Root Allyn & Bacon

Learn how to tap into the power of imagery, communication, and collaboration to make vocabulary building fun and meaningful! Research has proven that students with a larger, more nuanced vocabulary become more proficient readers, writers, critical thinkers, and learners, making them more likely to succeed in academic environments. In this new book from Joanne M. Billingsley, an award-winning teacher and educational consultant, you will discover how to help your K-12 students expand their academic vocabulary across the content areas. Topics include: Using card sorts and video trailers to make vocabulary-building interactive; Expanding your teaching strategies to support ELLs and early readers; Building students' word knowledge through emblematic and iconic gestures; Writing and asking scaffolded questions to get all students engaged with academic vocabulary; And much, much more! The book also features sample teacher-to-student dialogues to demonstrate how to talk about words, as well as games and activities that motivate students and help word meanings stick. No matter what subject area you teach, your students will benefit from the exciting and powerful strategies in this book.

Building an ESL Collection for Young Adults World Bank Publications

Faculty and students confront persistent racial, economic, and social inequities in higher education locally, nationally, and globally. To counter these inequities, there has been a recent focus on universities providing an inclusive curriculum that serves the needs of students from a wide range of backgrounds. Inclusive and equitable courses and instruction are crucial in today's world as calls for

racial and social justice grow, particularly in higher education. Universities and instructors must take action and make changes to best serve their students. Cases on Academic Program Redesign for Greater Racial and Social Justice provides an equity-oriented practical guide for those in higher education who are engaged in the work of curricular reform or program development. It also explores practices and approaches to curriculum development that consider program quality and equitable outcomes as mutually beneficial and necessary outcomes. Covering a range of topics such as antiracism and mindful hiring, it is ideal for teachers, instructional designers, curricula developers, administrators, academics, professors, educators, researchers, those working in higher education, and students.

Vocabulary Routledge

This book examines protest policing and the toolbox of options available to police commanders in response. The right to peacefully protest is intrinsic to democracy and embedded in British history and tradition. The police are responsible for managing public order and facilitating peaceful protest and this has not been without criticism. On occasions, the police have found themselves in opposition to protest groups and there have been incidents of disorder as a result. In response, the development of Police Liaison Teams in the UK has presented the police with a gateway for dialogue between themselves and those involved in protest. Drawing on two contrasting case studies, the policing of the badger cull in South West England and an English Defence League (EDL) march in Liverpool, this book explores the experiences of police commanders, police liaison officers, protesters, counterdemonstrators, members of local businesses and other interested parties. It explores how a dialogical approach with all those engaged in or affected by a protest has assisted the police in balancing human rights and reducing conflict for all. An accessible and compelling read, this book will appeal to students, scholars and practitioners of policing, politics, criminology, sociology, human rights and all those interested in how protests are policed.

Railway Review Bloomsbury Publishing USA

Boost students' science vocabulary with easy-to-implement effective strategies! Sample lessons using each strategy are included for grade spans 1-2, 3-5, and 6-8 using vocabulary words from standards-based, content-specific units of study. Each strategy also includes suggestions for differentiating instruction. Each notebook includes 25 research-based strategies, differentiation suggestions for each strategy, assessment strategies, sample word lists including both specialized content and general academic words, and parent letters in both English and Spanish. Also included is a Teacher Resource CD with PDFs of resource pages, word lists, assessment pages, and parent letters.

The Prevent Strategy and Right-wing Extremism National Academies Press

Boost students' language arts vocabulary with easy-to-implement effective strategies! Sample lessons using each strategy are included for grade spans 1-2, 3-5, 6-8, and K-12 using vocabulary words from standards-based, content-specific units of study. Each notebook includes 25 research-based strategies, differentiation suggestions, assessment strategies, sample word lists including both specialized content and general academic words, and family letters in both English and Spanish. This resource is correlated to College and Career Readiness and other state standards.

In 2011 the U.K. Government reviewed its counter terrorism Prevent Strategy to include "all forms of extremism" with an emphasis on right-wing extremism. This book - written by the former Head of Strategy and Policy at the Office of the National Coordinator for Prevent - provides the most detailed assessment yet of this shift in emphasis. It explores how the inclusion of right-wing extremism within the counter terrorism Prevent Strategy impacted local responses to the English Defence League. This is explored through numerous interviews and several case studies which were carried out by the author while he was serving as a senior police officer within the Counter Terrorism Command of the Metropolitan Police Service. The book balances empirical research with practical recommendations for policymakers and practitioners from a unique "insider" perspective. This book will be of appeal to an array of audiences including scholars and students of Terrorism Studies, professionals working in the areas of counter terrorism, public order policing and the promotion of community cohesion, and to those who have an interest in wider non-political responses to right-wing extremism.

Spending Wisely Teacher Created Materials

This book provides a detailed application of identity theory to contemporary questions of extremism, radicalization and security. The analysis considers how identity forms a central aspect of notions of extremism and security in Western societies, as articulated both by political leaders, the media and the government. It also takes a close and critical look at counter-extremism policy in contemporary Western society. With its detailed and empirical approach to these questions, this book is an accessible and invaluable resource for academics, practitioners, policy-makers and general readers keen to establish a deeper understanding of the key societal security threats of the day.

Building Academic Vocabulary Steck-Vaughn

Written for advanced ESL/EFL and EAP students, Building Academic Vocabulary helps the user develop lexical precision as he or she works in such often-exercised modes as cause/effect, general descriptions of processes or comparison/contrast.

NASA's Office of the Chief Technologist (OCT) has begun to rebuild the advanced space technology program in the agency with plans laid out in 14 draft technology roadmaps. It has been years since NASA has had a vigorous, broad-based program in advanced space technology development and its technology base has been largely depleted. However, success in executing future NASA space missions will depend on advanced technology developments that should already be underway. Reaching out to involve the external technical community, the National Research Council (NRC) considered the 14 draft technology roadmaps prepared by OCT and ranked the top technical challenges and highest priority technologies that NASA should emphasize in the next 5 years. This report provides specific guidance and recommendations on how the effectiveness of the technology development program managed by OCT can be enhanced in the face of scarce resources.

Strategies for Building Academic Vocabulary in Science Academic Press

This annotated bibliography of more than 500 recommended books meets the needs of teachers and librarians for reading materials for young adults for whom English is a second language. Laura McCaffery, who has many years of experience with collection development of ESL materials for young adults, has selected the best books on a variety of topics to meet curriculum and personal interest needs of young adults. Most of the books selected were published between 1992 and 1998. The bibliography is organized by topic: adventure, mystery, and suspense; biographies; career, workplace, life skills, and parenting; folktales, myths, poetry, and classics; ethnic diversity; history and geography; nature and science; and sports. Indexes by author, subject, title, and ethnic group make searching easy. Mainstreamed ESL students can use these books to better understand and make use of regular textbooks. Special ESL classes can use the recommended books as part of regular instruction. Most of the books recommended are for the intermediate or advanced beginner reading level in English, but some very easy books are also included. Most of the books are suitable for all learners from grades five through adult. Each entry contains a complete bibliographical citation, Fry Reading Level, Interest Level, Library of Congress subjects for cataloging, and a 50 to 200 word annotation describing the book and how it can be used by the librarian or teacher who is working with patrons or students. A list of distributors of print and nonprint ESL materials completes the work.
