The vibrant and beloved community of Eastvale was once an agrarian paradise. Developed initially as ranchlands, this area tucked along the Santa Ana River was transformed by industrious farmers who produced alfalfa and other crops, raised poultry and eventually thrived as dairymen. Eastvale's latest agents of change, however, weren't cattlemen or farmers but real estate agents. Indeed, land developers saw the same potential in Eastvale as the initial ranchers did. Beginning in the 1990s, developers created charming homes and planned neighborhoods for former city dwellers eager to live in Riverside County. Despite the changes, the bucolic ambiance of the bygone era remains. Authors Loren P. Meissner and Kim Jarrell Johnson recount the dynamic changes, important people and exciting events that created Eastvale.

As of 2012, only 43 men have held the office of the President of the United States. Some have been sanctified and some reviled. This historical work addresses the careers of the first ten presidents, men who made vital contributions not only to the office of the presidency, but to the course of the fledgling nation. From Washington through Tyler, every term is recounted in detail and each presidential profile provides as many as a hundred quotations (with full source notes) by the president, his friends, family, historians, and others. Each profile ends with an extensive bibliography of books about the president, his principles and policies, and also provides suggestion for further reading. Rigorously nonpartisan in approach, this detail-rich text describes the early years of what may well be one of the most demanding jobs in the world.

The Missouri legislature passes a bill to flout federal gun-control laws it deems unconstitutional. Texas refuses to recognize same-sex marriages, citing the state's sovereignty. The Tenth Amendment Center promotes the "Federal Health Care Nullification Act." In these and many other similar instances, the spirit of nullification is seeing a resurgence in an ever-more politically fragmented and decentralized America. What this means—in legal, cultural, and historical terms—is the question explored in Nullification and Secession in Modern Constitutional Thought. Bringing together a number of distinguished scholars, the book offers a variety of informed perspectives on what editor Sanford Levinson terms "neo-nullification," a category that extends from formal declarations on the invalidity of federal law to what might be called "uncooperative federalism."

Mark Tushnet, Mark Graber, James Read, Jared Goldstein, Vicki Jackson, and Alison La Croix are among the contributors who consider a strain of federalism stretching from the framing of the Constitution to the state of Texas's most recent threat to secede from the United States. The authors look at the theory and practice of nullification and secession here and abroad, discussing how contemporary advocates use the text and history of the Constitution to make their cases, and how very different texts and histories influence such movements outside of the United States—in Scotland, for instance, or Catalonia, or Quebec, or even England vis-à-vis the European Union. Together these essays provide a nuanced account of the practical and philosophical implications of a concept that has marked America's troubled times, from the build-up to the Civil War to the struggle over civil rights to battles over the Second Amendment and Obamacare.

This book examines the discourses on nation-building, civic identity, minorities, and the formation of religious identities in school textbooks worldwide. It offers up-to-date, practical, and scholarly information on qualitative and mixed-method textbook analysis, as well as the broader context of critical comparative textbook and curriculum analyses in and across selected countries. The volume offers unique and empirical research on how internal educational policies and ideological goals of dominant social, political, and economic groups affect textbook production and the curricular aims in different educational systems worldwide. Chapters address the role of school textbooks in developing nationhood, the creation of citizenship through school textbooks, the complexity of gender in normative discourses, and the intersection of religion and culture in school textbooks.

In this provocative and timely collection of essays--five published for the first time--one of the most important ethnohistorians writing today, James Axtell, explores the key role of imagination both in our perception of strangers and in the writing of history. Coinciding with the 500th anniversary of Columbus's "discovery" of America, this collection covers a wide range of topics dealing with American history. Three essays view the invasion of North America from the perspective of the Indians, whose land it was. The very first meetings, he finds, were nearly always peaceful. Other essays describe native encounters with colonial traders--creating "the first consumer revolution"--and Jesuit missionaries in Canada and Mexico. Despite the tragedy of many of the encounters, Axtell also finds that there was much humor in Indian-European negotiations over peace, sex, and war. In the final section he conducts searching analyses of how college textbooks treat the initial century of American history, how America's human face changed from all brown in 1492 to predominantly white and black by 1792, and how we handled moral questions during the Quincentenary. He concludes with an extensive review of the Quincentenary scholarship--books, films, TV, and museum exhibits--and suggestions for how we can assimilate what we have learned.

Over the past fifteen years Northeast Asia has witnessed growing intraregional exchanges and interactions, especially in the realms of culture and economy. Still, the region cannot escape from the burden of history. This book examines the formation of historical memory in four Northeast Asian societies (China, Japan, South Korea, and Taiwan) and the United States focusing on the period from the beginning of the Sino-Japanese war in 1931 until the formal conclusion of the Pacific War with the San Francisco Peace Treaty of 1951. The contributors analyse the recent efforts of Korean, Japanese, and Chinese scholars to write a 'common history' of Northeast Asia and question the underlying motivations for their efforts and subsequent achievements. In doing so, they contend that the greatest obstacle to reconciliation in Northeast Asia lies in the existence of divided, and often conflicting, historical memories. The book argues that a more fruitful approach lies in understanding how historical memory has evolved in each country and been incorporated into respective master narratives. Through uncovering the existence of different master narratives, it is hoped, citizens will develop a more self-critical, self-reflective approach to their own history and that

such an introspective effort has the potential to lay the foundation for greater self- and mutual understanding and eventual historical reconciliation in the region. This book will be essential reading for students and scholars of Asian history, Asian education and international relations in East Asia.

Celebrated as the home of the blues and the birthplace of rock and roll, Memphis, Tennessee, is where Elvis Presley, B. B. King, Johnny Cash, and other musical legends got their starts. It is also a place of conflict and tragedy--the site of Martin Luther King Jr.'s 1968 assassination--and a city typically marginalized by scholars and underestimated by its own residents. Using this iconic southern city as a case study, Wanda Rushing explores the significance of place in a globalizing age. Challenging the view that globalization renders place generic or insignificant, Rushing argues that cultural and economic distinctiveness persists in part because of global processes, not in spite of them. Rushing weaves her analysis into stories about the history and global impact of blues music, the social and racial complexities of Cotton Carnival, and the global rise of FedEx, headquartered in Memphis. She portrays Memphis as a site of cultural creativity and global industry--a city whose traditions, complex past, and specific character have had an influence on culture worldwide.
