This book demonstrates how traditional knowledge can be connected to the modern world. Human knowledge of housing, health and agriculture dates back thousands of years, with old wisdom developing and becoming modern. But in the past few decades, global communities have increasingly become aware that some of this valuable knowledge has fallen by the wayside. This has sparked systematic efforts at the local, national and global levels to connect this neglected knowledge to the modern world. It discusses the origin of the topic, its importance, recent developments in India and abroad, and what is being done and still needs to be done in order to preserve India's traditional knowledge. The discussions address a broad range of fields and organizations: from Basmati rice to Ayurvedic cosmetics; from traditional irrigation and folk music to modern drug discovery and climate change adaptation; and from the Biodiversity Convention

Includes entries for maps and atlases.

Universities Handbook

It is an absolute delight to present the new and improved issue of the Rajkot City Guide- Education Edition 2013. In this edition, we have incorporated many more schools, colleges, institutes and centers of learning than before. We have tried to dig out even those places hidden in obscure places but which provide quality education in this city. It has always been our endeavor to provide information of the highest order to our readers and to that end, we have pooled all our resources from across the board, spanning all our departments to bring out this latest edition of education that deals with everything and anything that a student or parent might need in order to acquire knowledge in the seat of education known as Rajkot. We have concentrated on the past and future of education in this edition since the present of the same is already done to death and now it is time, we believe, to look to our past, learn from it and proceed into the future for a brighter tomorrow awaits on the horizon.
