Get the most realistic practice available for the MCAT's Biological and Biochemical Foundations of Living Systems Section. Next Step's Strategy and Practice books give you a focused review of several different approaches to MCAT problems, and then offer the single most important resource an MCAT student needs: full timed section practice. Test your skills by completing practice sections and then build upon them with the most thorough explanations available in any MCAT prep book. Unlike most other books (that simply give you an answer key and maybe a short description of the right answer), all of Next Step's Strategy and Practice books show you how to do a thorough breakdown of the passage itself and then follow that up with a careful analysis of the question and every answer choice. Those who purchase a

Aspiring doctors fear the MCAT with good reason- the exam is a daunting 7.5 hours long and covers much more than just the facts about basic sciences. It's an in-depth, rigorous examination of knowledge of a multitude of physical and biological scientific concepts and principles, as well as critical-thinking and writing skills. MCAT Psychology and Sociology Review includes topic reviews of the biological foundations of behavior, personality, motivation, attitudes, psychological disorders, self- and group identities, social structures, learning and memory, and statistics and research methods. The book also includes access to 3 full-length practice MCAT exams. This revised 3rd edition reflects recent changes made by the test-makers to content coverage on the exam (including a new section on research methods and data interpretation, insertion of additional figures and content examples, adjusting the balance of memorization/critical reasoning questions, and revising some content presentation

structures for better exam consistency).
