*Wildlife  
Watching and  
Tourism* UNC  
Press Books  
Cuba is a land  
of  
contradictions  
that is easy to  
enjoy but  
difficult for

first-time  
visitors to  
decipher. The  
largest island  
in the  
Caribbean, it  
is a tropical  
paradise that  
Christopher  
Columbus  
called "the  
most beautiful  
land that  
human eyes

have ever  
seen." It is  
famous for the  
romantic  
charm of its  
crumbling  
colonial cities,  
the beauty of  
its white sand  
beaches, and  
its irresistible  
Afro-Cuban  
dance beats.  
But it is also a

land of shortages and tight government control, which has been in a sixty-year political standoff with its superpower neighbor, the USA. The homegrown version of single-party socialism created by Fidel Castro has kept Cuba in a Cold War time warp that only now is beginning to change. As travel restrictions are relaxed US tourists can once again visit the island. Greater flexibility

toward private enterprise is opening it up to boutique hotels and high-quality home-based restaurants. There is a boom in special-interest tourism for cyclists, hikers, birdwatchers, and scuba divers, while foreign entrepreneurs are eagerly exploring investment opportunities. Culture Smart! Cuba will take you beyond the usual descriptions of Havana nightlife, vintage cars,

and hand-rolled cigars and give you an insider's view of an island that is teetering on the brink of historic change. It offers insights into Cuba's fascinating history, national icons, unique food, vibrant cultural scene, and world-renowned music. Practical tips help business travelers gain an edge on the competition. But most of all, this book aims to show you how best to break the

ice and get a better understanding of the infinitely resourceful Cuban people, who despite severe hardships and shortages over many years remain optimistic and fiercely proud of their heritage and culture. *Cuba - Culture Smart!* Amsterdam University Press Marge and Ted Mueller offer the most complete descriptions of more than 200 magnificent state parks in the Evergreen

State in this updated guide. More than just a listing of campgrounds and picnic sites, Washington State Parks offers detailed information about camping, hiking, bicycling, nature viewing, and more. Detailed park maps help you plan your outing and choose the best campsite. Marge and Ted Mueller have explored the Northwest's mountains, forests, and

waterways for more than 40 years. They are the authors of all titles in the Afoot & Afloat series. [The Potential of Whale Watching in the Caribbean](#) Children's Press(CT) This book is designed to show how ecotourism theory can be put into practice by exploring innovation, program applications, and research-supported case studies in ecotourism. The chapters reflect results of applied

research focused on socio-economics of community development; the value of considering system-wide approaches to the relationships between communities and natural resources; the intricacies of capacity building and training facilitators in ecotourism; and education through ecotourism experiences. The cumulative impact of the research presented highlights

innovative approaches to visitor management, community engagement, and education to critically address the complexities associated with visitation to natural areas and the dependence upon conservation of ecosystems and associated communities. This book was originally published as a special issue of the Journal of Ecotourism. *A Snowstorm in Cuba* Lonely Planet An approach that

encompasses the human and natural dimensions of ecosystems is one that the Wider Caribbean Region knows it must adopt and implement, in order to ensure the sustainable use of the region's shared marine resources. This volume contributes towards that vision, bringing together the collective knowledge and experience of scholars and practitioners within the

Wider Caribbean to begin the process of assembling a road map towards marine ecosystem based management (EBM) for the region. It also serves a broader purpose of providing stakeholders and policy actors in each of the world's sixty-four Large Marine Ecosystems, with a comparative example of the challenges and information needs required to

implement principled ocean governance generally and marine EBM in particular, at multiple levels. Additionally, the volume serves to supplement the training of graduate level students in the marine sciences by enhancing interdisciplinary understanding of challenges in implementing marine EBM. **Moon Cuba** UNEP/Earthprint #1 best-selling guide to Cuba\*

Lonely Planet Cuba is your passport to the most relevant, up-to-date advice on what to see and skip, and what hidden discoveries await you. ### **Wildlife of the Caribbean**

Lonely Planet  
In a region that is exceptionally rich in endemic birds, seabirds, waterbirds, and species already at risk of extinction, Important Bird Areas are an objective expression of

which places in the Caribbean are the most important for these birds and why. This work focuses on a Caribbean network of Internationally important biodiversity sites - IBAs. [DK Eyewitness Top 10 Travel Guide: Cuba](#) Dorling Kindersley Ltd  
Anna and Luke are middle-class Occupy activists from Toronto on a much-deserved vacation for romance and relaxation in Cuba. There is

tension in their relationship, and they hope to ease the tumult by spending time alone, away from the pressures of life. On their way to Cuba, though, they make the acquaintance of another couple. Catherine and Charles are extravagantly wealthy and represent what Anna and Luke detest about capitalist culture. Still, the two couples form an unexpected bond and end

up spending the entire week together. Despite what on the surface seems to be a growing friendship, each player in this strange foreign game has other things in mind. Anna, an artist, hopes to sell several of her paintings to the affluent Catherine. Luke is also interested in Catherine but for different, lustful reasons, whereas Charles seems depressed by just about everything.

When an unexpected storm descends on Cuba, Anna finds herself alone with a drunken Charles; Luke is alone with Catherine. Then, someone ends up missing, and both couples are left wondering if their random meeting was random at all. *American Book Publishing Record* Apa Publications (UK) Limited Marine tourism has become one of the fastest growing areas

within the tourism industry. With the increased use of marine environments comes the need for informed planning and sustainable management as well as for the education and training of planners, managers and operators. Combining the disciplines of marine scientists and tourism researchers, this encyclopedia will bring together the terms, concepts and theories related to

recreational and tourism activities in marine settings.

Entries range from short definitions to medium and long articles.

It's everywhere, and it's telling entire generations of people how to travel the world.' □ Fairfax Media

(Australia)  
**Havana**  
 Sportsman's Connection  
 A guide to finding and observing 420 species of North American mammals, including the art of mammal watching, the best locations, and a species-finding guide. To see a fog shrew, should a mammal watcher go to Muir Woods National Monument? If a family is planning to visit Yellowstone National Park, what animals can they expect to

show their children? When should a photographer visit to get a shot of a gray fox? A finder's guide (rather than an identification guide), this book tells people interested in observing mammals how to look, where to go, and what they are likely to find there. The bulk of the book is made up of two sections: the first includes regions of North America, highlighting the best places to look

for mammals. The second section's accounts of each of the more than four hundred species of mammals covered include detailed directions to specific parks, refuges, and other locations; the best times of day (or night) to look; and much more information specific to each mammal. *Washington State Parks* Hachette UK From the Great Smoky Mountains to Point Reyes

National Seashore, America's national parks are home to some of nature's great wildlife spectacles. Here, Gary W. Vequist and Daniel S. Licht, two veterans of the National Park Service, focus on twelve animals that have been imperiled and at risk, but are now protected within the National Park System. Showcasing one species for each month of the year, including gray wolf,

black bear, prairie dog, sea turtle, bison, bats, salmon, elk, beaver, American alligator, gray whale, and bald eagle, Vequist and Licht pair each premier species with a featured park, adding information about other parks where the species may also be readily seen and identifying other animals to look for in the same habitat—animals that prey, are preyed upon, or exist side by side

with the focal species. Beyond being a guide to observing these remarkable animals, *Wildlife Watching in America's National Parks*, as the title implies, is also a book about America's national parks. Reminding Americans why national parks are truly our "best idea" and encouraging readers to go find out why, these career wildlife specialists stress that it is "impossible to

fathom America without these animals and without the parks in which they reside." Nature lovers, travelers, and outdoor hobbyists of all types will be enthralled by this inside view of America's wildlife and the breathtaking photographs of places they inhabit. Travelers' Tales This highly original volume investigates and documents the complex interactions between small family farms and Man and Biosphere Reserves in Cuba. Covering over two decades of research in agriculture and biodiversity conservation in Cuba, this book provides a unique case study about sustainable agriculture. It shows how the agricultural biodiversity maintained in situ by family farms within those protected areas provides a strategic source of crop genetic resources, including seeds and planting materials, as well as agroecological knowledge and practices. Agricultural practices within and around the Biosphere Reserves have helped to promote local food security through healthier and more diverse food production, while contributing to the conservation of biodiversity and of ecosystems. The book also reports on the adoption of transdisciplinary methods, combining ecological, agronomic, and socio-economic research, along with participatory methods involving farmers in research to document ethnobotanical and farmer knowledge, revealing rich spots of agrobiodiversity maintained

in landscapes, seed systems, and nurseries managed by farmers. It covers a range of ecosystems and biocultural landscapes from arid tropics, tropical hillsides and savannas, montane rainforests, and coastal areas. It examines how family farms in diverse Cuban ecosystems use biodiversity, agro-ecological knowledge, and techniques

while sustaining natural and farming landscapes in a scenario of climate change, frequent disasters, and socio-economic and policy changes. This book will be most suitable for those studying or interested in farming practices, biodiversity conservation, food security, agrobiodiversity, and sustainable development, as well as in Cuban studies.
