Examines what makes  
audiences and their  
experiences of the  
performing arts so unique  
and intense. Readers will  
become aware of the  
conscious and  
unconscious phenomena  
that occur when groups of  
people gather to  
experience performance,  
and how to increase  
individual capacity to  
better analyse and  
respond to performance  
events.

The bestselling analysis of  
higher education's impact,  
updated with the latest  
data *How College Affects  
Students* synthesizes over  
1,800 individual research  
investigations to provide a  
deeper understanding of  
how the undergraduate  
experience affects  
student populations.

Volume 3 contains the  
findings accumulated  
between 2002 and 2013,  
covering diverse aspects  
of college impact,  
including cognitive and  
moral development,  
attitudes and values,  
psychosocial change,  
educational attainment,  
and the economic, career,  
and quality of life  
outcomes after college.  
Each chapter compares  
current findings with  
those of Volumes 1 and 2  
(covering 1967 to 2001)  
and highlights the extent  
of agreement and  
disagreement in research  
findings over the past 45  
years. The structure of  
each chapter allows  
readers to understand if  
and how college works  
and, of equal importance,  
for whom does it work.  
This book is an invaluable  
resource for  
administrators, faculty,  
policymakers, and student  
affairs practitioners, and  
provides key insight into  
the impact of their work.  
Higher education is under  
more intense scrutiny  
than ever before, and  
understanding its impact  
on students is critical for  
shaping the way forward.  
This book distills  
important research on a  
broad array of topics to  
provide a cohesive picture  
of student experiences  
and outcomes by:

Reviewing a decade's  
worth of research;  
Comparing current  
findings with those of past  
decades; Examining a  
multifaceted analysis of  
higher education's  
impact; and Informing  
policy and practice with  
empirical evidence Amidst  
the current introspection  
and skepticism  
surrounding higher  
education, there is a  
massive body of research  
that must be synthesized  
to enhance understanding  
of college's effects. How  
College Affects Students  
compiles, organizes, and  
distills this information in  
one place, and makes it  
available to research and  
practitioner audiences;  
Volume 3 provides insight  
on the past decade, with  
the expert analysis  
characteristic of this  
seminal work.

Personality Theories:  
Critical Perspectives is the  
groundbreaking, final text  
written by Albert Ellis,  
long considered the  
founder of cognitive  
behavioral therapies. The  
book provides students  
with supporting and  
contradictory evidence for  
the development of  
personality theories  
through time. Without  
condemning the founding  
theorists who came

before him, Ellis builds on more than a century of psychological research to re-examine the theories of Freud, Jung, and Adler while taking an equally critical look at modern, research-based theories, including his own.

Neurosis and Human Growth  
The struggle toward self-realization  
Miriam, a freshman Calculus student at Louisiana State University, made 37.5% on her first exam but 83% and 93% on the next two. Matt, a first year General Chemistry student at the University of Utah, scored 65% and 55% on his first two exams and 95% on his third—These are representative of thousands of students who decisively improved their grades by acting on the advice described in this book. What is preventing your students from performing according to expectations? Sandra McGuire offers a simple but profound answer: If you teach students how to learn and give them simple, straightforward strategies to use, they can significantly increase their learning and performance. For over a decade Sandra McGuire has been acclaimed for

her presentations and workshops on metacognition and student learning because the tools and strategies she shares have enabled faculty to facilitate dramatic improvements in student learning and success. This book encapsulates the model and ideas she has developed in the past fifteen years, ideas that are being adopted by an increasing number of faculty with considerable effect. The methods she proposes do not require restructuring courses or an inordinate amount of time to teach. They can often be accomplished in a single session, transforming students from memorizers and regurgitators to students who begin to think critically and take responsibility for their own learning. Sandra McGuire takes the reader sequentially through the ideas and strategies that students need to understand and implement. First, she demonstrates how introducing students to metacognition and Bloom's Taxonomy reveals to them the importance of understanding how they learn and provides the lens through which they

can view learning activities and measure their intellectual growth. Next, she presents a specific study system that can quickly empower students to maximize their learning. Then, she addresses the importance of dealing with emotion, attitudes, and motivation by suggesting ways to change students' mindsets about ability and by providing a range of strategies to boost motivation and learning; finally, she offers guidance to faculty on partnering with campus learning centers. She pays particular attention to academically unprepared students, noting that the strategies she offers for this particular population are equally beneficial for all students. While stressing that there are many ways to teach effectively, and that readers can be flexible in picking and choosing among the strategies she presents, Sandra McGuire offers the reader a step-by-step process for delivering the key messages of the book to students in as little as 50 minutes. Free online supplements provide three slide sets and a sample video lecture. This book is written primarily for faculty but will be

equally useful for TAs, tutors, and learning center professionals. For readers with no background in education or cognitive psychology, the book avoids jargon and esoteric theory.

This reference offers the nuanced understanding and practical guidance needed to address domestic violence, sexual assault, and human trafficking in diverse religious communities. Introductory chapters sort through the complexities, from abusers' distorting of sacred texts to justifying their actions to survivors' conflicting feelings toward their faith. The core of the book surveys findings on gender violence across Christian, Jewish, Islamic, Eastern, and Indigenous traditions--both attitudes that promote abuse and spiritual resources that can be used to promote healing. Best practices are included for appropriate treatment of survivors, their children, and abusers; and for partnering with communities and clergy toward stemming violence against women. Among the topics featured: Ecclesiastical policies vs. lived social relationships:

gender parity, attitudes, and ethics. Women's spiritual struggles and resources to cope with intimate partner aggression. Christian stereotypes and violence against North America's native women. Addressing intimate partner violence in rural church communities.

Collaboration between community service agencies and faith-based institutions. Providing hope in faith communities: creating a domestic violence policy for families. Religion and Men's Violence against Women will gain a wide audience among psychologists, social workers, marriage and family therapists, and other mental health professionals who treat religious clients or specialize in treating survivors and perpetrators of domestic and intimate partner violence, stalking, sexual assault, rape, or human trafficking.

Now available once again, in this classic book noted therapist Jay Haley explains how and why ordeals work in therapy. With the ordeal technique, the therapist's task is easily defined: It is to

impose an ordeal appropriate to the problem of the person who wants to change, an ordeal more severe than the problem. The main requirement of an ordeal is that it should cause distress equal to or greater than that caused by the symptom, just as a punishment should fit the crime. If an ordeal isn't severe enough to extinguish the symptom, it can be increased in magnitude until it is. Haley explains how ordeals can succeed in promoting change even in cases with long histories of therapeutic failure, and describes the use of different kinds of ordeals. Problems discussed include psychosomatic symptoms, uncontrollable and violent children, separation and divorce, anxiety, incontinence, sexual frustration, alcoholism, speech blocks, and depression.

This book weaves together original essays with several that have been published earlier to address establishing the context for multicultural education, implementing multicultural perspectives in the classroom, and assessing the impact of multicultural education. The book also presents two annotated bibliographies. Following a foreword by J. Q. Adams and an introduction by the editors, essays in the book are "Multicultural Education: Development, Dimensions, and Challenges" (James A. Banks); "The Multicultural Campus: Facing the Challenges" (Nancy "Rusty" Barcelo); "Creating Inclusive and Multicultural Communities: Working through Assumptions of Culture, Power, Diversity, and Equity" (Brenda M. Rodriguez); "Building Cultural Bridges: A Bold Proposal for Teacher Education" (Geneva Gay); "Media Literacy: An Educational Basic for the Information Age" (Carlos E. Cortes); "Integrating Race, Class, Gender, and Sexual Orientation into the College Curriculum"

(Barbara M. Scott); "A Multicultural Perspective in the Women's Studies Classroom" (Martha E. Thompson); "Motivations That Drive Prejudice and Discrimination: Is the Scientific Community Really Objective?" (Duane M. The principle of Access to Knowledge (A2K) has become a common reference point for a diverse set of agendas that all hope to realize technological and human potential by making knowledge more accessible. This book is a history of international copyright focused on principles of A2K and their proponents. Whilst debate and discussion so far has covered the perspectives of major western countries, the author's fresh approach to the

topic considers emerging countries and NGOs, who have fought for the principles of A2K that are now fundamental to the system. Written in a clear and accessible style, the book connects copyright history to current problems, issues and events.

TOMORROW. Published annually by the American Alpine Club, Accidents in North American Climbing reports on each year's most significant and educational climbing accidents. In each case, rangers, rescuers, and other experts analyze what went wrong, helping climbers prevent or survive similar situations in the future. In-depth articles cover more topics, including avalanche safety for mountaineers and ice climbers.

*A Manual for Pediatric House Officers* Routledge  
In this new volume, Michael A. Pagano curates essays focusing on the

neighborhood's role in urban policy solutions. The papers emerged from dynamic discussions among policymakers, researchers, public intellectuals, and citizens at the 2014 UIC Urban Forum. As the writers show, the greater the city, the more important its neighborhoods and their distinctions. The topics focus on sustainable capital and societal investments in people and firms at the neighborhood level. Proposed solutions cover a range of possibilities for enhancing the quality of life for individuals, households, and neighborhoods. These include everything from microenterprises to factories; from social spaces for collective and social action to private facilities; affordable housing and safety to gated communities; and from neighborhood public education to cooperative, charter, and private schools. Contributors: Andy Clarno, Teresa Córdova, Nilda Flores-González, Pedro A. Noguera, Alice O'Connor, Mary Pattillo, Janet Smith, Nik Theodore, Elizabeth S. Todd-Breland, Stephanie Truchan, and Rachel Weber.

Directive family therapy pioneer Jay Haley and Madeleine Richeport-Haley explain their innovative techniques for solving problems. Directive Family Therapy is the final work of a widely recognized giant in the international family therapy field. This text is the pre-eminent state-of-the-art sourcebook on practical, innovative techniques to effectively solve problems throughout the life cycle stages. Directive family therapy pioneer Jay Haley, PhD (who passed away in 2007), and Madeleine Richeport-Haley, PhD provide practitioners with creative directives to clearly identify problems, formulate well-designed treatment plans, and then successfully carry them out to achieve lasting therapeutic change. This essential text explores fascinating case studies illustrating the powerful, highly effective problem solving directives. The work is extensively referenced, and includes a full and complete bibliography of Haley's published works and a list of the authors' collaborative films. Directive Family Therapy presents highly instructive, revelatory stories about working with

real life clients and provides dynamic, innovative, and oftentimes surprising solutions to a wide range of specifically detailed problems and clinical issues. All stages and issues in the life cycle are addressed, including birth, child development, raising children, problems in adolescence, becoming a couple, aging, and retirement. Also included is a detailed appendix containing a variety of poignant, insightful interviews featuring Haley's reflections on the early years of practice and the development of directive family therapy. Problem areas addressed in Directive Family Therapy include: firesetting, bedwetting, fear of dogs, violent behavior, teenage rebellion, incest, drugs, panic attacks, abuse, fights within couple relationship, eating disorders, alcohol abuse, affairs, sexual shyness within a couple relationship, shoplifting, and more. Directive Family Therapy is invaluable for mental health professionals of every experience level, and is a useful family therapy resource for educators and students in MFT programs and psychology—and a fitting

and poignant memoir to the work of a profoundly gifted family therapist.

About 40 percent of the books academic libraries purchase in traditional ways never circulate and another 40 percent circulate fewer than three times. By contrast, patron-driven acquisition allows a library to borrow or buy books only when a patron needs them. In a typical workflow, the library imports bibliographic records into its catalogue at no cost. When a patron finds a patron-driven record in the course of research, a short-term loan can allow him to borrow the book, and the transaction charge to the library will be a small percentage of the list price. Typically, a library will automatically

buy a book on a third or fourth use. The contributions in this volume, written by experts, describe the genesis and brief history of patron-driven acquisitions, its current status, and its promise.

### **Theories of Personality**

Peter Lang

What is lesbian literature? Must it contain overtly lesbian characters, and portray them in a positive light? Must the author be overtly (or covertly) lesbian? Does there have to be a lesbian theme and must it be politically acceptable? Marilyn Farwell here examines the work of such writers as Adrienne Rich, Marion Zimmer Bradley, Jeanette

Winterson, Gloria Naylor, and Marilyn Hacker to address these questions. Dividing their writings into two genres--the romantic story and the heroic, or quest, story, Farwell addresses some of the most problematic issues at the intersection of literature, sex, gender, and postmodernism. Illustrating how the generational conflict between the lesbian-feminists of twenty years ago and the queer theorists of today stokes the critical fires of contemporary lesbian and literary theory, *Heterosexual Plots and Lesbian Narratives* concludes by arguing for a broad and generous definition of lesbian writing.

### **The World at Play**

Walter de Gruyter

From *Main Street to Stranger Things*, how poetry changed our idea of small town life A literary and cultural milestone, *Spoon River Anthology* captured an idea of the rural Midwest that became a bedrock myth of life in small-town America. Jason Stacy places the book within the atmosphere of its time and follows its progress as the poetry took root and thrived. Published by Edgar Lee Masters in

1915, *Spoon River Anthology* won praise from modernists while becoming an ongoing touchstone for American popular culture. Stacy charts the ways readers embraced, debated, and reshaped Masters's work in literary controversies

and culture war skirmishes; in films and other media that over time saw the small town as idyllic then conflicted then surreal; and as the source of three archetypes—populist, elite, and exile—that endure across the

landscape of American culture in the twenty-first century. A wide-ranging reconsideration of a literary landmark, *Spoon River America* tells the story of how a Midwesterner's poetry helped change a nation's conception of itself.
