Effective science teaching requires creativity, imagination, and innovation. In light of concerns about American science literacy, scientists and educators have struggled to teach this discipline more effectively. *Science Teaching Reconsidered* provides undergraduate science educators with a path to understanding students, accommodating their individual differences, and helping them grasp the methods--and the wonder--of science. What impact does teaching style have? How do I plan a course curriculum? How do I make lectures, classes, and laboratories more effective? How can I tell what students are thinking? Why don't they understand? This handbook provides productive approaches to these and other questions. Written by scientists who are also educators, the handbook offers suggestions for having a greater impact in the classroom and provides resources for further research.

The Administration and Supervision of Reading Programs, Fifth Edition Guilford Publications
 Feeling reluctant? The Handbook for Reluctant Database Administrators provides you with a solid grasp of what you'll need to design, build, secure, and maintain a database. Author Josef Finsel writes from an understanding point of view; he also crossed over from programming to database administration. Furthermore, database administration veteran Francis Stanisci comments throughout the book, sharing insight from his own years of experience.

Whether a child is passing through a temporary crisis with current work, or has fallen weeks, months, even years behind in reading, this guide will show how a child can be brought back up to grade level. It is also useful for parents who want to give beginning readers a head start, or accelerate their children's current reading skills.

The Activity Program and the Teaching of Reading Guilford Publications

Employees are an organization's most valuable asset. However, getting employees to perform at optimal levels is determined by the quality of the administrators. "Tips for Administrators" is a practical guide for those who are new to administrative and managerial roles, or who feel they can become better at running their departments. Written in an easy-to-read style, "Tips for Administrators" incorporates psychological principles of organizational behavior and relationship building to help administrators optimize the performance of their departments and institutions.

Hospital Administration Apress

Accessible and teacher friendly, this book provides a blueprint for planning, delivering, and evaluating small-group interventions for struggling readers in PreK-2. It describes how to set up an efficient response-to-intervention (RTI) system that enhances any reading program already in place in a classroom, and that is fully compatible with the Common Core State Standards. Presented are dozens of easy-to-implement Tier 2 intervention activities in the areas of letter learning, decoding, and fluency, complete with reproducible goal-setting sheets and fidelity checklists. Purchasers get access to a Web page where they can download and print the reproducible materials in a convenient 8 1/2" x 11" size.

PowerShell in Practice Publish, Inc.

Publisher's description: This book describes eight different models of decision-making, compares the models, and illustrates how to use each model with actual cases from schools. The frameworks include classical, administrative, incremental, mixes scanning, political, and garbage-can models, as well as two models of shared decision-making. After illustrating the use of these decision-making models to analyze and develop solution strategies, students have the opportunity to explore about fifty actual cases to build their own analyses and solution strategies.

Teaching students specific literacy skills is important--but equally critical, and often overlooked, is giving them the time and opportunity to read actual texts. Bringing together leading scholars, this book focuses on how teachers can improve both the quality and quantity of reading experiences in

K-12 classrooms. Essential topics include factors that make reading tasks more or less productive for different types of learners, ways to balance independent reading with whole-class and small-group instruction, how to choose appropriate texts, and the connections between reading engagement and proficiency. The relevant research literature is reviewed, and exemplary practices and programs are described.

How to take advantage of technology, data, and the collective wisdom in our communities to design powerful solutions to contemporary problems The challenges societies face today, from inequality to climate change to systemic racism, cannot be solved with yesterday's toolkit. *Solving Public Problems* shows how readers can take advantage of digital technology, data, and the collective

wisdom of our communities to design and deliver powerful solutions to contemporary problems. Offering a radical rethinking of the role of the public servant and the skills of the public workforce, this book is about the vast gap between failing public institutions and the huge number of public entrepreneurs doing extraordinary things—and how to close that gap. Drawing on lessons learned from decades of advising global leaders and from original interviews and surveys of thousands of public problem solvers, Beth Simone Noveck provides a practical guide for public servants, community leaders, students, and activists to become more effective, equitable, and inclusive leaders and repair our troubled, twenty-first-century world.
